# DOBRODOŠLI U LACUNA GRUPU

## WELCOME TO LACUNA GROUP

Partnerski odnos s našim distributerima, u cilju zadovoljstva i poverenja krajnjih korisnika!

Lacuna grupa je internacionalna kompanija koja u svom poslovanju objedinjuje razvoj, proizvodnju, doradu, prodaju, distribuciju i promociju.

Naši proizvodi podijeljeni su u 3 grupe:

**Zaštitna opreme na radu**  
Odeća i obuća za slobodno vreme  
Radno-zaštitne tkanine/materijali

**Lacuna WORKTIME**, sinonim je za sigurnost i zaštitu a u svom asortimanu zaštitne opreme na radu (Personal Protective Equipment), uključuje kompletnu zaštitu, u skladu s propisanim normama i potrebama profesionalca i poslodavca. WORKTIME asortiman uključuje i kolekciju Corporate Wear - profesionalnu radnu odeću za ugostiteljstvo, medicinu i wellness osoblje kao i radno zaštitne tkanine/materijale.

**Lacuna FREETIME**, odeća i obuća zaštitnih i tehničkih karakteristika, namenjena je zaštitu u svakodnevnim aktivnostima. Raznolikost materijala omogućava da svaku rekreaciju i slobodno vreme pretvorite u zadovoljstvo.

Pratimo svaku tržišnu potrebu logističkom podrškom i stručnim osobljem, a svojim poslovnim partnerima osiguravamo konkurentnost.

Partnership with our distributors, to the satisfaction and trust of end-users!

Lacuna group is an international company that in its business combines the development, production, finishing, sale, distribution and promotion.

Our products are divided into 3 groups:

**Professional Protective Equipment (PPE)**  
Freetime Equipment  
Professional Work Wear Fabric

**Lacuna WORKTIME** is a synonym for safety and protection with **Personal Protective Equipment (PPE)** product range that offer complete safety, in accordance with prescribed standards and the needs of each professional and employer. WORKTIME assortment includes also Corporate Wear collection – Professional work wear clothing for HoReCa, Medicine and Wellness personnel as well as Professional Work Wear Fabrics.

**Lacuna FREETIME**, clothing and footwear designed to protect you in everyday activities. Variety and quality of materials allows each recreation and leisure to be turned into pleasure.

We follow each market with logistic support and professional personnel in order to ensure competitiveness to our business partners.

## MISIJA I VIZIJA

### MISIJA

Profesionalnim pristupom, kvalitetnim proizvodima i inovativnim rešenjima u proizvodnji, osigurati našim korisnicima prvenstveno **sigurnost i zaštitu te zadovoljstvo i udobnost na radnom mestu i u slobodno vreme.**

Razvijanje i unapređenje poslovanja uvođenjem i primenom novih materijala, proizvoda, tehnologija i procesa kao i podizanje nivoa kvaliteta usluga u cilju opravdanja poverenja sadašnjih i budućih kupaca, dobavljača i zaposlenih.

### VIZIJA

Zadržati poziciju tržišnog lidera i kontinuirano nuditi kvalitetne proizvode kreirajući trendove.

**Profesionalan i pouzdan partner po vašem izboru na području sigurnosti**, kvaliteta i zaštite na vašem radnom mestu, dok naši artikli pružaju udobnost nošenja, moderan dizajn istovremeno pružajući sigurnost kako na radnom mestu tako i u svakodnevnim aktivnostima.

## MISSION AND VISION

### MISSION

Professional approach, quality products and innovative solutions in production, primarily to provide our customers with **safety, satisfaction and comfort in the workplace and in your free time.**

Developing and improving with introduction and application of new materials, products, technologies and processes, with a tendency to raise the quality of services in order to justify the trust and loyalty of current and future customers, suppliers and employees.

### VISION

To hold a position of market leader offering quality products, while creating trends.

**Professional and reliable partner of your choice in the field of safety**, quality and protection at your workplace, providing wearing comfort, modern design, at the same time ensuring a high standard of safety and protection at workplace and in everyday activities.

## VREDNOSTI DO KOJIH DRŽIMO

### Kupac u centru pažnje.

Stečeno iskustvo s godinama poslovanja omogućava rad s profesionalnim kadrom i blagovremeni kontakt. Sa zadovoljstvom možemo konstatovati kako pristup u kom je kupac u centru pažnje i postaje naš zaštitni znak. Zajedno s Vama postali smo konkurentni na tržištu i prepoznatljivi po kvalitetu, sigurnosti, dobro razgranatoj distributivnoj mreži i prihvatljivim cenama. Lacuna grupa poseban naglasak stavlja na sigurnost kako na radu tako i u svakodnevnim aktivnostima.

### Naše osoblje tu je za Vas.

Odgovorićemo na svaki Vaš upit i učiniti sve da svaki naš kupac postane trajni partner u našem poslovanju. Svakodnevno težimo daljem razvoju osnovnih vrednosti u kojima smo se prepoznali, a to su lojalnost, partnerstvo, profesionalnost, fleksibilnost, inovativnost, kreativno stvaranje, kvalitet, praćenje trendova i novih tehnologija, dok su naše usluge uvek orijentisane ka kupcu uz individualni pristup.

## VALUES WE HOLD ON TO

### Customer is always at the center of attention.

Experience gained through the years in business allows us to work with the professional staff and to be prompt in dealing with every contact. We are pleased to claim that the approach in which the customer is the focus became our trademark. Together with you, we have become competitive on the market and recognized for the quality, safety, well-branched distribution network and reasonable prices. Lacuna Group places particular emphasis on security at work and in everyday activities.

### Our personnel is there for you.

We will respond to every inquiry and we will do everything to make our customer become a permanent partner in our business. Every day we strive for the further development of our core values: **loyalty, partnership, professionalism, flexibility, innovation, creative production, quality, tracking trends and new technologies**, while our services are always oriented towards the customer with an individual approach.

## LACUNA WEB SHOP

MESTO ZA KUPOVINU  
GDE VAM JE

STAY PROTECTED

# Worktime

ZAŠTITA OČIJU EYES PROTECTION

# ZAŠTITA PROTIV UV-A I UV-B ZRAKA

Smanjivanje zaštitnog ozonskog omotača naglašava sve veći značaj zaštite od sunca. Ljudsko oko i koža veoma su osetljivi na visoku energiju zraka sadržanih u ultraljubičastom (UV) spektru. Čak i za vreme naoblačenja, UV zaštita je izuzetno bitna jer oblaci absorbiraju vidljivu svetlost, ali veoma malo UV. Oči su još više izložene prilikom planinarenja ili u okruženju u kom se UV reflektuje kroz sneg, vodu, pesak, kroz providne zidove, prozore ili ogledala (npr. voda reflektuje 5 do 10% UV zraka; pesak 20%, sneg 85%). U planinama, količina UV zračenja raste 10% na svakih 1000 metara. Iz ovih razloga naše zaštitne naočare LUX OPTICAL filtriraju 99,9% UV zraka.

## SPECIFIKACIJA

### Polarizovana sočiva

Polarizovani filteri pružaju veću udobnost u zonama sa višim nivom reflektovanja svetla (zgrade sa zidovima ogledalima, voda, lagani pesak, sneg...), kao i bolju percepciju reljefa i kontrasta.

### UV400

Dodatna zaštita do 400 nm protiv plavog svetla, koji prati ultraljubičaste zrake (do 380 nm) i sertifikovana je 100%-tna zaštita protiv UV zraka.

### IR

Infrared (infra crveni) zraci prate vidljivu crvenu svetlost, nevidljive su ljudskom oku i vode zagrevanju isijavajućih površina i tela.

### EN186 sočiva

Sočiva sunčanih naočara štite nosioca protiv opasnih efekata sunčevih zraka. Evropski standard EN1836 klasifikuje sočiva u 5 kategorija, koje se razlikuju prema postotku apsorbujućeg svetla preko sočiva.

**PAŽNJA:** sva sočiva u kategoriji 1 i više nisu prikladna za vožnju noću. Sočiva u kategoriji 4 nisu pogodna za vožnju. Filtrirani UV zraciskupljaju se unutar sočiva (mineralno ili organ-ski). Nezavisne su od boje senke.

# PROTECTION AGAINST UV-A AND UV-B RAYS

The decrease of the protective effect of the ozone layer implements that protection against the sun becomes more and more important. Effectively, the eyes (and our skin) are very sensible to high energy rays which exist in the ultraviolet (UV) spectre. Even in cloudy weather, the UV protection is essential because the clouds absorb visible light, but very little UV. The eyes are even more exposed when we are in mountains or in environments where the UV are reflected by snow, water, sand, reverberation from clear walls, windows or mirrors (for example: water reflect 5 to 10% of UV rays; sand 20%; snow 85%). Furthermore, in mountains, the quantity of received UV raises 10% every 1000 metres. This is why all our safety glasses LUX OPTICAL filters out 99.9% of UV rays.

## SPECIFICATION

### Polarized lenses

Polarized filters provide bigger comfort in zones with high reflexion level of light (buildings with mirror walls, water, light sand, snow...) and a better perception of the relief and contrasts.

### UV400

An additional protection up to 400 nm against the blue light, which follows the ultraviolet (up to 380 nm) and is certified to protect 100% against UV rays.

### IR

The infrared rays follow the visible red light, but are invisible for human eyes and lead to a warming up of irradiated surfaces and bodies.

### EN1836 lenses

The lenses of sun shine glasses are made to protect the wearer against the dangerous action of sunlight rays. The European standard EN1836 classifies the lenses in 5 categories which are distinguished according to the percentage of light absorbed by the lens.

**Attention:** all lenses from category 1 and over are unsuitable for driving at night. Lenses of category 4 are not suitable for traffic driving. The filtration of UV rays takes place inside the lens (mineral or organic). It is independent from the shade colour.

| ABSORPCIJA SVETLA<br>ABSORPTION OF LIGHT | KARAKTERISTIKE<br>FEATURES                    |

Nije preporučljivo vozačima.<br>Suitable for the environments with low to medium levels of IR radiation i.e. metal pouring, gas soldering, cutting and brazing. Light acetylene welding. Not appropriate neither for drivers nor traffic driving.  |
| Providna clear                             | 2-1.2                           | EN170                   | 90%   |                              | Osnovna karakteristika je da pruža maksimalnu vidljivost. Unutrašnje sočivo pogodno za mehaničke poslove, tamnije prostore i poslove koji se obavljaju noću.<br>General purpose that offers maximum visibility. Indoor lens, suitable for mechanical work, or dusk, dawn and night time activities. An excellent safety lens for mechanical protection.   |
| Žuta Amber                                 | 2-1.2                           | EN170                   | 89%   |                              | Maksimalno poboljšanje kontrasta boja u slabo osvetljenim prostorijama, npr. skladištima. Zaustavlja 87% plave svetlosti; osigurava svetliji pogled u rano jutro ili kasno uveče, kod naoblačenja, magle. Preporučuje se vozačima koji voze noću, mehaničkim radnicima.<br>Maximum enhancement of contrast in low light environments i.e. warehouse. Blocks out 87% blue light with unparalleled level of detail definition and color recognition. Provides brighter view in early morning or late evening, and in cloudy, foggy, or hazy days. Recommended for night shift workers, surface inspection, mechanical work. |
| I/O ogledala<br>I/O mirror                 | 5-1.7                           | EN172<br>UV400          | 53%   |                              | Providna UV400 sočiva sa laganim zlatnim premazom za upotrebu u zatvorenim kao i otvorenim prostorima. 100% zaštita protiv štetnih UV-A i UV-B zraka. Daje stvarnu percepciju boja. Najčešće korišćena za osobe koje se kreću između zatvorenih i otvorenih prostora; npr. vozači viljuškara, dostavljajući...<br>Clear UV400 lens with light gold coating for indoor and outdoor use. 100% protection from harmful UV-A and UV-B rays. Presents true colour perception. Commonly used where it is required to move between indoor and outdoor applications, i.e. fork lift truck or delivery men/women                   |
| Smeđa Brown                                | 5-2.5                           | EN172                   | 23%   |                              | Poboljšava percepciju prilikom promene svetla i senke, posebno u šumskom okruženju. Mala transmisija svetla poboljšava oštrinu vida i percepciju boja.<br>Enhances perception in changing light and shadow, especially for forest environments. A low light transmission color that heightens visual acuity and improves color perception and complements all light conditions.   |
| Srebrno ogledalo<br>Silver mirror          | 5-2.5                           | EN172                   | 20%   |                              | Redukuje sunčev odsjaj i intenzivno sunčevo svetlo. Tamna sočiva bez degradacije boja. Često korišćene za aktivnosti na otvorenom i izuzetnim sunčanim uslovima, pogotovo za radnike na otvorenom.<br>Reduces sunglare and intense sunlight. Dark lens without colour degradation. Popularly used for outdoor applications in full sun condition, especially for outdoor workers.   |
| Plava ogledala<br>Blue mirror              | 5-2.5                           | EN172                   | 20%   |                              | Redukuje sunčev odsjaj i intenzivno sunčevo svetlo. Tamna sočiva bez degradacije boja. Često korišćene za aktivnosti na otvorenom i izuzetnim sunčanim uslovima, pogotovo za aktivnosti na vodi, poput ribolova kao i za razne druge vodene aktivnosti, vožnju i letenje.<br>Reduces sunglare and intense sunlight. Dark lens without colour degradation. Popularly used for outdoor applications in full sun condition. Ideal for all water activities like offshore fishing and marine activities, driving and flying.  |
| Tamna Smoke                                | 5-2.5                           | EN172                   | 17%   |                              | Štiti oči od jakog sunčevog odsjaja i visokih nivoa opasnih vidljivih svetlosti i ultra ljubičastih zračenja bez distorzije (iskrivljenja) percepcije boja. Idealne na otvorenom, posebno za sunčane dane i jaku sunčevu svetlost, ali ne poboljšava vid. Opšta svrha je kao zaštitna sočiva.<br>Protects eyes from excessive glare and high levels of hazardous visible light and UV radiation without distorting color perception. Ideal for outdoors, especially for bright days and bright sunlight, but does not enhance target. General purpose safety lens.  |
| Zelena Green                               | 3-3                             | EN170<br>UV400          | 16%   |                              | Zelena ZV400 sočiva (100% zaštita). Pruža zaštitu od preteranog odsjaja i 100% od štetne ultra ljubičaste (UV-A i UV-B) radijacije. Alternativa za standardna zatamljena sočiva.<br>Green UV400 lenses. Provides protection from excessive glare and from 100% harmful ultraviolet (UV-A and UV-B) radiation. Alternative to standard smoke lens.   |
| Crveno ogledalo<br>Fire red mirror         | 1                               | EN172                   | 14%   |                              | Redukuje sunčev odsjaj i intenzivno sunčevo svetlo. Tamna sočiva bez degradacije boja. Često korišćene za aktivnosti na otvorenom i jakom suncu. Ogledalo reflektuje svetlo, pritom smanjujući količinu svetla koje prolazi kroz sočivo.<br>Reduces sunglare and excessive sunlight. Dark lens without colour degradation. Popularly used for outdoor applications in strong full sun condition. The mirror reflects light reducing the amount of light which passes through the lens.  |
| Tamna Dark smoke                           | 5-4.1                           | EN172                   | 6%  |                              | Za izuzetno jaku sunčevu svetlost i uslove jakih odsjaja, ali nisu prikladne za vožnju u saobraćaju. Preporučene su za aktivnosti na velikim visinama i za zaštitu od odsjaja od snega, peska i građevina.<br>For exceptional strong sun luminosity and high glare condition, but not suitable for traffic driving. Recommended for high mountain activities and against dazzle from clear surfaces like snow, sand, buildings.   |
| Polarizovana tamna<br>Polarized dark smoke | 5-4.1                           | EN172                   | 6%  |                              | Odlične za izuzetno jaku i direktnu svetlost, kao i uslove jakih odsjaja. Nisu prikladne za vožnju u saobraćaju. Preporučene su za aktivnosti na otvorenom i na velikim visinama. Blokira reflektovane zrake svetla (voda, ogledalo, sneg...) i poboljšava kontrast. 100% UV zaštita.<br>Great for exceptional strong and direct sun luminosity and high glare condition, but not suitable for traffic driving. Recommended for high mountain and outdoor activities. Blocks out reflected waves of light (water, mirrors, snow...) and improve the contrasts. 100% UV protection.  |

# OZNAKE NA OKVIRIMA

## Oznake na okvirima označavaju:

- Identifikacija proizvođača
- Broj norme
- Simbol za otpornost na udar (videti \* niže)
- Simbol CE

\* - **F** označava da ovaj predmet štiti od udaraca srednje jačine koji potiču od čestica koje putuju velikom brzinom

\* - **S** označava da okvir ima pojačanu opštu čvrstinu

## OZNAKA STAKALA

Oznake na staklima:

- Broj stepena zaštite stakala
- Oznaka dobavljača
- Optička klasifikacija
- Otpor na udar
- Simbol CE

**1** označava optičko svojstvo klase 1

**F** označava da taj predmet štiti od udaraca srednje snage koji potiču od čestica koje putuju velikom brzinom

- označava da okvir ima pojačanu opštu čvrstinu

• Obojena stakla sa oznakom boje broj 2-1.2 filtriraju 99% UV zraka do 80 mm ali ne štite od direktnog sunčevog svetla.

• Osenčena stakla sa oznakom boje broj 5-2.5 nude odgovarajuću zaštitu od direktnog sunčevog svetla

• Zelena stakla sa oznakom 5 štite od infracrvenih zraka (IR) za vreme zavarivačkih i lemlačkih radova, sve do maksimalnog volumena plina od 200 litara/sat...

# FRAME MARKING

## The marking on the frame shows:

- Identification of the manufacturer.
- Number of the standard.
- Symbol for impact resistance (see \* below)
- CE symbol

\* -**F** indicates this eye protector provides protection against low energy impact from high speed particles.

\* -**S** indicates the frame is classified as having General Increased Robustness.

## LENS MARKING

The marking on the lens shows:

- Lens scale number.
- Identification of the distributor.
- Optical class.
- Impact resistance.
- CE symbol.

**1** indicates class 1 optical quality (1= for permanent usage and precise work)

**F** indicates that the eye protector provides protection against low energy impact from high speed particles at room temperature only

**S** indicates the lens is classified as having general increased robustness.

• Clear lens marked with shade number 2-1.2 filters out 99% of harmful UV radiation to 380 nm but do not protect against sunglare.

• Smoke lens marked with shade number 5-2.5 offers adequate protection against sunglare.

• Green lens marked 5 offers protection against Infra Red Radiation (IR) during welding and braze welding operations to a maximum gas flow rate of 200 liters/hour.

# NORME ZA NAOČALE

SVI NAŠI MODELI SU ISPITANI EN 166: 2001-169-170-172

## ODRŽAVANJE VAŠIH ŠTITNIKA ZA OČI

Ovi štitnici za oči treba da se drže izvan direktnog sunčevog svetla i izvan dodira sa abrazivnim sredstvima. Stakla se čiste mekom krpom i blagom sapunicom, a mogu se dezinfikovati uobičajenim sredstvom koje se koristi u domaćinstvu.

## VAŽNO UPOZORENJE

- Proverite da li je oznaka zamenskih stakala ista kao i na okvirima, pre nego što ih stavite
  - Materijal korišćen za ovu zaštitu može kod nekih osetljivih osoba izazvati alergijsku reakciju
  - Ako dođe do alergijske reakcije, odmah se posavetujte s lekarom
  - Stakla koja imaju ogrebotine ili male mrlje moraju se odmah zameniti. Ovaj zaštitni predmet se nosi u originalnoj vrećici.
  - Ovaj model overio je: INSPEC Certification Limited, The-BucklandWharf, Aylesbury, Buckinghamshire, HP22 5LQ, Engleska
  - Naši modeli su pregledani i ispitani od strane ovlašćenog tela.
- Sertifikati i overe
- ISO 9002
  - AUSTRALIEN STANDARDS
  - CE

# EYE PROTECTOR STANDARDS

ALL OUR MODELS HAVE BEEN TESTED TO EN166: 2001-169-170-172

## MAINTENANCE OF YOUR EYEPROTECTOR

The eyeprotector should be stored away from direct sunlight and abrasive chemicals. The lens should be cleaned with a soft cloth in warm soapy water. The eyeprotector can be disinfected with any common household disinfectant.

## IMPORTANT

- Ensure that replacement lens' marking is the same as the frame before fitting to the eye protector.
- The materials used in the eyeprotector may cause an allergic reaction to the skin of susceptible wearers
- If any reaction is observed, doctor's advise should be sought immediately
- Scratched or pitted lens should be replaced immediately.
- Under normal usage and correct storage the product should offer sufficient protection for two years. The eyeprotector should be transported in the bag that it was originally supplied in.
- Our models are certified by notified bodies.

## Certificates

- ISO 9002
- Australian Standards
- CE
- CSA: Conform to CSA standards

STAY PROTECTED

# Worktime

ZAŠTITA GLAVE I SLUHA HEAD AND HEARING PROTECTION

# EVROPSKI STANDARD ZA ZAŠTITU SLUHA

Evropski standard 2003/10/EC koji se tiče minimalnih zahteva za zdravlje i sigurnost, a odnosi se na izloženost radnika (rizicima koji proizlaze iz fizičkih aspekata – buke – ili rizika koji bi mogli proizaći zbog izloženosti) buci a posebno rizika od oštećenja sluha, stupio je na snagu 15. februara 2006. Novi standard spušta granicu zvuka štetnog za sluh za 5 dB i sadrži sledeća ograničenja nivoa dnevne izloženosti buci, vremenski meri nivoe izlaganja buci u nominalnom okviru osmočasovnog radnog dana i pokriva sve vrste buke koje su prisutne na radu, uključujući i povremenu buku:

- gde su radnici izloženi buci koja prelazi 80 dB, poslodavac će osigurati individualne štitnike za sluh koji će biti dostupni radnicima
  - gde su radnici izloženi buci koja iznosi ili prelazi 85 dB, koristiće se individualni štitnici za sluh
- Ovaj novi standard uvodi takođe i granične vrednosti izloženosti kao što sledi:**
- ni pod kojim uslovima izloženost radnika buci ne može preći vrednost buke od 87 dB.

Pri primeni graničnih vrednosti izloženosti buci, u samom određivanju efektivne izloženosti radnika buci uzeće se u obzir buka ublažena nošenjem individualnih štitnika. Individualni štitnici za sluh biće odabirani prema tome u kojoj su meri uklonili rizik za sluh ili smanjili isti rizik na minimum.

## Nošenje dvostruke zaštite

Nošenje dvostruke zaštite sluha (štitnika i čepića) može postati neophodno kada je u pitanju naročito bučna radna okolina (120 dB i više). Studije su pokazale da je ublažavanje koje se postiže takvom kombinovanom zaštitom bilo manje od zbira efekata koje omogućava svaka od njih. To je objašnjeno mehaničko-akustičnim uparivanjem koje postoji između uređaja, a naročito zbog visokih frekvencija (do gornje granice) zahvaljujući prolazu zvuka kroz vodič kostiju što dovodi do kratkog spoja u zaštiti, bez obzira na nivo te zaštite. Maksimalno ublažavanja koje se postiže za vreme testova gde su se kombinovali štitnici i čepići za uši je oko 40 dB.

**HML** sistem omogućava definiciju SNR-a. SNR označava 3 parcijalna slabljenja indeksa koji fluktuiraju u zavisnosti od nivoa frekvencija:  
nisko low L – srednje medium M – visoko high H.

The **HML** system enables the SNR definition. SNR stands for 3 partial weakening indexes which fluctuate depending on the level of frequencies:  
low L – medium M – high H.

## STANDARDI

EN 352 > Evropski standard za zaštitu sluha sačinjen je iz nekoliko delova zbog sigurnosti i testiranja na različitim tipovima individualnih štitnika za sluh.

### U ovom katalogu nalaze se:

- EN 352-1 štitnici za uši
- EN 352-2 čepići za uši
- EN 352-3 kaciga s montiranim štitnicima
- EN 352-4 nivo-zavisni štitnici
- EN 352-8 štitnici s ugrađenim radio prijemnikom
- EN 166 > Specifikacije za individualnu zaštitnu opremu za oči i lice.  
Određuje se specifikacija za konstrukciju i sprovođenje (optičke karakteristike kao što su snaga, transmisija i difuzija faktora svetla, mehaničke karakteristike kao što su čvrstoća, termalna stabilnost i otpor).
- EN 1731 > Štitnici za oči i lice, za industrijsku i ne-industrijsku upotrebu, zaštita od mehaničkih rizika i/ili od vrućine.
- EN 812 > Ovim standardom specifikovani su fizički kao i zahtevi u vezi sa sprovođenjem, metode testiranja i zahtevi za kapice koje se koriste u industriji, a otporne su na jake udarce. Kapice otporne na udarce namenjene su za ograničenu zaštitu glave, u okolnostima kada može doći do jakih udaraca, dovoljno snažnih da se radnik povredi ili onesposobi. U suštini su namenjeni okolnostima u kojima predmeti ne mogu pasti. Kapice nisu namenjene zaštiti od efekta padajućih objekata kao ni visećih ili pokretnih tereta. Kapice otporne na udarce ne mogu ni u kom slučaju zameniti zaštitnu industrijsku kacigu koja je u skladu s EN 397 standardom. EN 397 > Evropski standard EN 397 specifikuje zahteve u vezi sa metodama testiranja kao i zahteve za zaštitne kacige koje se koriste u industriji. Te kacige štite od padajućih objekata.

**SNR** = indeks globalnog slabljenja; pokazuje broj dB koje oprema može zaštititi. Nije precizan indeks

**SNR** = global weakening index; shows the number of dB that the equipment can protect against. It is not a precised index

### OBRAZLOŽENJE

**SNR**  
Single Number Rating. Govori o prigušenosti zvuka koju provode pojedini artikli  
H, M, L  
prikazuje prigušenost pojedinih štitnika obzirom na nivo frekvencije:  
H : visoka frekvencija iz prirode  
M : srednja frekvencija iz prirode  
L : niska frekvencija iz prirode

### DEFINITIONS

**SNR**  
Single Number Rating indicating the attenuation a hearing protector might provide.  
H, M, L  
partial indication of the attenuation a hearing protector will provide in  
H : High frequency biased noise environment  
M : Medium frequency biased noise environment  
L : Low frequency biased noise environment

# EUROPEAN DIRECTIVE FOR HEARING PROTECTION

The European Directive 2003/10/EC on the minimum health and safety requirements regarding the exposure of workers (to the risks arising from physical agents (noise) arising or likely to arise from exposure) to noise and in particular the risk to hearing has entered into force on 15 February 2006. This new directive reduces the limit of harmful sounds with 5 dB and contains the following limits for a daily noise exposure level time weighted average of the noise exposure levels for a nominal eighthour working day covering all noises present at work, including impulsive noise:

- Where noise exposure exceeds 80 dB, the employer shall make individual hearing protectors available to workers
  - Where noise exposure matches or exceeds 85 dB, individual hearing protectors shall be used
- This new directive introduces also the notion of Exposure Limit Values as follows :**
- Under no circumstances shall the exposure of the worker exceed the exposure limit values of 87 dB.

When applying the exposure limit values, the determination of the worker's effective exposure shall take account of the attenuation provided by the individual hearing protectors worn by the worker. The individual hearing protectors shall be so selected as to eliminate the risk to hearing or to reduce the risk to a minimum.

## Wearing a double protection

The wearing of a double hearing protection (earmuffs plus earplugs) can be made necessary for executing particularly noisy works (120 dB and more). Studies have made evident that the attenuation made by such combined protection was lower than the sum of the attenuations provided by each one of them. This is explained by the mechanical-acoustic coupling which exists between the devices but also more particularly for high frequencies, by a upper limit due to the passage of sound through bone conduction and which in some way short-circuits the protection, how high it might be. The maximum attenuations obtained during the tests of combining earmuffs and earplugs is around 40 dB.  
Source : INRS, ND 1789-140-90

## STANDARDS

EN 352 > The European Standard for protectors against noise is made in several parts for the safety and testings on the different types of individual noise protectors.

### In this catalogue you will find:

- EN 352-1 : Earmuffs
- EN 352-2 : Earplugs
- EN 352-3 : Helmet mounted earmuffs
- EN 352-4 : Level-dependent earmuffs
- EN 352-8 : Earmuffs with entertainment radio.
- EN 166 > Specifications for individual protective equipments for eyes and face. Determines the specifications for construction and performances (optical properties like strength, transmission and diffusion of light factors, mechanical properties like solidity, thermal stability and resistance).
- EN 1731 > Eye and face protectors of mesh type, for industrial and non industrial use, protection against mechanical risks and/or against heat.
- EN 812 > The EN 812 standard specifies the physical and performance requirements, test methods and marking requirements for shock-proof caps (bump caps) used in industry. The shock-proof caps for industry are meant to give limited protection of the wearer's head when it hits hard and immobile object with sufficient force to cause tearing up or other superficial injuries to the user or knock him out. They are essentially intended for inside use where objects cannot fall down. A shock-proof cap is not intended to protect against the effects of falling objects neither against hanging or moving burdens. The shock-proof caps must not under any case replace a protective industrial helmet complying with the EN397 standard.
- EN 397 > The European standard EN 397 specifies the physical and performance requirements, test methods and marking requirements for protective helmets used in industry. These helmets protect against falling objects.

## INDUSTRIJA PRIMENE INDUSTRY APPLICATION

-  Poljoprivreda / vrtlarstvo  
Agriculture / gardening
-  Laka industrija  
Light industry

## ZAŠTITNI KAČKET

**Zaštitni kačket sa unutrašnjom zaštitom od udaraca.**  
**Ne štiti od padajućih predmeta.**  
 Koristi se za zaštitu u zatvorenim prostorima.  
 Unutrašnji material: 65% poliestersko vlakno, 35% najlonsko vlakno  
**Unutrašnji material:** plastična školjka od ABS-a  
 Metalni otvori za vazduh  
 Regulator veličine  
**Spoljni material:** 100% pamuk  
**Originalno pakovanje:** 1/60

**Shock proof cap**  
**With an internal anti-shock**  
**Does not protect against falling objects**  
 (see protective industrial helmets complying with the EN397 standard.)  
**Outer fabric:** 65% polyester 35% nylon  
 Shell in ABS  
**Outer cushions:** EVA  
**Inner cushions:** polyethylene  
**D1301 outer fabrics:** 100% cotton  
**Original packaging:** 10/60

ARDON **SH-1**

**Zaštitna kaciga SH-1**  
**Material:** ABS  
**Boje:** bela, žuta, plava, crvena, narandžasta, zelena  
**Opis:** zaštitna kaciga, posebno dizajniran za vrhunsku udobnost s ventilacijom, kružić za regulaciju veličine  
**Svojstva:** otporna na temperaturu -20°C to +50°C, vek trajanja 5 godina  
**Norma:** EN 397  
**Originalno pakovanje:** 1/120

**Safety helmet SH-1**  
**Material:** ABS  
**Colors:** white, yellow, blue, red, orange, green  
**Description:** helmet, specially designed for ultimate comfort with ventilation, wheel to control the size  
**Properties:** resistant to temperature -20 °C to +50 °C, lifetime 5 years  
**Standard:** EN 397  
**Original packaging:** 1/120

## PALLADIO

**Zaštitna kaciga samozatezajuća**  
**GP PALLADIO**  
 Material: PE HP  
 Unutrašnji dio: tekstil  
 Svojstva: UV otpornost, otporna na temperature od -20oC do +50oC  
 Svojstva: Specijalni dvostruki sistem za ventilaciju, ugrađen znojnik  
**Težina:** 328g  
 Podešavanje:  
**SAMOZATEZNI MEHANIZAM/automatska regulacija**  
 Norma: EN 397  
**Originalno pakovanje:** 1/24

**Tensioning safety helmet**  
**GP PALLADIO**  
 Material: PE HP  
 Inner part: Textiles  
 Features: UV resistant, resistant to temperatures -20oC to +50 oC  
 Properties: Special dual ventilation system, built-in wrist-bands  
**Weight:** 328g  
**Setting: Automatic control**  
 Standard: EN 397  
**Original packaging:** 1/24

EP DRŽAČ VIZIRA / HEADGEAR 60700

**DRŽAČ VIZIRA**  
Izrađen od polietilena sa čeonim trupom za zaštitu  
Regulacija: zupčasti remen  
Uložak za upijanje znoja  
Podesiv u 3 položaja  
Originalno pakovanje: 1/40

**HEADGEAR**  
Impact-resistant brow protector on headgear with adjustable rack  
3 tip-up positions.  
Sweat-absorber on forehead.  
To be used with all VISORS  
Original packaging: 1/40

CE EN 166

DRŽAČ VIZIRA / HEADGEAR 60740

**DRŽAČ VIZIRA**  
Za antifon max 400 (31040)  
Podesiv u 3 položaja  
Uložak za upijanje znoja  
Upotrebljiv sa svim našim vizirima  
Isporučuje se bez antifona  
Originalno pakovanje: 25/50

**HEADGEAR**  
For earmuff MAX 400 (31040)  
3 tip-up positions with browguard.  
Adjustable  
Sweat-absorber on forehead.  
To be used with all our VISOR.  
Delivered without earmuffs  
Original packaging: 25/50

CE EN 166

VRSTE VIZIRA

EP PROVIDNI VIZIR / CLEAR VISOR 60710

**PROVIDNI VIZIR**  
Š 40 x V 20 cm  
Zaštitni ekran od bezbojnog polikarbonata  
Originalno pakovanje: 1/100

**CLEAR VISOR**  
W 40 x H 20 cm  
Clear protective screen, polycarbonate  
Original packaging: 1/100

60706

**ADAPTER**  
Za zaštitne kacige  
Podesiv na gotovo sve standardne kacige. Omogućuje nošenje štitnika za lice, bez antifona

60707

**NOSAČ VIZIRA**  
Za sve naše vizire  
Podesiv u 3 položaja i po dužini Jednostavni adaptori 60706 ili antifoni 60750 nužni su za fiksiranje na kacigu. Upotrebljiv sa svim našim vizirima.

60710

**ADAPTOR**  
For safety helmets  
Can be fixed on almost any standard safety helmet.  
Allows to wear face shield holder with out earmuffs.

**FACE SHIELD HOLDER**  
For all our visors  
3 tip-up positions and length adjust. Simple adaptors 60706 or ear-muffs 60750 are necessary to fix it on a safety helmet. Can be used with all our VISORS.

ZAŠTITA DISAJNIH PUTEVA RESPIRATORY PROTECTION

# ZAŠTITNI RESPIRATORI, MASKE I POLUMASKE

## LIČNA SREDSTVA ZA ZAŠTITU DISAJNIH PUTEVA

- Respirator za zaštitu disajnih puteva namenjen je ličnoj zaštiti protiv rizika udisanja opasnih supstanci koje se nalaze u radnoj atmosferi u obliku čvrstih prašina ili tekućih aerosola, plina ili pare.
- Korisnici respiratora moraju poznavati prirodu prisutnih rizika, koncentraciju opasnih supstanci u radnoj atmosferi, limite zaštite respiratora, dužinu radnog vremena kako bi se odabrao pravi respirator i omogućila adekvatna zaštita.
- Potrebno je imati percepciju o limitima izlaganja rizicima. Limiti izlaganja su nivoi u kojima nezaštićeni radnik može biti izložen štetnim uticajima otrova. Razlikujemo dugotrajne limite izlaganja (LTEL-Long Term Exposure Limit; 8h izlaganje) i kratkotrajne limite izlaganja (STEL-Short Term Exposure Limit; 15 min izlaganje).
- Navedene vrednosti zavise od nacionalnih odredbi.

## RESPIRATORI ZA JEDNOKRATNU UPOTREBU KOJI ŠTITE OD ČESTICA

- Sastoje se potpuno ili gotovo potpuno od filtera
- Mogu imati ventil za disanje.
- Artikle pokriva norma EN 149:2001. Označavaju se oznakama FFP1 (filter niskog kapaciteta), FFP2 (filter srednjeg kapaciteta) ili FFP3 (filter visokog kapaciteta), u skladu sa klasom delotvornosti.

## OBJAŠNJENJE SKRAĆENICA

|      |  |
|------|--|
| “SL” | artikl štiti i od prašine i od aerosola.   |
| “VO” | filteri koje štite od organiskih isparenja |
| “GA” | artikl štiti od kiselih gasova             |
| “NR” | jednokratni                                |
| “R”  | višekratni                                 |
| “D”  | <b>dolomit test za dugotrajnost</b>        |
| “C”  | aktivni ugljen                             |

## Pune maske i polu-maske s filterom

- Pune maske prekrivaju čelo, nos, usta, bradu i imaju štitnik za oči; njihova su svojstva definisana u standardu EN 136.
- Polu-maske pokrivaju nos, usta i bradu a njihove karakteristike su definisane standardom EN 140.
- Polu-maske i maske moraju u potpunosti prijanjati uz lice kako bi njihova upotreba bila potpuna (u protivnom, njihova primena će biti delimična).
- Karakteristike zamenskih filtera definisane su standardom EN 141 (zaštita od organske i anorganske pare, prašine, kiselih gasova, amonijaka, otopina), EN 143 (prašina, neotoksični plin i sitne toksične čestice) i označeni su različitim bojama koje predstavljaju određenu zaštitu prema evropskim standardima i klasi filtera : 1 = nizak kapacitet, 2 = srednji kapacitet, 3 = visok kapacitet.
- Nikada ne koristiti filter masku u uslovima kada je koncentracija kiseonika niža od 17 Vol.%

# RESPIRATORS, FULL FACE MASKS AND HALF MASKS

## PERSONAL PROTECTIVE EQUIPMENT FOR PROTECTION OF THE AIRWAYS

- A respiratory protective equipment is meant to protect a person against hazardous substances present in the atmosphere where he/she should work under forms like solid or liquid aerosols or gas, vapours or steam.
- The user of a respiratory protective equipment must know the nature of the present risks (composition and concentration of the toxic substances) in the atmosphere in which he/she should work on one hand, and the performance level and limits of the respirator on the other hand. It's important to take into consideration the time during which the protection must be ensured as well as the physiologic charge (breathing rhythm) of the user in order to select a respirator having the adapted autonomy.
- The Occupational Exposure Limit values are the levels of toxic contaminants to which an unprotected worker may be exposed during a given period without adverse health effects. Are distinguished the Long Term Exposure Limit (LTEL for exposure to an 8-hour period) and the Short Term Exposure Limit (STEL for exposure to a 15-minute interval).
- These values depend on national legislations.

## Disposable particulate half-masks against aerosols

- They are totally or mostly made in the filtering material itself.
- They can be made with or without a exhalation valve.
- These protectors are covered by the European Standard EN149 : 2001. They are marked FFP1 (low filtering capacity), FFP2 (medium filtering capacity) or FFP3 (high filtering capacity). «SL» if they both protect against solid and liquid aerosols.
- They are marked «VO» when they protect against organic vapours and «GA» if they protect against acid gases.

## Full-face and half-face masks with filtre cartridges

- Full-face masks cover the forehead, nose, mouth and chin and have a ocular piece ; their characteristics are described in the European standard EN136.
- Half-face masks cover the nose, mouth and chin and are described in the European standard EN140.
- To wear a face mask like a full-face or a half-face mask, it is necessary to make sure that the sealing surface is completely continuous to the face. Men must be correctly shaven and any interposition of hair, beard, or glasses temples must be avoided (otherwise the assigned protection factor will be reduced).
- The threaded filtre cartridges for the masks comply with the European standards EN141 and EN14387 (antigas and combined filters) and EN143 (anti-aerosols) and are labelled with colour-codes according to the European standards and filtering classes : 1 = low capacity, 2 = medium capacity, 3 = high capacity.
- Never use the filtering masks in atmospheres where the Oxygen content is lower than 17 Vol.%.

## EXPLANATION OF SHORTCUTS

|      |   |
|------|---|
| “SL” | protect against solid and liquid aerosols |
| “VO” | “protect against organic vapours”         |
| “GA” | protect against acid gases.               |
| “NR” | non reusable                              |
| “R”  | reusable                                  |
| “D”  | <b>dolomite test for durability</b>       |
| “C”  | carbon layer                              |

Kompanija BLS osnovana je 1970. godine sa sedištem u Milanu sa misijom stvaranja proizvoda za zaštitu respiratornog sistema visokog nivoa zaštite, kvaliteta i dugotrajnosti.

PPE (Personal Protective Equipment) tj. Lična Zaštitna Sredstva se dele u 3 kategorije

- KATEGORIJA I \_minimalni rizici- CAT I
- KATEGORIJA II\_ rizici kod kojih može doći do ozljede ljudi ali nemaju smrtne posledice – CAT II
- KATEGORIJA III\_oprema za zaštitu od smrtnih rizika i ireverzibilnih (trajnih) štetnih povreda - CAT III
- RPP (Respiratory Protection Products) SPADAJU U KATEGORIJU III PPE služe za zaštitu ljudi od smrtnih rizika a osnovna podela je na proizvode koji štite od PRAŠINE, MAGLE, DIMA I AEROSOLA (RESPIRATORI) i proizvodi koji štite od GASOVA I PARA ( MASKE I POLUMASKE I ODGOVARAJUĆI FILTERI )

**RAZRED ZAŠTITE za prašinu, maglu, dim i aerosole - BLS ZERO SERIES, BLS FLICKIT SERIES, BLS CLASSIC SERIES, BLS ECONOMY LINE 100 SERIES**

Evropski standard EN 529:2005 pokazuje kako odabrati ispravan aparat za disanje na osnovu procene rizika. Ovaj standard označava "zaštitni" faktor "koji je po definiciji parametar koji izražava odnos između koncentracija zagađivača u životnoj sredini i njegovoj koncentraciji unutar aparata za disanje. Značajna razlika odnosi se na nominalni faktor zaštite (NPF) i dodeljeni faktor zaštite (APF). Nominalni faktor zaštite (NPF) je broj izveden iz maksimalnog procenta ukupnog gubitka (prema unutrašnjosti uređaja disanja) dopuštenog evropskim standardima. Dodeljeni faktor zaštite (APF) je nivo respiratorne zaštite koja se realno može očekivati na 95% radnih mesta korisnika OZO. Važna referenca za odabir uređaja za disanje je granična vrednost (TLV), odnosno "granična vrednost izloženosti" koja ukazuje na koncentraciju hemikalija u životnoj sredini kojoj većina radnika može biti izložena dnevno bez ikakvog negativnog uticaja na njihovo zdravlje.

The European Standard EN 529:2005 shows how to select the correct breathing apparatus based on the risk assessment. This standard indicates the "protection factor" which is by definition the parameter that expresses the ratio between the concentration of the contaminant in the environment and its concentration inside the breathing apparatus. An important distinction concerns the nominal protection factor (NPF) and the assigned protection factor (APF). The nominal protection factor (NPF) is a number derived from the maximum percentage of total loss (towards the inside of the breathing apparatus) allowed by European standards. The assigned protection factor (APF) is the level of respiratory protection that one can realistically expect in the workplace by 95% of the PPE users. Furthermore, an important reference for choosing the breathing apparatus is the Threshold Limit Value (TLV), or rather the "exposure limit value", which indicates the environmental concentrations of airborne chemicals below which most workers can remain repeatedly exposed to day after day for their working life without any negative effect on their health.

| FILTERING FACEPIECES |     |           | HALF MASK WITH FILTERS |     |           | FULL FACE MASK WITH FILTERS |      |           |
|----------------------|-----|-----------|------------------------|-----|-----------|-----------------------------|------|-----------|
| CLASS                | NPF | MAX CONC. | FILTER CLASS           | NPF | MAX CONC. | FILTER CLASS                | NPF  | MAX CONC. |
| FFP1                 | 4   | 4xTLV     | P1                     | 4   | 4xTLV     | P1                          | 5    | 5xTLV     |
| FFP2                 | 12  | 12xTLV    | P2                     | 12  | 12xTLV    | P2                          | 16   | 16xTLV    |
| FFP3                 | 50  | 50xTLV    | P3                     | 48  | 48xTLV    | P3                          | 1000 | 100xTLV   |

\*TLV: time-weighted average concentration of a substance to which the operator can be exposed without adverse health effects.

**KATEGORIJA ZAŠTITE za gasove i isparenja - BLS 4000 SERIES, BLS SGE46, BLS 8000 SERIES, BLS 5000 SERIES, BLS 3000 SERIES**

Da biste odabrali pravu zaštitu protiv gasova i isparenja, morate poznavati hemijsku prirodu zagađivača. Tabele koje pruža BLS, označavaju vrstu filtera koji treba koristiti u zavisnosti od kontaminanta i nivoa koncentracije, pazeći da je nivo kiseonika veći od 17%. Propisane su tri klase filtera: niska (klasa 1), srednja (klasa 2), visoka (razina 3).

Za zaštitu od gasova i isparenja, utvrđuje se nominalni faktor zaštite po vrsti maske.

To select the right protection against gases and vapours, the chemical nature of the pollutant must be known referring, if necessary, to the tables provided by BLS, which indicate the type of filter to use depending on the contaminant and its concentration, making sure that the level of oxygen is greater than 17%. Regulations provide three filter capacity classes: low (class 1), medium (class 2), high (class 3). For protection against gases and vapours, the nominal protection factor is determined by the type of mask and not by the filter used.

Evropski standard 14387:2004 + A1:2008 definiše zaštitu od gasova i isparenja prema sledećoj tabeli:

| TYPE | COLOUR | PROTECTION  |
|------|--------|---|
| A    | BROWN  | Organic gases and vapours with a boiling point higher than 65°C<br>Organski plinovi i pare s vrelištem iznad 65 ° C   |
| B    | GREY   | Inorganic gases and vapours / Anorganski plinovi i para   |
| E    | YELLOW | Acid gases / Kiseli plinovi   |
| K    | GREEN  | Ammonia and derivatives / Amonijak i derivati   |
| AX   | BROWN  | Organic gases and vapours with a boiling point lower than 65°C<br>Organski plinovi i pare s vrelištem nižim od 65 ° C |

The European Standard 14387:2004+A1:2008 defines protection against gases and vapours according to the following table:

| CLASS          | 1        | 2        | 3         |
|----------------|----------|----------|-----------|
| CAPACITY       | LOW      | MEDIUM   | HIGH      |
| EXPOSURE LIMIT | 1000 ppm | 5000 ppm | 10000 ppm |

\*TLV: time-weighted average concentration of a substance to which the operator can be exposed without adverse health effects.

# FEEL FREE TO BREATHE

BLS **Respirator FFP3 ZERO s ventilom**

**Opis:** respirator FFP3 NR D s ventilom u obliku školjke;  
**Karakteristike:** anatomski oblikovan respirator Zero serije pruža maksimalnu zaštitu i udobnost disanja;  
**Zaptivka:** delimično (gornji deo respiratora) sastav polimer i poliester (PES);  
**Vežica:** vareni termoplastični elastomer (TPE);  
**Kvačica za nos:** polipropilen (PP);  
**Ventil:** polipropilen i guma; Sloj za filtriranje: polipropilen; **Zaštitni sloj:** poletilen;  
**Težina:** 21 gram;  
**Standard:** EN 149:2001+A1:2009;  
**Originalno pakovanje:** 10/120

**Description:** respirator FFP3 NR D with shell seal;  
**Characteristics:** anatomically designed respirator Zer0 series provides maximum protection and comfort of breathing;  
**Gasket:** partial (upper respirator) composition of polymer and polyester (PES);  
**Harness:** Thermoplastic elastomer (TPE);  
**Nose clip:** polypropylene (PP);  
**Valve:** polypropylene and rubber;  
**Filtering medium:** polypropylene;  
**Protective layer:** polyethylene;  
**Weight:** 21 grams;  
**Standard:** EN 149: 2001 + A1: 2009;  
**Original packing:** 10/120

BLS 030

CE EN 149:2001 + A1:2009

BLS **Respirator FFP3 ZERO s ventilom (s ugljikom)**

**Opis:** respirator FFP3 NR D s ventilom u obliku školjke (s ugljikom);  
**Karakteristike:** anatomski oblikovan respirator Zero serije pruža maksimalnu zaštitu i udobnost disanja;  
**Zaptivka:** djelomično (gornji dio respiratora)  
**Sastav:** polimer i poliester (PES);  
**Vežica:** vareni termoplastični elastomer (TPE);  
**Kvačica za nos:** polipropilen (PP);  
**Ventil:** polipropilen i guma;  
**Sredstvo za filtriranje:** polipropilen;  
**Zaštitni sloj:** poletilen;  
**Sloj sa aktivnim ugljikom:** poliester;  
**Težina:** 16 grama;  
**Standard:** EN 149:2001+A1:2009;  
**Originalno pakovanje:** 10/120

**Description:** respirator FFP3 NR D cup shaped (with carbon);  
**Characteristics:** anatomic disposable respirators from BLS Zer0 series offer maximum protection with an outstanding breathing comfort;  
**Gasket:** partial gasket ( upper face only )  
**Material:** polymer and polyester (PES);  
**Harness:** Welded thermoplastic elastomer (TPE);  
**Nose Clip:** Reinforced Polypropylene (PP) with heat treated metal;  
**Valve:** Polypropylene (PP) and rubber ;  
**Filtering medium:** Polypropylene (PP) ;  
**Protective layer:** Polyethylene (PE);  
**Activated carbon layer:** Polyester (PES);  
**Weight:** 16 grams;  
**Standard:** EN 149:2001+A1:2009;  
**Original packing:** 10/120

BLS 030 C

CE EN 149:2001 + A1:2009

BLS **Respirator FFP3 ZERO s ventilom (puna zaptivka)**

**Opis:** respirator FFP3 R D s ventilom u obliku školjke;  
**Karakteristike:** anatomski oblikovan respirator Zero serije pruža maksimalnu zaštitu i udobnost disanja;  
**Zaptivka:** puna (ceo respirator) sastav; polimer i poliester (PES);  
**Vežica:** vareni termoplastični elastomer (TPE);  
**Kvačica za nos:** polipropilen (PP);  
**Ventil:** polipropilen i guma;  
**Sredstvo za filtriranje:** polipropilen;  
**Zaštitni sloj:** poletilen;  
**Težina:** 20 grama;  
**Standard:** EN 149:2001+A1:2009;  
**Originalno pakovanje:** 10/120

**Description:** respirator FFP3 R D cup shaped;  
**Characteristics:** anatomic disposable respirators from BLS Zer0 series offer maximum protection with an outstanding breathing comfort; **Gasket:** full gasket ( full face seal ). **Material:** Foamed polymer coupled with polyester textile (PES);  
**Harness:** Welded thermoplastic elastomer (TPE);  
**Nose Clip:** Reinforced Polypropylene (PP) with heat treated metal;  
**Valve:** Polypropylene (PP); Rubber;  
**Filtering medium:** Polypropylene (PP) ;  
**Protective layer:** Polyethylene (PE);  
**Weight:** 20 grams;  
**Standard:** EN 149:2001+A1:2009;

BLS **Respirator FFP2 CLASSIC s ventilom**

**Opis:** respirator FFP2 R D s ventilom;  
**Karakteristike:** oblik školjke, elastična vezica pričvršćena u 4 tačke;  
Vezica varena za respirator i prilagodljive dužine;  
Prilagodljiva kopčica za nos za savršeno prijanjanje uz lice;  
**Vežica:** poliester, guma;  
**Kvačica za nos:** polipropilen (PP);  
**Ventil:** polipropilen i guma;  
**Zaptivka:** polimer;  
**Sloj za filtriranje:** polipropilen;  
**Težina:** 14 grama;  
**Standard:** EN 149:2001+A1:2009;  
**Originalno pakovanje:** 15/180

**Description:** Description: respirator FFP2 R D with valve;  
**Characteristics:** cup shape, elastic harness attached in 4 points;  
Velded harness, adjustable lenght;  
Nose clip ensures best fit to any face;  
**Harness:** polyester, rubber;  
**Nose clip:** polypropilen (PP) ;  
**Valve:** polypropilen and rubber;  
**Gasket:** polymer ;  
**Filtering medium:** polypropilen;  
**Weight:** 14 grams;  
**Standard:** EN 149:2001+A1:2009;  
**Original packing:** 15/180

BLS Komplet polumaska s filterima ( 4000S-S/M + 301 + 211 )

BLS 4100

**Opis:** polu-maska sa dva filtera A2 i predfilterima P2 NR, komplet za upotrebu odmah;  
**Materijal:** nosni deo: od silikona i termoplastičnog elastomera, držači filtera od poliamida, ostali delovi polu-maske su od polipropilena;  
**Karakteristike:** ergonomski delovi sastoje se od naslona za glavu koji je prilagodljiv za korisnika;  
**Polu-maska:** obuhvata frontalni izdisajni ventil i dva bočna udisajna ventila koji su opremljeni specijalnom bajonet vezom;  
**Težina:** 126 g;  
**Standard:** EN 140, EN 14387;  
**Originalno pakovanje:** 1/8

**Description:** half a mask with two filter and  
**Material:** part of nose: from silicone and thermoplastic elastomer, holding for filter from polyamide, other parts halfamask from polypropylene;  
**Properties:** an ergonomic harness with our couplings, provided with an head rest adaptable by the user connected to a supporting rigid part;  
**Half a mask:** ergonomic parts;  
**Weight:** 126 g;  
**Standard:** EN 140, EN 14387;

HIGIJENA RUKU / SREDSTVA ZA ISPIRANJE OČIJU HAND HYGIENE / EYES RINCE SOLUTIONS

Na osnovu višegodišnjeg iskustva firme Plum i njihovih efikasnih i modernijih rešenja za održavanje higijene ruku na svim vrstama radnog mesta, odabrali smo proizvode koji nude izuzetan kvalitet i pouzdanost. Godine 1996. proizvodna paleta proširena je i na efikasna sredstva za ispiranje očiju, koja se koriste kao prva pomoć. Proizvodni proces smešten je u Danskoj u potpuno novoj, modernoj fabrici koja osigurava svetske standarde u proizvodnji ove grupe proizvoda. Distributivna mreža kompanije Plum u evropskim okvirima vrlo dobro je razgranata, dok je u regiji Vaš partner firma Lacuna preuzela odgovornost za distribuciju i servis na području Hrvatske, Slovenije, BiH i Srbije

LACUNA/PLUM partnerstvo omogućava rešenja koja doprinose sigurnoj i zdravoj radnoj atmosferi.

## REŠENJA KOJA DOPRINOSU SIGURNOJ I ZDRAVOJ RADNOJ ATMOSFERI

### HIGIJENA RUKU

Firma Plum proizvodi visokokvalitetne kreme za negu kože, sredstva za čišćenje ruku, sapune i farmaceutska rešenja već skoro 40 godina. Najvažniji zadatak je izaći u susret potrebi za nežnim i efikasnim sredstvima za čišćenje i negu ruku, kako bi ruke ostale zdrave. Ovu vrstu proizvoda uspešno koriste trgovci i zaposleni u industriji.

### SREDSTVO ZA ISPIRANJE OČIJU

Danas na tržištu možemo ponuditi najveću paletu sredstava za ispiranje očiju kao sredstvo prve pomoći u slučaju nezgode. Sredstva firme Plum su efikasna, fleksibilna, higijenska i, ništa manje važno, jednostavna za rukovanje. Prilagođena su različitim radnim prilikama i potrebama. Mogu naći svoje mesto blizu radnog mesta – naročito tamo gde nastupa rizik za zdravlje očiju, brzo i efikasno ispiranje može ključno uticati na eventualne posledice.

### PLUM PROGRAM ZA NEGU KOŽE

Manuelni rad često je naporan za kožu – pranje vodom, sapunom, a naročito sredstvima za čišćenje ruku, takođe može oštetiti kožu. Ako želite da sprečite sušenje kože ili u najgorem slučaju, iritaciju kože – vrlo je važno održavati kožu čistom i zdravom. Jedan od uslova koji omogućava održavanje čiste, zdrave kože jeste postojanje proizvoda koji su odgovarajući za Vaš posao.

### ČIŠĆENJE KOŽE

Sredstvo za čišćenje kože mora biti nežno, ali i efikasno, prilagođeno radnoj situaciji.

### NEGA KOŽE

Zaštitite svoju kožu korišćenjem regenerišuće kreme pre, za vreme i nakon rada

Based on years of experience Company Plum and their efficient and modern solutions for hand hygiene in all types of workplace, we have selected products that offer exceptional quality and reliability. In 1996, production range was extended with effective eye washers, which are used as first aid.

The manufacturing process is located in Denmark in a brand new, modern factory, which ensures international standards in the production of this product group.

Distribution network companies Plum in the European framework is very well diversified, while in the region of your partner company Lacuna assumed responsibility for distribution and service in the Croatia, Slovenia, Bosnia and Serbia.

Lacuna / Plum partnership provides solutions that contribute to safe and healthy work environment.

## SOLUTIONS THAT CONTRIBUTE TO SAFE AND HEALTHY WORK ENVIRONMENT

### HAND HYGIENE

Plum Company is manufacturing high quality skin care creams, hand cleaners, soaps and pharmaceuticals solutions for almost 40 years. The most important task for gentle and effective hand cleansers is to keep our hands healthy. This type of products are successfully used by traders as well as the industry.

### EYE WASHER

Today, the market can offer the greatest variety of means for flushing the eyes as a means of first aid in case of an accident. Products of Plum company are efficient, flexible, hygienic and easy to handle. Adapted to different working conditions and needs, they can find their place close to the workplace – especially where is high eye risk.

### PLUM PROGRAM FOR SKIN CARE

Manual labor is often difficult for the skin - wash with water, soap, and especially cleaning hands, it can also damage the skin. If you want to prevent dry skin or, at worst, skin irritation - it is very important to keep your skin clean and healthy. One of the conditions that allow maintenance of clean, healthy skin is the existence of products that are appropriate for your working place.

### SKIN CLEANING

Skin cleanser should be gentle and effectively customized with work situation.

### SKIN CARE

Protect your skin by using renewing cream before, during and after work.

## MAXI-PLUM SISTEMI PUNJENJA MAXI-PLUM FILLING SYSTEMS

### ŠTO VAM NUDE PLUM SISTEMI PUNJENJA

#### SMANJENA POTROŠNJA .

Izmerena količina sapuna pri svakom korišćenju čini MaxPlum krajnje ekonomičnim u upotrebi i tako smanjuje potrošnju. Ruke se mogu prati češće sadržajima u pakovanjima kapaciteta 4,2 l, nego sadržajima posuda kapaciteta 10 l. Smanjena potrošnja takođe smanjuje rizik blokiranja odvodnih cevi.

#### HIGIJENSKO, HERMETIČKO PAKOVANJE ZA JEDNOKRATNU UPOTREBU.

Sprečava isušivanje proizvoda i tako produžuje njegovo trajanje. Hermetičko pakovanje s integrisanim ventilom sprečava penetraciju bakterija. Pakovanje i ventil se podešavaju se kada se dopinjavai sam proizvod.

#### PUNJENJE I ODRŽAVANJE ŠTEDE VREME.

Sistem kesa-u-kutiji jednostavno se zamenjuje. Sadržaj 4,2 l takođe smanjuje učestalost dopune i stvara manje otpada. Glatke, ravne površine sistema punjenja lako se čiste.

#### JEDNOSTAVAN, JAK SISTEM PUNJENJA.

Jednostavne, čiste linije i izbor belog ili crnog poklopca omogućavaju harmonično instaliranje sistema za punjenje uz postojeću opremu za pranje. Izdržljivi materijali osiguravaju dug vek trajanja.

#### EKOLOŠKI PRIHVATLJIVA AMBALAŽA PROIZVODA .

Ambalaža je napravljena od ekološki prihvatljivih PU materijala i kartona, koji otpuštaju samo vodu i ugljenik dioksid kada se spaljuju.

#### ZAKLJUČAVANJE PO IZBORU.

Sistem za pranje može biti osiguran protiv krađe uz pomoć brave.

#### ČISTA, ZDRAVA KOŽA .

Jednostavna, prilagodljiva paleta stvara efikasan sistem koji će savršeno odgovarati Vašem radnom mestu.

### WHAT PLUM SYSTEM OFFERS YOU

#### REDUCED CONSUMPTION.

The measured amount of soap every time you use it makes MaxPlum extremely economical in use and reduce consumption. Hands can be more washed with packaging capacity of 4.2 l. Reduced consumption also reduces the risk of blocking the pipes.

#### HYGIENIC, HERMETIC PACKAGING FOR DISPOSABLE .

Prevents drying of the product and prolongs its duration. Hermetic packaging with an integrated valve prevents the penetration of bacteria. Packaging and valve adjust when refill of product is done.

#### CHARGE AND MAINTAIN SAVING TIME.

System Bag-in-box are easily replaced. Contents 4.2 l also reduces the frequency of replacement, and produces less waste. Smooth, flat surface charging systems, easy to clean.

#### A SIMPLE, ROBUST SYSTEM OF CHARGING.

Simple, clean lines and choice of white or black cover allow the installation of a harmonious system for filling the existing equipment for shampoo. Durable materials provide long service life.

#### ENVIRONMENTALLY FRIENDLY PACKAGING PRODUCTS .

Packaging is made from environmentally friendly PU material and cardboard, which release only water and carbon dioxide when burned.

#### FOR NECESSARY, CAN BE LOCKED .

System for washing can be secured against theft with the help of lock.

#### CLEAN, HEALTHY SKIN

Simple, flexible palette creates an efficient system that will perfectly suit your workplace.

Detectable strapping tape with metal strip which allows detection by metal detectors in hygienically sensitive conditions (food industries), sterile and resistant, perforated breathable and supporting materials.  
Measurements: 72 x 25 mm. 45 pieces per pack for filling.

# PLUM SREDSTVA ZA ISPIRANJE OČIJU PLUM EYE RINSE SOLUTION

## PLUM SREDSTVA ZA ISPIRANJE OČIJU U SLUČAJU NEZGODE

### PLUM PROGRAM ZA NEGU KOŽE

Ispiranje oka – činjenično stanje

Imate samo dva oka – vodite računa o njima. Vid je jedno od naših najvažnijih čula. Ako dođe do nezgode, svega nekoliko sekundi presudno je za posledice mogućeg gubitka vida. Sredstvo za ispiranje očiju koje je uvek na dohvat ruke odlučujući je faktor kada postoji rizik povrede očiju. Ovo se naročito odnosi na povrede uzrokovane kiselinama i alkalima; nagrizajuće pečenje započinje istog časa kada otrov dođe u dodir s očima. Vreme je takođe važno kada se radi o povredama uzrokovanim metalnim krhotinama ili npr. drvenim iverjem, prašinom i prljavštinom. U takvim situacijama korištenje sredstava za ispiranje očiju, neposredno nakon povrede može sprečiti lepljenje stranih tela na oko i ozbiljne povrede. Pravilno pozicioniranje sredstava za ispiranje očiju u skladu s potrebama na radnom mestu može predstavljati odlučujući napor uloženi kako bi se sprečile ozbiljne povrede očiju.

Za optimalnu sigurnost tamo gde postoji rizik od povrede očiju, oprema za ispiranje očiju mora biti:

1. Trenutno dostupna
2. Prilagođena brzom primeni
3. Efikasna, bez uzrokovanja daljih povreda

Možemo Vam ponuditi široku paletu rastvora za ispiranje očiju, male i velike jedinice koje se montiraju direktno uz radna mesta, ili mala mobilna pakovanja solucija koje se mogu staviti u vozilo, kutiju za alat ili kutiju za prvu pomoć, kao i u specijalnu pojasnu torbicu. Uvek će biti moguće naći rešenje koje će Vam omogućiti jednostavan pristup sredstvu za ispiranje očiju. Naš sistem je razvijen da bi omogućio jednostavno ispiranje oka. Dva jednostavna pokreta i bočica je spremna za upotrebu. Ergonomski oblikovana da pokrije oko osigurava direktno ispiranje i odvodi tečnost iz oka nakon ispiranja.

### VAŽNO!

U vezi s povredama bilo koje vrste, tečnost mora dopreći do oka u nežnom, jednokratnom mlazu. Bocu pritisnite lagano, bez gnječenja. Uvek potražite medicinsku pomoć i nastavite sa ispiranjem za vreme transporta. Nudimo dve vrste tečnosti za ispiranje očiju. Nakon nezgoda koje su uzrokovane jakim kiselinama ili alkalima, od vitalnog je značaja neutralisati tečnost u oku što je brže moguće – po mogućnosti u roku 40 sekundi – kako bi se Ph vrednost oka normalizovala na 7,4. Ph Neutral je sterilna neutrališuća solucija za ispiranje očiju bazirana na 4,9% fosfatnoj soluciji, koja neutrališe tečnost iz oka nakon nezgoda koje su uzrokovane hemikalijama. Dostupna je i dokumentacija o sigurnosti i efikasnosti. Ph Neutral jednako je efikasan i kada se koristi za potrebe uzrokovane kiselinama ili bazama na bilo kom delu tela. Za povredu uzrokovanu stranim telom kao što su npr. metalne krhotine ili drveno iverje, prašina i prljavština, preporučujemo ispiranje sredstvom Plum Eye Wash. Radi se o sterilnoj otopini natrijum hlorida (0,9%) koji odgovara prirodnoj tečnosti koja vlaži oko. Na taj način dobijate nežno i blago čišćenje. Svi naši proizvodi za ispiranje očiju nose oznaku CE u skladu sa regulativama o medicinskoj opremi. Takođe, proizvodi su sterilni kako oko ne bi zahvatilo bakterije i klice prilikom ispiranja.

## PLUM EYE WASHERS IN CASE OF AN ACCIDENT

### PLUM PROGRAM FOR SKIN CARE

Eye washers - the facts

You only have two eyes - take care of them. Eye is one of our most important sense. In the case of an accident, only a few seconds need for possible loss of vision. Eye washers is a decisive factor when there is a risk of eye injury. This especially applies to injuries caused by acids and alkalis, caustic burning begins the moment when the circuit comes into contact with the eyes. Time is also important when it comes to injuries caused by metal debris such as wooden or wood particles, dust and dirt. In such situations is necessary to use Eye washers immediately after injury to prevent bonding of foreign bodies in the eye and serious injuries. Proper positioning for eye washers depends on needs of the workplace. That can be a decisive efforts that has been made in order to prevent serious eye injury.

For optimum safety, where there is risk of eye injury, equipment for rinsing eyes must be:

1. Currently available
2. Custom rapid application
3. Effective, without causing further injury

We offer a wide range of solutions for rinsing eyes, small and large units that are mounted directly at the workplace, or a small mobile package solution that can be placed in a vehicle, toolbox or a box for first aid, as well as special waist case. There will always be possible to find a solution that will allow easy access to rinse eyes. Our system was developed to allow easy rinsing eye. Two simple movements and bottles ready for use. Ergonomically shaped provide direct irrigation and drains fluid from the eye after flushing.

### IMPORTANT!

Import from injuries of any kind, the liquid must reach the eye in a gentle, single jet. Bottle press gently, without crushing. Always look for medical attention and continue flushing during transport. We offer two types of fluid for flushing the eyes. After the accidents were caused by strong acids or bases, is of vital significance to neutralize the fluid in the eye as quickly as possible - preferably within 40 seconds - to a pH value of the eye normalized to 7.4. Neutral pH is sterile neutralizing solution for eye flushing based on 4.9% phosphate solution, which neutralizes the fluid of the eye after the accident caused by chemicals. Available and documentation of safety and effectiveness. Neutral pH is equally effective when is used for the purposes caused by acids or bases in any part of the body. For injury caused by foreign body, such as metal chips or wood chips, dust and dirt, we recommend rinsing agent Plum Eye Wash. It is a sterile solution of sodium chloride (0.9%) which corresponds to the natural fluid that moisturizes the eye. So you get a soft and gentle cleaning. All our products carry the CE sign accordance with the regulations on medical equipment. Also, the products are sterile so that bacteria or germs can not affect the eye during the washing.

| Povrede koje uključuju prisutnost stranih tela (prljavština, metalne krhotine i drveno iverje) | Ispirati sredstvom Plum Eye Wash dok se ne ukloni strano tijelo iz oka  | Injuries involving the presence of foreign bodies (dirt, metal shards, and wood chips) | Rinse agent Plum Eye Wash until the foreign body removed from the eye   |
|--|---|--|---|
| Kiseline   | Ispirati otprilike 2 minuta sredstvom pH Neutral pa nastaviti ispiranje sredstvom Plum Eye Wash dok neugodan osećaj ne prođe ili dok ne stigne stručna medicinska pomoć | Acids  | Flush for about 2 minutes with pH Neutral and continue flushing agent Plum Eye Wash discomfort while it passes or until professional medical help arrives |
| Lužine   | Ispirati otprilike 2 minuta sredstvom pH Neutral pa nastaviti ispiranje sredstvom Plum Eye Wash do stručne medicinske pomoći  | Bases  | Flush for about 2 minutes with pH Neutral and continue flushing with Plum Eye Wash while medical help arrives   |
| Druge povrede koje uključuju hemikalije  | Ispirati sredstvom Plum Eye Wash dok neugodnost ne prođe ili dok ne stigne stručna medicinska pomoć   | Other injuries involving chemicals   | Rinse agent Plum Eye Wash discomfort while it passes or until professional medical help arrives   |

# STANDARDI I KARAKTERISTIKE

Na svakom odelu nalazi se etiketa stavljena iznutra. Ova etiketa označava tip zaštite odevnog predmeta:

1. Zaštitni znak
2. Proizvođač, uvoznik
3. Identifikacija modela
4. Oznaka CE. Odelo odgovara normama koje se odnose na zaštitnu odeću kategorije III, u skladu sa evropskim zakonskim normama. Ateste o osiguranju kvaliteta i ateste ispitivanja izdaje za to nadležno telo. Oznaka koja označava da taj artikl:
  - ispunjava sve zahteve koje predviđa direktiva 89/686/CEE, koja se odnosi na opremu za ličnu zaštitu.
  - podleže antistatičkoj obradi i pruža elektrostatičku zaštitu u skladu sa normom EN 1149-1
5. Oznake koje označuju usklađenost s EU standardima o odeći za hemijsku zaštitu.
6. Oznaka „otvorena knjiga“ upućuje na upotrebu upoznavanja s „uvjetima korištenja“
7. Oznaka veličine. Sličica koja označava veličinu odnosi se na razne veličine i daje ekvivalent kodova koji se obično koriste. Za vašu veličinu odaberite odeću koja odgovara kodovima.
8. Oznake koje se odnose na održavanje:
  - Pranje nije dozvoljeno.
  - Čišćenjem bi se mogle izmeniti zaštitne karakteristike odeće (gubljenjem antistatičnih svojstava).
  - Sušenje u mašini nije dozvoljeno.
  - Suvo čišćenje nije dozvoljeno.
  - Peglanje nije dozvoljeno.
  - Zapaljivo. Držati dalje od plamena i svih jakih izvora toplote
9. Odeća koja je prošla kroz antistatičku obradu i ima elektrostatičku zaštitu

# STANDARDS AND PROPERTIES

Each garment bears a label appended inside the garment. Each label points out the types of the garment's protection:

1. Name of the registered brand
2. Manufacturer, importer
3. Identification of the model
4. CE branding. The garment meets the standards relative to protection clothes, in accordance with the European legislation. Certificates relative to the quality insurance and to tests have been assigned by a notified body. It means that this item:
  - meets all main requirements stated by the directive 89/686/CEE, in agreement with the Personal Protection Equipments.
  - Indicates that the clothes are submitted to antistatic treatments and offer an electrostatic protection in accordance with the norm EN 1149-1.
  - Indicates the compliance with the EU Norm ruling the chemical protection clothes.
5. This pictograms indicates the chemical protection clothes are in accordance with EU standards.
6. The pictogram "open book" encourages to read the "use conditions"
7. The size pictogram that gives the codes' equivalences generally used. Choose your size and the cloth corresponding to the codes.
8. The 5 pictograms in accordance with maintenance are the following ones:
  - Do not wash. Washing might alter protection performances of the garment (particularly in wiping its antistatic properties.)
  - Do not tumbledry in machine
  - No dry cleaning
  - Do not iron
  - Inflammable. Keep away from flames or any source of intensive heat.
9. garment which has been submitted to antistatic treatments and which offers an electrostatic protection.

# SPECIFIKACIJE I KORIŠTENJE

**KAKO I KADA SE KORISTE KECELJE I KOMBINEZONI OD POLI-PROPILENA?**

Radna odeća od polipropilena je lagana i udobna, predviđena za kratkoročnu upotrebu i pruža dobru zaštitu. Trajanje ove odeće varira u zavisnosti od debljine. Jedan sloj polipropilena za kombinezon SPP i tri sloja za jednu SMS. Koriste se u poljoprivredno-prehrambenoj industriji, ugostiteljstvu, hemijskoj industriji i u poljoprivredi. Takođe, ova odeća se koristi za sve poslove čišćenja, farbanja, kao i u farmaciji i bolnicama.

# SPECIFICATIONS AND USE

**HOW AND WHEN TO USE OVERALLS AND COVERALLS MADE OF POLYPROPYLENE?**

Working polypropylene clothes are light and comfortable, for short-term use which provide good protection. Their lifetime varies according to the thickness of the cloth. A single polypropylene layer for a SPP overall and three layers for a SMS overall. They are used in the agri-food industry, hospitality industry, chemical industry and agriculture. Also, the clothing can be used for all cleaning jobs, painting, as well as pharmacy and hospitals.

## INDUSTRIJA PRIMENE INDUSTRY APPLICATION

Poljoprivreda  
Agricultural industry  
(low concentrated inorganic products)

Farmaceutska industrija  
Pharmaceutical fields

Industrija  
Industrial maintenance

Catering  
Catering

Bojenje  
Painting

Čišćenje  
Cleaning

Higijena  
Hygiene

Zdravstvo (infektivni agensi)  
Hospital fields (infectious agents)

Rad s azbestom  
Works in asbestos fields (Level 1: light interventions)

Prehrambena industrija  
Food-processing industry

Posetioci  
Visitor

Radioaktivne i hemijske čestice  
Radioactive and chemical particles

Industrija gnojiva  
Fertilizer industry

Mehanički radovi  
Mechanical work

Poljoprivreda / vrtlarstvo  
Work in wet fields

Hemijska industrija  
Chemical industry

Kompatibilno s HACCP pristupom  
Can be integrated into a HACCP approach

Visokokvalitetni proizvodi nastali kao rezultat razvoja, inovacije i dugogodišnjeg iskustva.  
High-quality products resulting from development, innovation and years of experience.

Artikl je prilagođen maloprodaji  
The item is customized to retail

| TD/TIDY | SPP® ZAŠTITNI MANTIL S KLASIČNIM OVRATNIKOM | 41103 | 41104 | 41105 |
|---------|---|-------|-------|-------|
|         | SPP® PROTECTIVE COAT WITH CLASSIC COLLAR    | 41113 | 41114 | 41115 |

**Materijal:** polipropilen SPP®, 40 g/m2  
**Boja:** bela  
**Kragna:** klasična  
**Džepovi:** 2, ili bez džepova  
**Zatvaranje:** 4 metalna drikera  
**Rukavi:** završetak s gumicom  
**Pakovanje:** 1/50  
\*model sa džepovima dostupan i sa zatvaranjem na čičak

**Material:** polypropylene SPP®, 40 g/m2  
**Colour:** white  
**Collar:** classic  
**Pockets:** 2 or without  
**Fastener:** 4 snap fasteners  
**Cuffs:** tightening elastic  
**Packing:** 1/50  
\*modell with pockets available with fastening

**TD/TIDY MANTIL ZA POSETIOCE VISITORS COAT 41214**

**Materijal:** polietilen  
**Boja:** bela  
**Debljina:** 20 mikrona  
**Kragna:** klasičan  
**Zatvaranje:** 3 drikera  
**Veličina:** univerzalna  
**Pakovanje:** vrećica sa 100 kuta, u kartonu 4 vrećice

**Material:** polyethylene  
**Colour:** white  
**Thickness:** 20 microns  
**Collar:** classic  
**Fastener:** 3 snap fasteners  
**Size:** one size  
**Packing:** tightning elastic  
**Packing:** polybags with 100 coats, carton with 4 polybags

**TD/TIDY KOMPLET ZA POSETIOCE VISITORS KIT 41300**

**Komplet za posetioce uključuje:**  
Jedan MANTIL ZA POSETIOCE  
Jedna bela jednoslojna PAPIRNA MASKA Jedna bela JEDNOKRATNA KAPA  
Jedan par plavih JEDNOKRATNIH NAVLAKA  
**Veličina:** univerzalna  
**Pakovanje:** Kutija sa 100 kompleta - Karton sa 4 kutije

**Visitors kit including:**  
One VISITOR COAT  
One white ply PAPER-MASK  
One white BOUFFANT CAP  
One pair blue SHOE COVERS  
**Size:** One size  
**Packing:** Box with 100 kits - Carton with 4 boxes

upper resistance to cuts
- ESD** elektrostatičko pražnjenje  
Electrostatic Discharge

### STANDARDI

Danas se za zaštitne i radne cipele koriste norme EN ISO 20345 i EN ISO 23047. Potrebno je naglasiti da su na tržištu i dalje prisutni artikli potvrđeni starim normama EN345 i EN347. CE tip pregleda nema rok trajanja, tako da čak i artikli stari npr. 10 godina mogu da prodaju ukoliko su identični sertifikovanom artiklu i ukoliko se označavanje nije promenilo.

### EN ISO 20345

Specifikacija za zaštitnu obuću za profesionalnu upotrebu. Ovaj standard se primenjuje zajedno sa standardom EN ISO 20344, osnovnim i dodatnim zahtevima zaštitne radne obuće. Radna cipela koja udovoljava zahtevima baziranim na specifičnim nivoima rizika (eventualnih padajućih objekata, potencijalnih nezgoda u radnom okruženju...); štiti od udarca jačine 200 J.

### EN ISO 20347

Specifikacija za zaštitnu obuću za profesionalnu upotrebu. Radna cipela koja ispunjava specifične zahteve zaštitne cipele, bez čelične kapice.

## EN ISO 20347

**O1**   
**O2**   
**O3** 

Prirodni i sintetički polimeri  
Natural and synthetic polymers

**O4**   
**O5** 

### STANDARDS

Today, the standardization of safety shoes and working shoes is made according to the new standards EN ISO 20345 and EN ISO 20347. It must however be noted that products certified according to the old standards EN345 and EN347 are still available on the European market. A CE Type Examination certificate does not have a limit of validity. So even a product certified for example 10 years ago can still be sold as long as it is identical to the certified product and that the marking has not been modified.

### EN ISO 20345

Specifications for safety footwear for professional use. This standard defines, in reference to the EN ISO 20344 standard, the fundamental and additional (facultative) requirements for safety footwear for professional use. This footwear includes the necessary safety device to protect the wearer's toes against risk of injury from falling objects and accidents which could occur in industrial environments. Protects against crushing impacts with a protection provided on 200 Joules.

### EN ISO 20347

Specifications for work footwear for professional use. This footwear is different from safety footwear by the fact that these do not have toe caps against injury from falling objects or crushing impacts.

# SPECIFIKACIJE SPECIFICATIONS

Zaštitna kapica  
Toecap

Provetrenost gornjeg dela  
Breathable upper

Otpornost na niske temperature  
Warm lining

Zatvorena peta  
Closed backpoint

### ANTISTATIČNA OBUĆA

Antistatična obuća koristi se za smanjenje elektrostatičnosti. Potrebno je naglasiti da antistatična obuća ne garantuje adekvatnu zaštitu protiv struje. Ako udar od strujenije u potpunosti eliminisan, neophodna je dodatna zaštita.

### ANTISTATIC FOOTWEAR

Antistatic footwear should be used if it is necessary to minimize electrostatic build-up by dissipating electrostatic charges, thus avoiding the risk of spark ignition of, for example flammable substances and vapours, and if the risk of electric shock from any electrical apparatus or live parts has not been completely eliminated. It should be noted, however, that antistatic footwear cannot guarantee an adequate protection against electric shock as it introduces only a resistance between foot and floor. If the risk of electric shock has not been completely eliminated, additional measures to avoid this risk are essential.

# OSETITE UDOBNOST FEEL THE COMFORT

Udobnost je inspirisala osnovnu zaštitu Base cipela. Fabrika proizvodi sigurnosnu obuću kombinujući tehnologije i funkcionalne zahteve, da odgovore na profesionalne zahteve klijenata. Aktivnost istraživanja i razvoja dovela je do različitih patenata koji čine da cipelu želite da nosite čak i nakon posla. Dodatna vrednost firme je briga za životnu sredinu. Eko održivost, udobnost, tehnologija i efikasnost su kamen temeljac firme.

Dry'n Air Plus je ugrađeni sistem vazdušnih kanala u kombinaciji s balističkim tekstilom otpornim na probijanje, koji upotrebljava "Venturi efekt" sa cirkulacijom vazduha ispod stopala.

AirTech + Tpu-Skin Sun: don protiv umora. Ekskluzivna tehnologija, koja omogućava smanjenje tvrde i kompaktne debljine spoljne površine s rezultatom udobnosti i elastičnosti.

LifePlus tehnologija poboljšava prijanjanje i smanjuje oštećenja na donu u radnim okruženjima sa prisutnošću vode/tečnosti (poljoprivredna, hemijska i farmaceutska industrija).

Podstava 100% antibakterijski SmellStop: podstava protiv neugodnih mirisa koja sprečava bakterije i gljivice, (odgovorne za mirise), da se ne zadržavaju u cipelama.

Metal-free – nemetalna kapica SlimCap: lagana, fleksibilnija od metalne, ne-magnetski i toplotno izolovana, garantuje više udobnosti.

Comfort inspired Base Shoe Base protection The Company produces safety shoes by combining technology and functional requirements, to respond to professional client requests. R & D activity led to various patents that make the shoe desirable to wear even after work. The added value of the company's attention to the environment. Eco-sustainability, comfort, technology and efficiency are the cornerstone of the company.

Dry'n Air Plus is a built-in air canal system combined with ballistic textile puncture-resistant, which uses the 'Venturi effect' for the air circulation below the foot.

AirTech + Tpu-Skin Sole: the real antifatigue sole. An exclusive technology, patented by Base Protection, which allows to reduce the outsole's hard and compact thickness, up to values never obtained before. The result is: more elasticity and cushion effect.

LifePlus technology improves grip and reduces the sole damage in work environments characterized by the presence of water based liquids (agrifood, chemical and pharmaceutical industries).

Lining 100% antibacterial SmellStop: anti-odor lining that prevents Bacteria and Fungus, responsible for odors, from taking hold anywhere in your shoes. With SmellStop the foot remains healthy.

Metal-free toe-cap SlimCap: light, more flexible than metal toe-cap, non magnetic and thermal insulated. It guarantees more comfort without giving up to a cool design.

# ATG INTELIGENTNA REŠENJA RUKAVICA

# ATG ADVANCED TECHNOLOGY GLOVES

# ATG INTELIGENTNA REŠENJA RUKAVICA

## Inteligentna rešenja rukavica kroz inovativne tehnologije

Tehnologije korišćene u ATG rukavicama kontinuirano se razvijaju u užem timu koji kombinuje istraživanja tržišta i marketing analizu s najnovijim tehnološkim dostignućima. To je temelj na kojem se kontinuirano poboljšava iskustvo kupca kroz stalne inovacije.

R & D odsek fokusira se na razvoj tehnoloških platformi. Ovaj pristup omogućava im sagledavanje potreba kupaca na čemu se zasniva odabir i kombinacija potrebnih tehnoloških platformi za proizvodnju inovativnih rukavica koje menjaju korisničko iskustvo na bolje.

### ATG Rukavice

ATG® nudi fokusirani spektar proizvoda za profesionalce. ATG ClassicRange i ATG ProRange™ koji s četiri robne marke i 10 proizvoda pokriva 90% poslova kojima se bavite, bilo da ste u metaloprerađivačkom, montažnom, petro-hemijskom ili off-shore poslovanju.

## Intelligent glove solutions through innovative technologies

The technologies utilized in ATG gloves are continuously developed by a core team that matches market research and marketing analysis with the latest technological developments. This forms the foundation upon which we continually improve the customer's experience through constant innovation.

R&D facility focuses on developing technology platforms. This approach enables them to look at the customer needs and then to pick and combine the necessary technology platforms to produce innovative gloves that change the customer experience for the better.

### ATG Gloves

ATG® offers a focused range of products for professionals. ATG ClassicRange and ATG ProRange™ with four brands and 10 products covers 90% of the work you do if you're in the metal fabrication, assembly, petro-chemical or off-shore business.

## ATG® Tehnološke platforme

- AIRtech®**
  - 360° provetrenost
  - Toplina se raspoređuje prirodno
  - Hladne ruke su sretnije, sigurnije i produktivnije

- ERGOtech®**
  - 25% tanje od većine rukavica od penastog nitrila na tržištu
  - Dvostruka izdržljivost u poređenju s drugim rukavicama od poliuretana ili penastog nitrila na tržištu

- DURAtech®**
  - Oblik, prijanjanje i osećaj oponašaju "ruku u mirovanju"
  - Konzistentna propusnost postave

- CUTtech®**
  - Inovativna vlakna
  - Pojačanje između palca i kažiprsta

- GRIPtech®**
  - Optimizirani zahvat
  - Smanjeni zamor ruke
  - Spretnost i fleksibilnost

- LIQUIttech®**
  - Odbijanje tečnosti
  - Visoka otpornost na hemikalije
  - Zaštite svoje ruke

- THERMtech®**
  - Zahvaljujući tehnologiji podstavljanja i bešavnog pletenja, tu su toplinska i izolacijska svojstva da bi se razvila otpornost na vrućinu ili hladnoću

**HandCare®** tehnologija može se videti na nivou MaxiFlex® Active™ range. Ovaj postupak hladi, osvežava i vitalizuje ruke vitaminom E i aloe verom.

**Sanitized®** (triklosana) higijenska funkcija deluje kao ugrađeni dezodorans koji odeću duže održava svežom i donosi osećaj sigurnosti i zaštićenosti.

Sve naše rukavice su sertifikovane s Oeko-Tex® 100®, što je priznati međunarodni standard koji garantuje da su rukavice "prilagođene koži".

Sve komponente i sastojci korišćeni u proizvodnji i izradi ATG® proizvoda ispitani su i usklađeni po Evropskoj direktivi R.E.A.C.H., EC # 1907/2006 (registracija, evaluacija, autorizacija i ograničavanje hemikalija).

**AD-APT®** - najinteligentniji način održavanja ruka u rukavicama suhim, hladnim i produktivnim. **31% SMANJENO ZNOJENJE U ODNOSU NA STANDARDNE RUKAVICE** AD-APT® tehnologija hladi ruke i smanjuje znojenje, ona ne utiče na prirodnu sposobnost tela da reguliše svoju temperaturu, odnosno termoregulaciju.

# MaxiFlex® s AD-APT® 31 % SMANJENO ZNOJENJE U ODNOSU NA STANDARDNE RUKAVICE

Osmišljene i razvijene kao prozirne rukavice, MaxiFlex® Ultimate™ rukavice postale su merilo za precizno rukovanje u suvim okruženjima.

Sada naše jedinstvene rukavice MaxiFlex® postaju još bolje zahvaljujući uključivanju nove tehnologije AD-APT® firme ATG®.

Ako se vaše ruke ikada zagreju u rukavicama ili su se u njima znojile, onda su MaxiFlex® Ultimate™ rukavice s ugrađenom tehnologijom All Day Anti Perspirant (AD-APT®) kao stvorene za vas.

AD-APT®- najinteligentniji način održavanja ruke u rukavicama suvim, hladnim i produktivnim.

Pređite na bolje!

## ATG MAXI FLEX® ULTIMATE™ 34-874

**Opis:** Rukavica za precizno rukovanje u suvom okruženju, ultra lagane obložene nitrilnom mikropenom;  
**Dlan:** debljina 1mm, premazan nitrilnom mikropenom, bez silikona;  
**Dužina:** 25cm;  
**Boja:** tamnosivo-crna;  
**Svojstva i prednosti:** AIRTech®, DURATech®, ERGOTech®  
**Primena:** DIY, dorada i inspekcija, vrtlarstvo, rukovanje sitnim delovima, primarna, sekundarna i završna obrada i montaža, održavanje, logistika i skladištenje, upotreba alata i instrumenata, precizna mehanika, opšte rukovanje;  
**Dostupne veličine:** 5-12;  
**Standardi (norme):** EN420, EN388 4131;

**Description:** Gloves for precision handling in dry environments, ultra lightweight coated nitrile microfoam;  
**Palm:** 1 mm thickness, coated with Nitrile micro foam, silicone free;  
**Length:** 25cm;  
**Color:** dark gray-black;  
**Features and benefits:** AIRTech®, DURATech®, ERGOTech®  
**Application:** DIY, dressing and inspection, gardening, handling small parts, primary, secondary and finishing and installation, maintenance, logistics and storage, the use of tools and instruments., precision engineering, general handling;  
**Available sizes:** 5-12;  
**The standards (standard):** EN420, EN388 4131;

## ATG MAXIFLEX ENDURANCE AD AP® 42-844 42-844BL

**Opis:** Rukavica za precizno rukovanje u suvom okruženju napravljena od najlon pletiva sa likrom i doradna AD-APT tehnologijom, izrada bez šavova;  
**Dlan:** debljina 1,10mm, premazan nitrilom sa granulama;  
**Dužina:** 25cm;  
**Boja:** tamnosivo-crna;  
**Svojstva i prednosti:** AD-APT®, AIRTech®, DURATech®, ERGOTech®  
**Primena:** DIY, dorada i inspekcija, vrtlarstvo, rukovanje sitnim delovima, primarna, sekundarna i završna obrada i montaža, održavanje, logistika i skladištenje, upotreba alata i instrumenata, precizna mehanika, opšte rukovanje;  
**Dostupne veličine:** 5-12;  
**Standardi (norme):** EN420, EN388 4131;

**Description:** Gloves for precision handling in dry environments made of nylon twists with LICR and refined AD-APT technology, production of seamless;  
**Palm:** 1,10 mm thickness, coated with nitrile and with granules;  
**Length:** 25cm;  
**Color:** dark gray-black;  
**Features and benefits:** AD-APT®, AIRTech®, DURATech®, ERGOTech®  
**Application:** DIY, dressing and inspection, gardening, handling small parts, primary, secondary and finishing and installation, maintenance, logistics and storage, the use of tools and instruments, precision engineering, general handling;

CE EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;

**Opis:** Jednokratne zaštitne nesterilne rukavice sa puderom;  
**Materijal:** latex, sa puderom; Boja: krem boja;  
**Manžetna:** ivica sa porubom; Dužina: 24 cm;  
**Karakteristike:** visoka taktalna osetljivost;  
**Preporučena područja upotrebe:** nega bolesnika, dentalna medicina, veterinarska medicina, saloni lepote, kontakt sa hranom, kućna radinost;  
**AQL:** 1,5 u skladu sa ISO 2859-1;  
**CE klasifikacija:** Klasa 1 - Medicinski proizvodi(93/42/EEC) Kategorija I - lična zaštitna oprema za minimalne rizike;  
**Norma:** EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;  
**Dostupne veličine:** XS - XL;  
**Pakovanje:** kutija od 100 komada;

**Description:** Protective and examination non sterile gloves, powdered;  
**Material:** latex, powdered;  
**Colour:** cream;  
**Cuff:** beaded;  
**Length:** 24 cm;  
**Distinctive features:** enhanced tactile sensitivity;  
**Recommended for:** nursing care, dentistry, veterinary medicine, beauty and hairdressing salons, food contact, minor assembly works, houseworks;  
**AQL:** 1,5 in accordance with ISO 2859-1;  
**CE classification:** Class I - Medical Device, Category I - Personal Protective Equipment;  
**Norm:** EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;  
**Avialable sizes:** XS - XL;  
**Packing:** box with 100 gloves;

CE EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;

**Opis:** Jednokratne zaštitne nesterilne rukavice sa puderom;  
**Materijal:** latex, sa puderom;  
**Boja:** plava;  
**Manžetna:** ivica sa porubom;  
**Dužina:** 24 cm;  
**Karakteristike:** boja odobrena i preporučena za kontakt sa hranom;  
**Preporučena područja upotrebe:** nega bolesnika, dentalna medicina, veterinarska medicina, kontakt sa hranom;  
**AQL:** 1,5 u skladu sa ISO 2859-1;  
**CE klasifikacija:** Klasa 1 - Medicinski proizvodi(93/42/EEC), Kategorija I - lična zaštitna oprema za minimalne rizike;  
**Norma:** EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;  
**Dostupne veličine:** XS - XL;  
**Pakovanje:** kutija od 100 komada;

**Description:** Protective and examination non sterile gloves, powdered;  
**Material:** latex, powdered;  
**Colour:** blue;  
**Cuff:** beaded;  
**Length:** 24 cm;  
**Distinctive features:** colour approved for food contact;  
**Recommended for:** nursing care, dentistry, veterinary medicine, food contact;  
**AQL:** 1,5 in accordance with ISO 2859-1;  
**CE classification:** Class I - Medical Device, Category I - Personal Protective Equipment;  
**Norm:** EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;  
**Avialable sizes:** XS - XL;  
**Packing:** box with 100 gloves;

**Opis:** Jednokratne zaštitne nesterilisane rukavice bez pudera;  
**Materijal:** latex, bez pudera;  
**Boja:** krem;  
**Manžetna:** ivica sa porubom;  
**Dužina:** 24 cm;  
**Karakteristike:** jednostavne za upotrebu;  
**Preporučena područja upotrebe:** za rad u laboratoriju, industrija nameštaja, dijagnostika, saloni lepote, nega bolesnika, dentalna medicina, veterinarska medicina, kontakt sa hranom;  
**AQL:** 1,0 u skladu sa ISO 2859-1;  
**CE klasifikacija:** Klasa 1 - Medicinski proizvodi(93/42/EEC), Kategorija III - lična zaštitna oprema;  
**Norma:** EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420, EN388;  
**Dostupne veličine:** XS - XL;  
**Pakovanje:** kutija od 100 komada;

**Description:** Protective and examination non sterile gloves, powder free;  
**Material:** latex, powder free;  
**Colour:** cream;  
**Cuff:** beaded;  
**Length:** 24 cm;  
**Distinctive features:** easy donning;  
**Recommended for:** laboratories, furniture industry, diagnostics, nursing care, beauty salons, dentistry, veterinary medicine, food contact;  
**AQL:** 1,0 in accordance with ISO 2859-1;  
**CE classification:** Class I - Medical Device, Category III - Personal Protective Equipment;  
**Norm:** EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420, EN388;  
**Available sizes:** XS - XL;  
**Packing:** box with 100 gloves;

CE EN 455-1, EN455-2, EN455-3, EN455-4, EN980, EN1041, EN ISO 13485, EN374-1, EN374-2, EN420;

**Opis:** Jednokratne zaštitne nesterilisane rukavice bez pudera;  
**Materijal:** latex, bez pudera;  
**Boja:** tamno plava;  
**Manžetna:** ivica sa porubom;  
**Dužina:** minimalno 30 cm;  
**Karakteristike:** visok nivo zaštite  
**Preporučena područja upotrebe:** high risk procedure, hitna služba, za hitne intervencije, industrija nameštaja, dijagnostika, nega bolesnika, dentalna medicina, veterinarska medicina, kontakt sa hranom, kućna radinost; AQL: 1,5 u skladu sa ISO 2859-1;  
**CE klasifikacija:** Klasa 1 - Medicinski proizvodi(93/42/EEC), Kategorija III - lična zaštitna oprema;

OPREMA ZA VISINSKE RADOVE HEIGHT SAFETY EQUIPMENT

Kompanija KRATOS SAFETY i istoimeni brand, osnovana je 2011. godine i jedna je od najbrže rastućih firmi za proizvodnju visokokvalitetne zaštitne oprema za visinske radove sa sedištem u Francuskoj.

KRATOS SAFETY je vertikalno organizovana kompanija koja svaki i najmanji deo koji je ugrađen u proizvode izrađuje u sopstvenim fabrikama smeštenim u Indiji:

- tkanje svih tekstilnih delova koji su ugrađeni u opremu
- Izradu užadi
- izradu svim metalnih i nemetalnih komponenti od kojih se sastoji pojedini proizvod
- sklapanje proizvoda
- dvostruko testiranje svakog proizvoda

Upravo vertikalna organizacija kompanije KRATOS SAFETY omogućava da su sve faze proizvodnje pod strogim nadzorom i kontrolom a što je izuzetno važno s obzirom da zaštitna oprema za visinski rad spada u ličnu zaštitnu opremu kategorije III- smrtni rizici.

Lična zaštitna oprema KATEGORIJE III je namenjena zaštiti od smrtnih opasnosti ili rizika nepovratnog zdravstvenog oštećenja. Proizvodi kompanije KRATOS SAFETY izrađeni od najkvalitetnijih materijala uz neprekidno usavršavanje i inovacije koje rezultiraju kontinuiranim plasmanom na tržište kako novih proizvoda, tako i usavršavanjem postojećih. U asortimanu se nalazi preko 400 različitih proizvoda svrstanih u 8 grupa. KRATOS SAFETY oprema za visinski rad uspešno se prodaje širom sveta u više od 40 zemalja.

The company KRATOS has been in existence since 2011 and is one of the fastest growing companies to produce high quality protective equipment for height work. The headquarters of the company are in France, a factory located in India. A company is vertically organized that literally produces every piece of equipment in its own factories

- Weaving of all textile parts that are incorporated in the equipment
- Making ropes
- Making all metal and non-metallic components from which each product consists
- Making the product
- Duplicate testing of each product

The vertical organization of the company enables all stages of production to take place under strict supervision and control, which is of particular importance since high performance protective equipment is a category III mortal risk. Personal Protective Equipment CATEGORIES III is intended to protect against death or the risk of irretrievable health damage. Their products are made of the highest quality materials with continuous training and innovation that result in the launch of new products or improvements to the existing market every year. They have a total of around 200 different products in 8 groups. KRATOS is sold in over 40 countries worldwide.

**Svi proizvodi su u skladu sa EU direktivom 89/686/CEE koja propisuje zdravstvene i sigurnosne zahteve koje lična zaštitna oprema mora ispunjavati i sertifikovani su po pripadajućim normama.**

**All products comply with EU Directive 89/686 / EEC which prescribes the health and safety requirements for personal protective equipment to be met and certified according to the relevant standards**

Unutar propisa donešene su dve evropske smernice koje pokrivaju sigurnost na radu:

I Direktiva 89/656 / CEE od 30. novembra 1989, koja pokriva upotrebu opreme za ličnu zaštitu (PPE), (za korisnike).

I Direktiva 89/686 / CEE od 21. decembra 1989., koja pokriva dizajn OZO, (za proizvođače). Izraz PPE (Personal Protection Equipment) / LZO (Lična Zaštita Oprema) označava „bilo koji uređaj ili sredstva namenjena da se nose ili drže osobu da je zaštite od jednog ili više rizika koji bi mogli ugroziti njeno zdravlje ili sigurnost na radnom mestu, i bilo koji dodatni pribor namenjen za tu svrhu“. Direktiva 89/686 / CEE određuje kategorizaciju LZO. Dakle, za svaku od sledećih kategorija LZO određuje postupke sertifikovanja i tehnička pravila koje oprema mora zadovoljiti.

\* Tip I LZO: manji rizici (namenjeni zaštiti od površinskih povreda). Proizvođač ima CE sertifikat. On izjavljuje da, kada je nova, LZO odgovara zahtevima direktive. Njegova lična odgovornost je uključena. Proizvod je potom označen CE.

\* Tip II LZO: Srednji rizici (namenjeni za zaštitu od mehaničkih, toplinskih i hemijskih rizika). Proizvođač podnosi zahtev za CE inspekciju, praćen tehničkom dokumentacijom LZO na jedna od 80 obaveštenih evropskih laboratorija, koja nastavlja s nizom testova i dodeljuje EC sertifikat za ispitivanje tipa (TEC) ako LZO odgovara zahtevima.

\* Tip III LZO: smrtna opasnost (namenjena zaštiti od smrtno opasnosti ili rizika nepovratne zdravstvene štete).

Proizvođač ima izbor za nadzor proizvodnje svog proizvoda između završenog CE sistema osiguranja proizvoda (11A) ili sistem osiguranja kvaliteta s nadzorom proizvodnje (11B). Pre toga morao je obaviti isti postupak kao i za LZO TIP II - srednji rizici LZO namenjena zaštiti od pada s visina pripadaju kategoriji III. CE oznaka odnosi se na sve tri kategorije. Proizvodi overeni na ovaj način nose oznaku CE, a za kategoriju III sledi broj prijavljenog tela kojim se rukovodi kontrola kvaliteta. Za svaki sertifikovani proizvod proizvođač isporučuje korisnička uputstva sa svojim imenom i adresom, skladištenjem, korišćenjem i uputstvom za održavanje, preporučeno vreme upotrebe i značenje oznaka. Sve ove specifikacije su propisane prethodno navedenim "usklađenim" EN standardima.

Within the regulations, two European Directives covering workplace safety have been adopted:

I Directive 89/656/CEE of 30 November 1989, covering the use of Personal Protection Equipment (PPE), (for users):

I Directive 89/686/CEE of 21 December 1989, covering the design of PPE, (for manufacturers). The term PPE (Personal Protection Equipment) signifies "any device or means intended to be worn or held by a person to protect them from one or more risks likely to threaten their health or their safety in the workplace, and any addition or accessory intended for this purpose".

Directive 89/686/CEE determines the categorisation of PPE. Hence, for each of the following categories of PPE, it lays down the certification procedures and technical rules which the equipment must satisfy to benefit from free circulation within the European Union:

\* Type I PPE: Minor risks (intended to protect against superficial injuries). The manufacturer does a CE self-certification. He declares that, when new, the PPE conforms to the requirements of the directive. His personal responsibility is engaged. The product is then marked CE.

\* Type II PPE: Intermediate risks (intended to protect against mechanical, thermal and chemical risks). The manufacturer makes an application for a CE inspection, accompanied by the technical file of the PPE to one of the 80 notified European laboratories, which proceeds with a series of tests and studies the file with a view to attributing an EC Type-Examination Certificate (TEC) if the PPE conforms to the requirements.

\* Type III PPE: Mortal danger (intended to protect against mortal danger or risks of irreversible health damage). The manufacturer has the choice for the surveillance of the manufacture of his product between the CE finished product guarantee system (11A), or the CE quality assurance system with production monitoring (11B). Previous to this he should have performed the same process as for intermediate risk PPEs. PPEs intended for protection against falls from heights all belong to Category III. CE marking applies to all three categories. Products certified in this way carry CE marking, followed, for category III, by the number of the notified body handling the quality control. For every certified product, the manufacturer supplies user instructions providing his name and address, storage, use and maintenance instructions, a recommended use-by-date and the meaning of the markings. All these specifications are stipulated in the previously listed "harmonised" EN standards.

| NORMA / STANDARD     | OPIS/ DESCRIPTION   |
|----------------------|---|
| EN341                | "Spasilački uređaji za spuštanje/ Rescue descender devices "  |
| EN353-1              | Zaustavljanje pada s vodilicom uključujući krutu sidrenu liniju/ Guided type fall arresters including a rigid anchor line   |
| EN353-2              | Zaustavljanje pada s vodilicom uključujući fleksibilnu sidrenu liniju/ Guided type fall arresters including a flexible anchor line  |
| EN354                | Užad / Lanyards   |
| EN355                | Apsorberi energije / Energy absorbent   |
| EN358                | Pojasevi za pozicioniranje i zadržavanje radne pozicije i užad za pozicioniranje / Belts for work positioning and restraint and work positioning lanyards restraint               |
| EN360                | Uređaji za zaustavljanje pada s automatskim povlačenjem/ Retractable fall arresters   |
| EN361                | Uprtači za telo/ Full body harnesses  |
| EN362                | Spone, konektori (karabini)/ Connectors   |
| EN567                | Planinarska oprema - Hvataljke za uže/ Mountaineering equipment - Rope clamps   |
| EN795 Classe B       | Sidreni uređaji/ Anchor devices   |
| EN795 Classe A-C-D-E |   |
| EN813                | Pojasevi za bedra / sedni pojasevi/ Sit harnesses   |
| EN1496               | Uređaji za podizanje kod spašavanja/ Rescue lifting devices   |
| EN1497               | Užad za spašavanje/ Rescue loops  |
| EN1498               | Uprtač za spašavanje/ Rescue harnesses  |
| EN1891               | Kermantl uže sa niskim nivoom rastegljivosti/ Low stretch Kernmantle rope   |
| EN12 278             | Remienici - Sigurnosni zahtevi i metode ispitivanja/ Pulleys - Safety requirements and test methods   |
| EN12 841             | Pristupni sistemi - uređaji za podešavanje konopa/ Access system - rope adjustment devices  |
| EN 471               | Odeća za visoku vidljivost za profesionalnu upotrebu/ High visibility warning clothing for professional use   |
| EN696                | Užad za opšte namene - poliamidna/ Fiber ropes for general service - Polyamide  |
| EN1149-1             | Zaštitna odeća - Elektrostatična svojstva - Površinska otpornost/ Protective clothing - Electrostatic properties - Surface resistivity  |
| EN13463              | Ne-električna oprema za upotrebu u potencijalno eksplozivnim atmosferama/ Non-electrical equipment for use in potentially explosive atmospheres                                   |
| ISO9150              | Zaštitna odeća - Sposobnost materijala u kontaktu s malim prskanjem rastaljenog metala/ Protective clothing - Ability of materials in contact with small splashes of molten metal |
| ISO15025             | Zaštitna odeća - Zaštita od toplote i plamena/ Protective clothing - Protection against heat and flames   |

## OPŠTA NAČELA ZA VISINSKE RADOVE/ THE GENERAL PRINCIPLES OF WORKING AT HEIGHT

|   |   |
|---|---|
| <p>Lična zaštitna oprema bi trebalo da sekoristi samo kada kolektivni sistem zaštite ne može biti postavljen na radno mesto ili privremeno za obavljanje posla.</p>   | <p>Personal protection should only be used when collective protection cannot be installed on a site or for a temporary action limited in time.</p>  |
| <p>Lična zaštita od pada s visine zahteva tri neodvojive komponente:</p>  | <p>Personal protection against falls from height has the particularity of requiring three inseparable components:</p>   |
| <p>* Sistem za držanje tela,</p>  | <p>*A body holding system,</p>  |
| <p>* Sisteme za povezivanje i sprečavanje pada</p>  | <p>*Fall prevention linking,</p>  |
| <p>* Sidreni sistem.</p>  | <p>*An anchorage system.</p>  |
| <p>Zavisno od konfiguraciji nadzemnih radova, može se koristiti nekoliko metoda a time i vrsta opreme za zaštitu i prevenciju od pada:</p>  | <p>Depending on the overhead work configurations several working methods, and hence types of equipment, may be used:</p>  |
| <p><b>PREVENCIJA OD PADA S PLATFORME:</b> svrha ove radne metode je da se spreči da radnik dođe do područja gde postoji mogućnost pada s visine.<br/><b>Osnovna oprema za upotrebu:</b> oprema koja se koristi na platformi je uprtač ili pojas + uže + sidrište<br/><b>Standardi koji se odnose na ovu upotrebu:</b> EN361; EN358; EN354; EN795; EN362</p>   | <p><b>WORK STATION PREVENTION:</b> The purpose of this work method is to prevent the worker from reaching an area where there is a risk of a fall from a height.<br/><b>Basic equipment to be used:</b> Work station holding harness or belt + Lanyard + Anchorage<br/><b>Standards concerned:</b> EN361; EN358; EN354; EN795; EN362*</p>   |
| <p><b>POZICIONIRANJE NA PLATFORMU:</b> Svrha ove metode je da se radniku dopusti slobodno i sigurno kretanje i držanje na mestu dok su mu ruke slobodne za obavljanje posla (npr. na stubu) U ovoj radnoj situaciji, važno je razlikovati da li postoji rizik od padanja. Ako postoji osnovna radna stanica koja drži opremu treba koristiti sistem zaštite protiv pada.<br/><b>Osnovna oprema za upotrebu:</b> Držač za radnu stanicu s pojansom za remenje ili radnom stanicom + Držač radne stanice + Sidrište<br/><b>Standardi koji se odnose na ovu upotrebu:</b> EN361; EN358; EN795; EN362</p> | <p><b>WORK STATION HOLDING:</b> The purpose of this work method is to allow a worker to move about freely in safety and to hold them in position while leaving their hands free to do the work (e.g., on a pylon) In this work situation, it is important to distinguish whether or not there is a risk of falling. If there is, the basic work station holding equipment should be used with a fall prevention protection system.<br/><b>Basic equipment to be used:</b> Work station holding harness with belt or work station holding belt + Work station holding lanyard + Anchorage<br/><b>Standards concerned:</b> EN361; EN358; EN795; EN362</p>                       |
| <p><b>PREVENCIJA KOD PADA:</b> Svrha ove metode rada je držanje radnika tokom pada i njegovo zadržavanje u najboljim uslovima dok čeka pomoć. Efikasan sistem zaustavljanja pada bi trebalo da smanji visinu pada što je više moguće,apsorbuje što više energije i smanji sile koje deluju na ljudsko telo.<br/><b>Osnovna oprema za upotrebu:</b> Preklopka za sprečavanje ispadanja + Uređaj za sprečavanje pada + Tačka sidrenja<br/><b>Standardi koji se odnose na ovu upotrebu:</b> EN361; EN353-1, EN 353-2; EN355; EN360; EN795; EN362;</p>  | <p><b>FALL PREVENTION:</b> The purpose of this work method is to hold the worker during a fall and to hold them suspended in the best conditions while awaiting help. An efficient fall arrest system should reduce the height of the fall as much as possible, absorb as much energy as possible to reduce the forces applied to the human body and hold the person suspended while reducing the forces due to the inert (or not) position of a person in their harness.<br/><b>Basic equipment to be used:</b> Fall prevention harness + Fall prevention device + Anchorage point.<br/><b>Standards concerned:</b> EN361; EN353-1, EN 353-2; EN355; EN360; EN795; EN362</p> |
| <p><b>RAD U ZATVORENIM PROSTORIMA:</b> Ova metoda rada omogućava radniku ulazak u rezervoare, kanalizaciju, silose, itd., i mogućnost da bi se u bilo kom trenutku mogao podići odozgo. Zato je neophodno da je druga osoba na raspolaganju za ovu operaciju.<br/><b>Osnovna oprema za upotrebu:</b> uprtač za sprečavanje pada + spojni sistem + sistem podizanja (vitlo, itd.) + sidrište (tronožac, vešala, itd.)<br/><b>Standardi koji se odnose na ovu upotrebu:</b> EN361; EN360 + EN1496; EN795; EN362</p>   | <p><b>WORK IN CONFINED SPACES:</b> This working method allows a worker to enter tanks, sewers, silos, etc., and to be able to be lifted out at any time from above. Consequently it is necessary for another person to remain available for this operation.<br/><b>Basic equipment to be used:</b> Fall prevention harness+ Connecting system + Lifting system (winch, etc) + Anchorage point (tripod, galleys, etc)<br/><b>Standards concerned:</b> EN361 ; EN360+EN1496 ; EN795 ; EN362*</p>  |
| <p><b>PRISTUPNO UŽE:</b> Ova tehnika kretanja na užetu trebalo bi da se koristi samo kada tradicionalni pristupni sistemi ne mogu da se instaliraju. Osnovna oprema za pristup se mora koristiti sa sistemom prevencije padova.<br/><b>Osnovna oprema za upotrebu:</b> kompletni uprtač za sprečavanje pada + progresivni sistem + sidrište.<br/><b>Standardi koji se odnose na ovu upotrebu:</b> EN361; EN358; EN 813; EN341; EN567; EN12841; EN12278; EN795; EN362</p>  | <p><b>ROPE ACCESS:</b> This technique of movement on a rope should only be used when traditional access systems cannot be installed. The basic rope access equipment should be used with a fall prevention system.<br/><b>Basic equipment to be used:</b> Complete fall prevention harness + Progression system + Anchorage point.<br/><b>Standards concerned:</b> EN361; EN358; EN 813; EN341; EN567; EN12841; EN12278; EN795; EN362</p>   |
| <p><b>SPAŠAVANJE I EVAKUACIJA</b> Ova tehnika se koristi u hitnim slučajevima i najosetljivija je. Ako je korisnik svestan i ima opremu, može sam izvršiti tu intervenciju, ili sa pomagačem. U ovoj situaciji nužno je da se može doći do žrtve, osigura osoba u potpunosti da se podigne ili spusti.<br/><b>Osnovna oprema za upotrebu:</b> Kompletni uprtač za sprečavanje pada + sistem za sprečavanje padova +sistem spašavanja + sidrište.<br/><b>Standardi koji se odnose na ovu upotrebu:</b> EN361; EN1496; EN1498; EN341; EN1865; EN795; EN362</p>  | <p><b>RESCUE &amp; EVACUATION:</b>As this technique is used in an emergency it is naturally the most sensitive. This intervention can be performed by the user him/ herself, if he/ she is conscious and has the necessary equipment for selfextraction, or by a helper. In this situation it is necessary to be able to reach the victim, release him/her in complete safety and remove the person upwards or downwards.<br/><b>Basic equipment to be used:</b> Complete fall prevention harness + fall prevention system + rescue system + anchorage point.<br/><b>Standards concerned:</b> EN361; EN1496; EN1498; EN341; EN1865; EN795; EN362</p>                          |

**Opis:** Uprtič s dve tačke kopčanja;  
**Veličina:** univerzalna;  
**Materijal:** naramenice: poliester, kopče: čelik;  
**Težina artikla:** 0,82 kg;  
**Maksimalna nosivost:** 100 kg;  
**Standard:** EN361:2002;

**Description:** Body harness 2 attachment points;  
**Size:** Universal  
**Material:** straps: polyester, buckle: steel;  
**Item weight:** 0,82 kg;  
**Maximum weight:** 100 kg;  
**Standard:** EN361:2002;

KRATOS **UPRTAČ MOVE 3 ZA SKELE** FA 10 107 01

**Opis:** Uprtič MOVE 3 za skele s dve tačke kopčanja;  
**Veličina:** univerzalna;  
**Materijal:** naramenice: poliester, kopče: čelik, prednja kopča: aluminij;  
**Težina artikla:** 1,66 kg;  
**Maksimalna nosivost:** 140 kg;  
**Standard:** EN361:2002;

**Description:** Body harness MOVE3 for scaffold  
2 attachment points;  
**Size:** Universal  
**Material:** straps: polyester, buckle: steel, front buckle: aluminium;  
**Item weight:** 1,66 kg;  
**Maximum weight:** 140 kg;  
**Standard:** EN361:2002;

KRATOS **Pojas za radno pozicioniranje** FA10 402 00

**Opis:** Pojas za radno pozicioniranje, 2 bočna prstena za kopčanje;  
**Veličina:** univerzalna;  
**Materijal:** naramenice: poliester, kopče: čelik;  
**Težina artikla:** 0,45 kg;  
**Standard:** EN358:2000;

**Description:** Work positioning belt, 2 lateral D-rings;  
**Size:** Universal;  
**Material:** straps: polyester, buckle: steel;  
**Item weight:** 0,45kg;  
**Standard:** EN358:2000;

KRATOS **Pojas za radno pozicioniranje sa užetom** FA10 402 00FA4090020

**Opis:** Pojas za radno pozicioniranje, 2 bočna prstena za kopčanje i uže FA4090020;  
**Veličina:** univerzalna;  
**Materijal:** naramenice: poliester, kopče: čelik;  
**Težina artikla:** 1,14 kg;  
**Standard:** EN358:2000;

**Description:** Body harness 2 attachment points, belt FA1040200 and rope FA4090020;  
**Size:** Universal;  
**Material:** straps: polyester, buckle: steel;  
**Item weight:** 2,02 kg;  
**Maximum weight:** 1,40 kg;  
**Standard:** EN361:2002, EN358:2000;

KRATOS **Uprtič sa dve tačke kopčanja i pojasom** FA10 203 00

**Opis:** Uprtič sa dve tačke kopčanja i pojasom FA1040200;

HP10 200 00B

**Opis:** zaštitna kaciga za rad na visinama FOX crna;  
**Karakteristike:** specijalno namenjena za rad na visini, planinarenje, spašavanje, provetravajuća za veću udobnost, mogućnost dodavanja: vizira, antifona, svetiljke (dodaci nisu uključeni);  
**Veličina:** univerzalna 52 do 61 cm;  
**Materijal:** naramenice: poliester,  
**Kopče:** poliamid;  
**Oklop:** polipropilen  
**Težina artikla:** 0,41 kg;  
**Standard:** EN 12492:2012;

**Description:** FOX Safety helmet - black color;  
**Characteristics:** Recommended for mountaineering, maintenance and rescue operations as well as for works at height where the risk of falling is high, ventilation slots for better comfort, slots for visor fitting, small hooks for headlamp, side slots for hearing protection fitting (accessories not included);  
**Size:** Universal 52 to 61 cm;  
**Material:** straps: polyester, buckle: poliamid, shell: polypropilen;  
**Item weight:** 0,41 kg;  
**Standard:** EN 12492:2012;

RADNA ODEĆA WORKWEAR

# TEHNIČKE KARAKTERISTIKE MATERIJALA

# MATERIAL TECHNICAL FEATURES

## 100% PAMUK

Pamuk je prirodno biljno vlakno dobijeno iz niti koje raste oko semena biljke pamuka. Poznat je po komforu, spoljašnjosti i lako se prede. Pamuk je načelno veoma elastičan. Može podneti visoke temperature, može se prati više puta i ima veliku mogućnost apsorpcije. Kako bismo što više profitirali iz njegove udobnosti, pomešali smo ga sa sintetičkim vlaknom poliestera koje je veoma otporno i glatko i održava tkaninu mekom i izdržljivom.

## PAMUK-POLIESTER

Pamuk 60 % / Poliestersko vlakno 40 %: mešavina sa većim udelom pamuka kako bi se tkanina održala mekom i čvrstom te odgovorila zahtevima radne odeće. Toplije zimi i dobra apsorpcija leti.

Poliestersko vlakno 65 % / Pamuk 35 %: Mešavina sa većim udelom poliesterskog vlakna za jeftiniju tkaninu sa lakšim održavanjem nego održavajući mekoću pamuka. Ne preporučuje se radnim mestima na kojima je moguće prskanje topljenih metalnih delova.

## CORDURA®

Registrovani zaštitni znak INVISTA-e, ovoj preovetravajućoj sintetičkoj tkanini svojstvena su povećana izdržljivost bez uticaja na udobnost nošenja. Otpornost na trošenje je tri puta veća nego kod obične sintetičke tkanine. Brzo se suši i lagano se pere.

## BEAVER

Dvostrana sjajna tkanina pamuk/poliester, lomljena na spoljnoj strani. Prednost: sneg klizi po površini, odeća ostaje suva dugo, otporna je na hladnoću, i štiti protiv vetra. Veoma je otporna i lako se pere i održava dugo vremena po upotrebi, zadržava boju.

## POLIURETAN (PU)

Poliuretan (PU): Omogućava lagani komfor čemu ne može parirati nijedan drugi vodootporni materijal. Poliuretan ili PU je alveo-izolator što izjednačava sa ostalim izolatorima i daje vitkost materijalu.

## POLIAMID

Mekan poliamid: lagana i glatka tkanina sa premazom PVC-a na spoljnoj strani.

## PVC

Klasična tkanina za kišnu odeću. Prateći materijali (pamuk/ poliestersko vlakno) su u potpunosti obložena sa 2 sloja PVC-a.

## POLAR FLIS

Radi laganog materijala, mekoće i posebno toplotne izolacije, odlučili smo da kreiramo kape iz flisane tkanine od 100% poliesterskog vlakna. Ne gubi svoj oblik, nema mirisa i pruža dobru zaštitu pri upotrebi.

## ŠIVANI I VARENI ŠAVOVI

Naša kišna odela su izrađena od vodootpornog materijala. Šavovi su tretirani termovarenjem, vezeni zajedno kako bi omogućili savršenu vodootpornost i vetro-nepropusnost za ukupnu odeću. Ova operacija podrazumeva i finu završnu obradu.

## COTTON

Cotton is a natural vegetable fiber from the hairs surrounding the seeds on the cotton plant. It's known for its comfort, aspect and is easy to spin. Cotton, in general, is very elastic. It can withstand high temperatures, has high washability and is very absorbant. In order to profit from cotton's comfort, it's blended with the synthetic fiber polyester which is very resistant and self smoothing out to obtain a soft and resistant fabric.

## POLIESTER COTTONPOLY

Cotton 60% / polyester 40 %: Mixture with a majority of cotton in order to obtain a soft and solid fabric which replies to the requirements for workwear. 'Warmer' in winter and good sweat absorption in Summer.

Polyester 65 % / cotton 35 %: Mixture with a majority of polyester in order to obtain a cheaper fabric with easy care although keeping the softness of the cotton. Is not recommended for working places where splashes of melted metal could occur.

## CORDURA®

Registered trademark of INVISTA, it is about an airy synthetic fabric which offers a greater solidity by remaining light. Its resistance in the abrasion is approximately 3 times superior to that of usual nylon. It quickly dries and washes easily.

## BEAVER

Two faced cotton/polyester fabric, glossed heavy fabric, scraped on back. Benefit: snow slips on surface, consequently clothes remain dry for a long time, cold resistant and windcheater effect. Very resistant in usage and easy to wash it remains long time bright and well coloured.

## POLIURETAN (PU)

Polyurethane (PU): Gives a soft comfort which cannot be compared to any other waterproof material. The polyurethane or PU is alveolar insulator which, to lower thickness, brings a heat insulation equal to other insulators..

## POLYAMIDE

Soft polyamide: Light and smooth fabric with PVC coating on the outside.

## PVC

Classic fabric for rainwear. The supporting fibers (cotton/ polyester) are entirely coated with 2 PVC layers.

## POLAR FLEECE

For its assets of lightness, softness and especially warmth, we have chosen to create coverheads made in fleece fabrics in 100% polyester. It does not lose its shape, it is odourless and offers a good resistance in use.

## SEAMED AND WELDED SEWINGS

Our rainwears are made with a waterproof fabric. The sewings have been thermowelded, it's to say «stitched» together with heat in order to ensure a perfect water and wind tightness for the whole garment. This operation confers also a very neat finish.

# TEHNIČKE INFORMACIJE TECHNICAL INFORMATION

## TEHNIČKE KARAKTERISTIKE MATERIJALA TECHNICAL PROPERTIES OF MATERIALS

### PROVETRENOST

Materijal koji omogućava vlaga tela izlazi kroz tkaninu.

### BREATHABLE

Material which allows the body's moisture to get through the fabric.

### VODOOTPORNOST

Omogućava odbijanje vode, ulja i prljavštine od tkanine. Tečnost se kreće po tkanini bez prodiranja u istu.

### WATERPROOF

Finishing process which enables a fabric to resist penetration by water in its liquid form, or by oil or dirt. Liquids run off the fabrics without penetrating it.

### VODOODBOJNOST

Svojstvo tkanine da ne upija vodu, brzo se suši.

### HYDROPHOBIC

Performant fabric which do not absorb water and easens drying after washing.

RENTAL

ODEĆA / DIZAJNIRANA ZA  
UDOBNOST I SIGURNOST

Lacuna WORKTIME radna odeća sinonim je za sigurnost, zaštitu i udobnost. Konstrukcija naše radne odeće prati prirodne pokrete tela u radu, što odeći daje udobnost i funkcionalnost.

Pri izradi se koriste samo materijali visokih tehničkih performansi koji pri tome imaju svojstva izdržljivosti i udobnosti nošenja.

---

WORKWEAR / DESIGNED  
FOR COMFORT AND SAFETY

Lacuna WORKTIME work wear, is a synonym for safety, protection and comfort. The design of our Workwear follows the natural body movements in work, which gives comfort and functionality.

The materials we use must have high technical, endurance and comfort properties.

## KOLEKCIJA ALARA

Alaru karakteriše pročišćen dizajn, uži kroj koji ne umanjuje udobnost već omogućava slobodne pokrete tela u radu, kao i suzdržana paleta boja. Kolekcija Alara prepoznata je u različitim industrijama kako zbog svoje funkcionalnosti, kvaliteta materijala tako i zbog izgleda.

---

## ALARA COLLECTION

Alara is characterised by purified design, a slim fit that does not reduce comfort, but allows free movement of the body in action, and a restrained colour palette. Alara collection has been recognised in various industries for its functionality, quality of the materials, as well as appearance.

LACUNA MULTINORM ZAŠTITNA ODEĆA  
LACUNA MULTINORM SAFETY WEAR

# LACUNA MULTINORM ZAŠTITNA ODEĆA

Multinorm znači mnogo normi - a to je upravo što Lacuna Multinorm jeste! Asortiman Lacune nudi optimalnu zaštitu, udobnost i funkcionalnost za one koji su izloženi surovim okruženjima i rizicima koji s njima dolaze.

Neki radnici su stalno izloženi grubim okruženjima i rizicima koji s njima dolaze. Štaviše, neka od ovih okruženja izlažu radnike spoju nekoliko rizika u isto vreme. Multinorm zaštita ograničava moguće opasnosti od pojavljivanja niza rizika i smanjuje rizik od lične povrede kroz visok nivo zaštite.

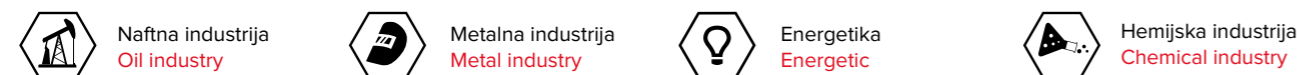

Kako bismo osigurali da Multinorm odevni predmeti pruže najvišu zaštitu, naši se odevni predmeti strogo pridržavaju evropskih standarda navedenih u ovom dokumentu. Vaš odevni predmet ima etikete i oznake koje vam govore kojim standardima za zaštitnu odeću udovoljavaju.

## Zaštita od plamena

Postoje dve metode proizvodnje sporo gorivih tkanina, a Lacuna Multinorm asortiman nudi odevne predmete izradene od obe vrste tkanina, hemijski tretiranih tkanina i inherentno sporo gorivih tkanina. Obe vrste Lacuna Multinorm tkanina su izuzetno mekane i udobne - jedva da možete prepoznati da su ove tkanine visoko efikasne u zaštiti od plamena - jednostavno se čini kao još jedan materijal Lacuna kvaliteta. Inherentno sporo goriva tkanina znači da je sama tkanina tkana od sporo gorivih vlakana, tako da je zaštita od plamena ugrađena u tkaninu. Ova svojstva su trajna i ne mogu se "isprati".

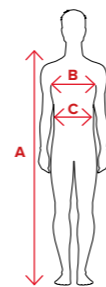

Naša hemijski tretirana VO tkanina tretirana je PROBAN®-om, koji nudi dobru zaštitu a tkanina zadržava svoju mekoću i prozračnost. Postoji direktna veza između vlakna i PROBAN®-a, tako da se tretman ne može tokom vremena ukloniti. PROBAN® ne nestaje ni abrazijom ni pranjem. Tkanine tretirane PROBAN®-om ispunjavaju zahtevstandarda Oeko-tex 100, klasi proizvoda II (direktan dodir s kožom). Sporigorive tkanine imaju karakteristike koje smanjuju zapaljivost tkanina i/ili ograničavaju širenje plamena. Sigurnost i visok nivo zaštite su ono čemu Lacuna pridaje 100%-tnu pažnju, kako biste vi dobili optimalnu radnu odeću. Zato, čvrsto preporučujemo da odevni predmet koristite onoliko koliko je preporučeno i da sledite uputstva za održavanje.

# LACUNA MULTINORM SAFETY WEAR

Multinorm means many norms - which is exactly what Lacuna Multinorm is! The Lacuna range offers the optimal protection, comfort and functionality for those who work in harsh environments.

Some workers are continuously exposed to tough environments and the risks that come with these. Moreover, several of these environments expose workers to a combination of risks at the same time. Multinorm protection limits the potential threats of a number of these risks, and reduces the risk for personal injury through its high level of protection. In order to ensure Multinorm garments provide the maximum protection, our garments comply strictly with the European standards outlined in this folder. Your garment has labels and hangtags to tell you which protective clothing standards it meets.

## Flame protection

There are two different methods for producing flame-retardant fabrics, and the Lacuna Multinorm range offers garments made in both kinds of fabric, chemical treated fabric and inherent fabric. Both of the Lacuna Multinorm fabrics are extremely soft and comfortable – you hardly recognize that these fabrics are high-performance flame materials – they simply feel like one more Lacuna quality material. Inherent fabric means that the fabric itself is woven from flame-retardant fibres, so the flame protection is built into the fabric. These properties are life-long, and cannot be "washed out".

Our chemically treated FR fabric is treated with PROBAN®, which provides good protection and still lets the fabric keep its softness and breathability. There is a direct link between the fibre and PROBAN®, so the treatment cannot be removed over time. Neither abrasion nor washing can make PROBAN® disappear. PROBAN® treated fabrics meet Oeko-tex 100 requirements, product class II (direct skin contact). Flame-retardant fabrics have properties that reduce the flammability of the fabrics and/ or limit the flame spread. The safety and high level of protection are the 100% focus for Lacuna, to give you the optimal workwear. Therefore, we strongly recommend you only use the garment for its recommended life and you follow the care instructions.

# NORME STANDARDS

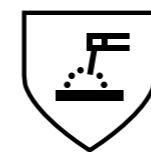

## EN ISO 11612

Zaštitna odeća sertifikovana u skladu s normom ISO 11612 štiti od kratkog kontakta s toplotom i plamenom. Norma je podeljena u različite kategorije, gde kodne oznake označavaju koje zahteve za zaštitu od toplote i gasa odevni predmet ispunjava. Svaka kategorija dodatno je podeljena u različite niove, u zavisnosti of nivoa zaštite.

- (A1) Ograničeno širenje plamena
- (A2) Ograničeno širenje plamena, opšiveni uzorci
- (B) Konvektivna toplota, stepeni 1-3 gde je 3 najbolji
- (B) Radijacijska toplota, stepeni 1-4 gde je 4 najbolji
- (D) Prskanje livenog aluminijuma, stepeni 1-3 gde je 3 najbolji
- (E) Prskanje livenog gvožđa, stepeni 1-3 gde je 3 najbolji
- (F) Kontaktna toplota, stepeni 1-3 gde je 3 najbolji

Protective clothing certified to ISO 11612 protects against brief contact with heat and flame. The standard is divided into different categories, where the code letters indicate which heat and flame requirements the garment ful ls. Each category is subdivided into different levels, depending on how good the protection is.

- (A1) Limited flame spread
- (A2) Limited flame spread, hemmed specimens
- (B) Convective heat, scale 1-3 where 3 is the best
- (C) Radiant heat, scale 1-4, where 4 is best
- (D) Molten aluminium splash, scale 1-3 where 3 is the best
- (E) Molten iron splash, scale 1-3 where 3 is the best
- (F) Contact Heat, scale 1-3 where 3 is the best

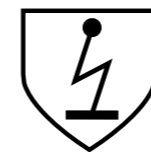

## EN ISO 11611

Zaštitna odeća sertifikovana u skladu s normom ISO 11611 pruža zaštitu od prskanja (male kapljice livenog metala) i kratkog kontakta s plamenom.

- Klasa 1 - štiti protiv manje opasnih zavarivačkih tehnika i situacija, koje uzrokuju niže nivo prskanja i radijacijske toplote
- Klasa 2 - štiti protiv manje rizičnijih zavarivačkih tehnika i situacija koje uzrokuju više nivo prskanja i radijacijske toplote
- (A1) Ograničeno širenje plamena
- (A2) Ograničeno širenje plamena, opšiveni uzorci

Protective clothing certified to EN 11611 provides protection against spatter (small splashes of molten metal) and brief contact with flame.

- Class 1 - Protects against less hazardous welding techniques and situations, causing lower spatter and radiant heat
- Class 2 - Protects against riskier welding techniques and situations, which causes higher levels of spatter and radiant heat
- (A1) Limited flame spread
- (A2) Limited flame spread, hemmed Specimens

## EN 1149-5

Zaštitna odeća sertifikovana u skladu s normom EN 1149 pruža zaštitu protiv elektrostatičkog elektriciteta i ograničava mogući rizik od zapaljenja. Odevni predmet je potrebno koristiti kao deo uzemljenja električnog sistema kako bi se sprečilo nastajanje iskri.

Protective clothing certified to EN 1149-5 provides protection against electrostatic build up and limits the potential risk of ignition. The garment should be used as a part of an earthed electrical system to prevent sparks.

## EN 61482-1-2

Zaštitna odeća sertifikovana u skladu s normom EN 61482-1-2 pruža zaštitu od toplotnog efekta električnog luka. Ova norma pokazuje da li odevni predmet štiti od toplotnog efekta električnog luka i deli se u klase.

- Klasa 1 - Zaštita od toplotnog efekta električnog luka 4kA
- Klasa 2 - Zaštita od toplotnog efekta električnog luka 7kA
- Odevni predmet se testira pri naponu električnog luka od otprilike 400 V s dužinom luka od 500 ms.

Protective clothing certified to EN61482-1-2 provides protection against the thermal hazards of an electric arc. The standard tells if the garment protects against electric arc and it is divided into classes.

- Class 1 - Protection against electric arc 4kA
- Class 2 - Protection against electric arc 7kA
- The garment is tested at an arc voltage of up to approximately 400 V with an arc duration of 500 ms.

## EN 13034 type 6

Zaštitna odeća sertifikovana u skladu s normom EN 13034 pruža zaštitu od tečnih hemikalija i namenjena je za upotrebu ako su rizici procenjeni kao niski i nije potrebna potpuna nepropusnost za tečnosti, tj. kad osobe koje nose odeću mogu na vreme preduzeti odgovarajuće radnje ako njihova odeća postane kontaminirana. Niski rizici mogu biti potencijalna izloženost malim količinama raspršene tečnosti ili slučajno prskanje, u malom obimu.

Protective clothing to EN 13034 provides protection against liquid chemicals and is intended for use if the risks are assessed as low and a full liquid permeation barrier is not necessary, i.e. when wearers are able to take timely adequate action if their clothing becomes contaminated.

Low risks could be a potential exposure to small quantities of spray or accidental, low volume, splashes.

## EN 20471

Zaštitna odeća sertifikovana u skladu s normom ISO 471 pruža visoku vidljivost u opasnim situacijama tokom celog dana. Zahtevi su postavljeni za osvetljenost i refleksiju. Odevni predmet je sertifikovan s obzirom na površinu vidljivog površinskog materijala.

Protective clothing certified to EN 471 provides high visibility in dangerous situations during all hours of the day. Requirements are set for luminance and reflection. The garment is certified relative to the area of visible surface material.

## REGULAR MULTINORM

### WORKING RISK ENVIROMENTS

Proizvedeno od TenCate Tecapro® tkanine. Zaštitna odeća proizvedena od tkanine s najboljim rezultatima na testu. Šiveno negorivim koncem i označeno negorivim reflektujućim trakama.

**Sastav:**  
65% polieterska vlakna, 34% pamuk, 1% statička vlakna  
**Težina:** 245 g/m<sup>2</sup>

Standardna boja **Standard colour**

-  Tamno zelena 61090 **Bottle green 61090**
-  Tamno plava 63805 **Navy 63805**
-  Royal box 60624 **Royal box 60624**

Developed with TenCate Tecapro® fabric. Protective clothing made of fabric with highest score on the fabric test. Sewn with flame retardant thread and marked with flame retardant reflective strips.

**Composition:**  
65% pes, 34% cotton, 1% static fibre  
**Weight:** 245 g/m<sup>2</sup>

Pranje u domaćinstvu **Domestic laundering**

Industrijsko pranje **Industrial laundering**

### VISOKO VIDLJIVI MATERIJALI

Signalizirajuća odeća izrađena je od reflektujućih materijala koji dopuštaju reflektovanje svetlosti na optimalan način. Osnovni materijal izrađen je u fluorescentnim bojama kako bi odeća bila što vidljivija. Fluorescentne boje deluju svetlije od ostalih standardnih boja i čine osobu koja ih nosi vidljivijom danju. Retroreflektivni materijal deluje kao reflektor šaljući svetlo koje izvire kod slabog izvora nazad tom izvoru, čineći pri tome objekat lagano vidljivim, čak i u slučaju slabog svetla. Kombinirani materijal istovremeno predstavlja svojstva fluorescentnog i retroreflektirajućeg materijala (nije ponuđen u našoj kolekciji).

### HIGHLY VISIBLE MATERIALS

Hi-viz clothing is made of reflective material, which allows reflecting light in an optimal way. The background material is made in fluorescent colours meant to be highly visible. The high visibility of these fabrics lays in their capacity to absorb the energy in the zones, and then to transform it into visible light. In this way, the fluorescent colours seem brighter than standard colours making the wearer of these garments more visible in daylight. The retroreflective material acts like a reflector resending the light emitted by a light source back to that source, making in this way the object enlightened "visible" even in case of slight light. The retroreflexion helps the eye to capture light when this last is weak. In this way, by reflecting the light rays back to the initial source, for example illuminated by headlights of cars, the fabric seems more bright in the eyes of the driver and makes the wearer more visible at night. The combined material presents at the same time fluorescent and retroreflective properties. (Are not offered in the collection).

### EN20471 : 2003 Evropska norma za Hi-Viz A standard meant to be seen

Odeća visoke vidljivosti namenjena je da vizualno signalizira na prisutnost osobe kako danju tako i noću.

The High visibility warning clothing is aiming to signal the presence of the wearer visually in daylight as well as under illumination by lights at night without ambiguity in any circumstances.

# HI-VIZ

## High visibility

### MODELI I STEPENI VIDLJIVOSTI

Odeća visoke vidljivosti podeljena je u tri razreda. Svaki razred zahteva minimalno osnovnog materijala, kao i retroreflektujućeg materijala ili kombinaciju jednog i drugog prema donjoj tabeli.

**Klasa 3** sadrži najveći nivo vidljivosti, a tu spadaju jakne sa dugim rukavima, parke, kabanice i odela.

**Klasa 2** sadrži srednji nivo vidljivosti, koju možemo naći na prslucima ili jaknama bez retroreflektujućih traka na rukavima.

**Klasa 1** sadrži najmanji nivo vidljivosti, a možemo je videti na pantalonama bez jakne, majicama ili manjim proizvodima (rukavicama ili kapama).

### MODELS AND CLASSES

High visibility clothing is categorized in 3 classes. Each class requires for these garments minimal surfaces of the background material and the retroreflective material or on combined material, and this accordingly to the table here-under.

**Class 3** concerns the highest level of visibility and encounters longsleeved jackets, parkas, coveralls and jacket-trousers suits.

**Class 2** represents the intermediate level which can be found on waistcoats and chasubles or on jackets without retroreflective bands on the sleeves.

**Class 1** is the lowest visibility level which can be found on trousers worn without jacket or vests or on small garments (gloves or caps).

|  | ODEĆA CLOTHES<br>KLASA 3 | ODEĆA CLOTHES<br>KLASA 2 | ODEĆA CLOTHES<br>KLASA 1 |
|--|--------------------------|--------------------------|--------------------------|
| OSNOVNI MATERIJAL<br>BACKGROUND MATERIAL                 | 0,80 m2                  | 0,50 m2                  | 0,14 m2                  |
| RETROREFLEKTUJUĆI MATERIJAL<br>RETRO-REFLECTIVE MATERIAL | 0,20 m2                  | 0,13 m2                  | 0,10 m2                  |
| KOMBINOVANI MATERIJAL<br>COMBINED MATERIAL               |                          |                          | 0,20 m2                  |

### Označavanje / Marking

Signalizirajuća odeća visoke vidljivosti označena je oznakom koju prikazuje piktoqram koji pokazuje i stepen kvaliteta. Broj X pored piktoqram ukazuje na razred površine pozadine materijala prema gornjoj tabeli.

High visibility warning clothing is marked with a label showing this pictogram and/or the performance levels. The number X next to the pictogram indicates the class of the surface of the background material according to the table above.

### NORMA HRN EN 20471 NORM EN 20471

#### Metode ispitivanja i zahtevi za signalizirajuću odeću visoke vidljivosti koju koriste profesionalci.

Sertifikovana ovim standardima odeća vizuelno ukazuje na prisutnost korisnika, kako bi ga otkrili i videli ga dobro u opasnim situacijama. Performansne potrebe pokrivaju boju, retro refleksije, minimalnu površinu i materijal za pozicioniranje. Postoje 3 razreda signalizacije odeće definisane na osnovu korišćene površine za „propratne materijale“ (fluorescentnog materijala u boji) i „retro reflektujućim materijal“ u manjem obimu.

#### Test methods and requirements for high-visibility warning clothes for professional use.

Clothing certified by this standard visually indicates the presence of a user in order to detect him and see him well in dangerous situations. Performance requirements cover the color of the garment, retro reflection, minimal surfaces and materials positioning. There are 3 signalling garment classes defined based on surfaces used for «background material» (fluorescent material color) and «retro reflective material» on smaller range.

# HI-VIZ

## ISTAKNITE SE TO STAND OUT

### MODELI I STEPENI VIDLJIVOSTI

#### Označavanje

Personalizujući standardnu odeću prilagođavamo je potrebama osobe koja je nosi, kompanije ili kupaca, ali istovremeno pojačavamo sopstveni imidž, i osećaj pripadnosti kompaniji. Svi modeli koje ćete naći u ovom katalogu posebno su označeni.

Pažnja pri odabiru klasa: preporučljivo je ponovno ispitati odeću visoke vidljivosti nakon što je jednom označena.

#### TEHNIKE OZNAČAVANJA:

##### VEZ

Vezenje nudi najčvršću i najprestižniju personalizaciju. Danas se to radi pomoću kompjutera i zbog toga je potrebno napraviti kompjuterski program vezenja.

Moderne mašine nude vezenje sa do 12 različitih boja na istom logu. Rezultat je odličan. Može biti korišćen na bilo kom tekstilnom materijalu, ali mora imati otvor na postavi, kako bi dao bolji rezultat. Svakako oprezno sa vodootpornom odećom.

##### ŠTAMPA

Direktna štampa sa jednom ili više boja. Boja prolazi kroz ekran sa predmetom poput struga. Na tamnim podlogama potrebno je primeniti prvo belu boju (koja zahteva komplementarnu boju).

Boja za štampanje takođe mora biti posebna, tamnija za lakše obeležavanje ili fotografski sjajna kako bi bila vidljiva u mraku. To je najstarija i najkorišćenija tehnika obeležavanja. Za manje serije, ta tehnika se više ne koristi, a zamenilo ju je vezenje, koje je zahvaljujući kompjuterima postalo vrlo efikasno. Može biti primenjeno na velikom broju tekstilnog materijala.

##### INDIREKTNO DIGITALNO ŠTAMPANJE NA TEKSTIL

Logo, iako u nekoliko boja, štampa se na posebnoj podlozi ili postupkom reprografije (laser). Postavlja se na proizvod vrućim pritiskom. Taj postupak najčešće se koristi na svetlijoj jednojbojnoj podlozi (bela ili bež). Mnoge opcije su moguće, sve dok je podloga otporna na temperaturu (oko 160°C u 15 sekundi zavisno od podloge). Idealan proces za male serije ili kada kompleks 4 boje ne dopušta direktnu aplikaciju na podlogu.

Napomena: Uvek utvrditi mogućnost označavanja svakog modela i napraviti test-označavanje pre štampanja serije.

### MODELS AND CLASSES

#### Markable garments

The personalization of a standard garment allows you to obtain a professional clothing adapted to the needs of the wearer, of the company or of the customers, while promoting your image and to reinforce the feeling of belonging to the company. In order to meet these needs, all the models you find in this catalogue are markable. Attention for the respectance of the classes: it is recommended to retest a hi-viz garment once it has been marked.

#### MARKING TECHNIQUES:

##### EMBROIDERY

Embroidery offers the most solid and prestigious personalization. Today, it's guided by computer and therefore necessary to create an embroidery programme. The modern machines allow to embroider with up to 12 different colours on a same logo. The result is superb, indelible and enriches with highclass your support. It can be used on any textile support, but must have an opening in the lining in order to obtain a better result. Do however be careful with waterproof garments.

##### SILK SCREEN PRINTING

Direct printing with one or several colours. The ink is applied through a silkscreen with a sort of scraper. One screen per colour or per design is used with this technique. On dark supports, it is often necessary to apply a white colour first (which implies a supplementary colour). The printing ink can also be special: "swollen" for a marking in relief, or photo luminous to be visible in dark. It's the oldest and most used amongst the personalization techniques. For small series, this technique is abandoned for the benefit of embroidery which, thanks to computers, has become very performant. Can be applied on a huge number of textile supports.

##### INDIRECT DIGITAL TEXTILE PRINTING

The logo, even in several colours, is printed on a support "special transfer" either by silkscreen printing or by reprography process (laser). This support is applied on the object by a hot press. This process is mostly used on a clear coloured support (white, off-white or beige). Many applications are possible, as long as the support resists to the application temperature (around 160°C during 15 seconds depending on the support). Ideal process for small series or when complex four-colour printing process will not allow a direct application on the support.

Remark: Always valid the marking possibilities of each model and get realized a test-marking before launching the series.

## NORME

### EN 343

#### ZAŠTITA RADNE ODEĆE OD KIŠE

Norma se sastoji od niza metoda testiranja materijala i šavova odeće namenjene zaštiti od vode, magle i vlage.

Metode su: otpornost na prodor vode (pre i nakon testiranja), snaga isparavanja, zatezna čvrstoća, otpornosti na cepanje šavova i promene dimenzije odeće.

Sertifikovana odeća označena je posebnim piktogramom:

X : otpornost na prodor vode (1-3)

Y : snaga isparavanja (1-3)

#### PROTECTION AGAINST RAIN FOR PROTECTIVE CLOTHING

This standard sets the requirements and test methods applicable to materials and seams of clothing for protection against the weather, fog and soil moisture.

The tests are: resistance to penetration of water (before and after treatment), évaporative strength, tensile strength, resistance to the tear resistance of the seams and dimensional changes.

Certified clothes are marked by a specific pictogram:

X : resistance to penetration of water (1-3)

Y : évaporative resistance (from 1 to 3)

### EN 14058

#### ODJEĆA NAMENJENA ZAŠTITI OD HLADNOĆE

Hladnu klimu karakteriše kombinacija vlage i vetra s temperaturom do -5°C.

#### PROTECTION AGAINST COOL ENVIROMENTS - CLOTHING

Cool climate is an enviroment generally characterized by a combination of humidity and wind at a temperature of -5°C and more.

Artikli sertifikovani na ovaj standard sadrže sledeći piktogram:  
  
to this standard includes the following pictogram:

Termička otpornost  
Propusnost vazduha  
Prodornost vode  
Otpornost na vodenu paru  
Termička izolacija

Thermal resistance  
Air permeability  
Penetration of water  
Water vapour resistance  
Thermal insulation

X u normi označava da parametar nije ispitano.

X in norm is a mark that parameter wasn't tested.

| Rct (m2K/W)       | CLASS |  |
|-------------------|-------|--|
| 0.06 ≤ Rct < 0.12 | 1     | Proizvodi su podeljeni u 3 klase u zavisnosti od njihove termičke otpornosti. Proizvodi čija je termička otpornost veća od 0.25 m²K/W, generalno se koriste za hladna područja (EN342).          |
| 0.12 ≤ Rct < 0.18 | 2     | Products are divided into three classes depending on their thermal resistance. Products whose thermal resistance is greater than 0.25m²K/W are generally intended for cold environments (EN342). |
| 0.18 ≤ Rct < 0.25 | 3     |  |

| AP (mm/s)    | CLASS |   |
|--------------|-------|---|
| 100 < AP     | 1     | Proizvodi su podeljeni u tri grupe u skladu sa otpornošću na propusnost vazduha.  |
| 5 < AP < 100 | 2     | Products are also divided into three classes depending on their air permeability. |
| AP ≤ 5       | 3     |   |

| AP (mm/s)        | CLASS |   |
|------------------|-------|---|
| 800 ≤ WP < 13000 | 1     | Proizvodi su podeljeni u dve grupe u skladu sa otpornošću na prodor vode.                 |
| WP > 13000       | 2     | Products are divided into two classes according to their resistance to water penetration. |

Testiranja se mogu provesti i na dva dodatna parametra: otpornost na isparavanje i termička otpornost  
Two optional features can be tested: the water vapour resistance and thermal insulation.

# NORMA EN 20471:2013

Ovaj novi standard zamenjuje staru normu EN471: 2003 + A1: 2007. Od 1. oktobra 2013. godine, nova odeća sertifikovana kao odeća „visoke vidljivosti“ mora odgovarati novom standardu. Od 1. oktobra 2013. sertifikovanje prema EN471: 2003 + A1: 2007 sertifikatu više neće biti moguće. Odeća koja je sertifikovana pre 1. oktobra 2013. može biti na tržištu na neodređeno vreme. Kako bi uvek ponudili našim klijentima najsigurnije korišćenje naših proizvoda, WEP grupa pokrenula je proces resertifikacije cele kolekcije odeće visoke vidljivosti prema novom EN20471 standardu.

**Novi standard EN20471 pruža nove dokaze koji će dodatno povećati sigurnost korisnika.**

Među promenama, sledeće nam se čini najznačajnije:

**Odeća koja pokriva samo torzo** (prsluci, prsluk) mora imati najmanje retro reflektirajuću vodoravnu traku oko torza, uz dopunu u vidu drugog horizontalnog pojasa oko torza ili dve trake koje povezuje horizontalnu traku od napred prema natrag kroz ramena.

**Odeća koja pokriva telo i ruke** (prsluci, jakne, T-shirt,) mora imati najmanje retro reflektirajuću vodoravnu traku oko torza, uz dopunu u vidu drugog horizontalnog pojasa oko torza ili dve trake horizontalne napred-nazad preko ramena. Ako rukav ne dopušta razlikovanje trake torza, rukav mora biti okružen sa dve trake. Ako se radi o dugim rukavima, oni moraju biti okruženi s dve trake.

**Odeća koja pokriva noge** (pantalone) mora imati dve trake oko svake noge.

**Odeća Razreda 3 mora:**

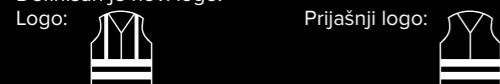

- Pokriti torzo
- Mora imati ili duge rukave ili nogavice, ili oboje, s trakama

**Test na postojanost boje na trenje i znoj** materijala odeće visoke vidljivosti i kontrast je potreban za sertifikaciju.

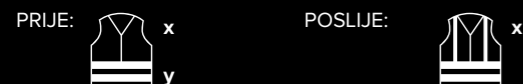

Test na obojenja na pranje / hemijsko pranje/ pranja i peglanje materijala odeće visoke vidljivosti i kontrast su potrebni za sertifikaciju.

Test otpornosti na vodene pare je potreban za sertifikat

Definisana je novi logo:

Postoji više referenci kvaliteta retro reflektujućih traka na etiketi proizvoda, ali samo u klasi proizvoda:

Konačno, novi standard u Dodatku A širi informacije koje se odnose na rizik i identifikuje odgovarajuću klasu odeće:

| Brzina vozila | Tip korisnika | Nivo rizika | Klasa odeće     |
|---------------|---------------|-------------|-----------------|
| > 60km/h      | Pasivan       | Visok       | 3 prema EN20471 |
| ≤ 60km/h      | Pasivan       | Visok       | 2 prema EN20471 |
| ≤ 30km/h      | Pasivan       | Visok       | 1 prema EN20471 |
| ≤ 60km/h      | Aktivan       | Umeren      | —               |
| ≤ 15km/h      | Pasivan       | Umeren      | —               |

**Pasivan korisnik:** osoba na putu koja ne učestvuje u kontroli saobraćaja.  
PRIMER: radnik na putu, osoba u hitnoj situaciji.

**Aktivan korisnik:** osoba koja se kreće po putu i fokusirana je na saobraćaj.  
PRIMER: biciklista, pešak

# STANDARD EN 20471:2013

This new standard replaces EN471: 2003 + A1: 2007. As of 1 October 2013, new clothes certified «high-visibility» must meet the new standard. As of October 1, 2013, it is no longer possible to certify a product according to EN471: 2003 + A1: 2007 certified but before October 1, 2013 clothing can still be marketed indefinitely. In order to always offer our customers the safest use of our products, WEP group has initiated a process of recertifying the full range of its high visibility from the publication of the EN20471 standard.

**New standard EN20471 provides new evidence that will further enhance the safety of the user.**

Among the changes, the following seem most remarkable for us :

**A garment covering only the torso** (waistcoats, vest) must have at least a retro reflective horizontal band around the torso, supplemented either by a second horizontal band around the torso or two strips connecting the horizontal strip from front to back through the shoulders.

**A garment covering the torso and arms** (waistcoats, jacket, T-shirt,) must have at least a retro reflective horizontal band around the torso, supplemented either by a second horizontal band around the torso or by two bands joining the band horizontal front to back through the shoulders. If a sleeve doesn't allow distinguishing a band torso, the sleeve should be surrounded by a band. If a sleeve impossible to distinguish two bands torso, sleeves must be surrounded by two bands. If it is long sleeved, it must be surrounded by two bands.

**Clothing which covers legs** (pants) has to have two bands around each leg.

**Clothing Class 3 must:**

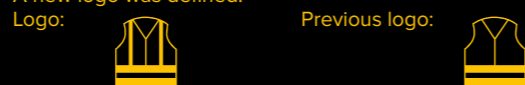

- Cover the torso
- Either have sleeves or legs, or both, provided with bands.

**A test on the color fastness to rubbing and sweat** of the material High-visibility and contrast is required for certification.

**A test on the color fastness to washing / dry cleaning / laundering and ironing** of the material High-visibility and contrast required for certification.

A test on the **resistance to water vapor** is required for the certification.

A new logo was defined:

There are more references to the quality of retro reflective tape on the labeling of the product but only the product class:

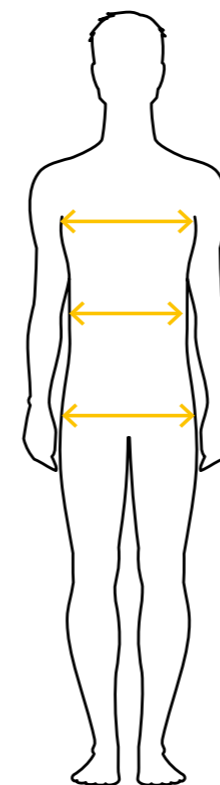

Finally, the new standard in Appendix A diffuses information related to the risk and identifies the appropriate clothing class:

| Vehicle speed | Type of user | Risk level | Clothing Class         |
|---------------|--------------|------------|------------------------|
| > 60km/h      | Passive      | High       | 3 according to EN20471 |

**Passive user:** person using the road, without taking part in the traffic control.  
EXAMPLE: road worker, person in an emergency situation.

**Active user:** person using the road, taking part in the movement and is focused on traffic.  
EXAMPLE: cyclist, pedestrian.

# SOFTSHELL

## NAŠ SOFTSHELL SASTOJI SE IZ NEKOLIKO MATERIJALA, 310 G/M<sup>2</sup>:

Spoljni sloj: poliestersko vlakno i Spandex (elastansko vlakno)  
Srednji sloj: provetravajući TPU premaz, sa visokim tehničkim karakteristikama vodootpornosti od 8000 mm i paropropusnosti od 8000 mpv do 5000 mpv unutrašnji sloj: pričvršćeni mikro polarni flis 150 g/m<sup>2</sup>

Mešavina poliesterskog vlakna i Spandex-a (elastansko vlakno) daje udobnost, toplinu, mekoću i omogućava elastičnost i mekoću odeće. TPU membrana tkaninu čini vodootpornom, provetravajućom, izoluje i štiti protiv vremenskih nepogoda (kiše, snega, vetra) prilikom svakodnevnih aktivnosti.

Najčešće korišćen od strane sportista prilikom ekstremnih sportskih aktivnosti, pa zatopširujemo Coverguard kolekciju inovativnim materijalima kako bi Vas zadovoljila svim svojim prednostima (izolacijom, laganim materijalom, paropropusnošću) i štitala prilikom bilo koje od svakodnevnih aktivnosti.

Oznaka "mm" - jedinica mere koja pokazuje otpornost tkanine na vodu, a dobijena je vodostatičnim testom. Radi se o direktnoj izloženosti materijala vodi, gde se u periodu od 24 sata meri otpornost materijala na uticaj vode.

Broj 8000 mm označava najviši stepen vode koju materijal može podneti da ne dođe do natapanja.

Oznaka "mpv" – jedinica mere koja pokazuje paropropusnost tkanine. Računa se pomoću količine kapljica znoja koju tkanina propušta kroz svoju membranu. Visoki stepen propusnosti suštinski je za efektivnu termo-regulaciju.

Standard ISO 11092\* korišćen je kao referenca za označavanje karakteristike tkanine. Meri efikasnost i otpornost.

\* Internacionalni standard ISO 11092 pokazuje metodu koja označava termalnu otpornost i otpornost na znojenje kod tekstila, kože i nekih višeslojnih artikala (vreće za spavanje, sedišta automobila i sl.).

Oznaka "TPU" - termoplastični poliuretani

## OUR SOFTSHELL FABRIC IS A GATHERING OF SEVERAL MATERIALS WEIGHING 310 G/M<sup>2</sup>, COMPOSED OF:

An outer layer: polyester and Spandex

A medium layer: breathable TPU film, very technical with a high waterproofness on 8000 mm and a breathability on 800 mpv

An inside layer: bonded micro polar fleece 150 g/m<sup>2</sup>

The mixture of polyester and Spandex gives comfort, warmth, softness and ensures the elasticity and the softness of the garment. The TPU film makes the fabric waterproof, breathable, insulating and ensures a real protection against weather hazards (rain, fine snow and wind).

Usually used by high level sportsmen in their extreme sport activities, the Coverguard Collection grows with this innovative material in order to offer you all its advantages (insulation, lightness, breathability...) by protecting you at any time in all your professional activities.

Signification of "mm" - It's a measure unity indicating the fabric's water resistance, calculated by a hydrostatic test made with a water column. The column is filled with water, and the water's volume creates a pressure on the surface of 1 square inch during a period of 24 hours. The number of "mm" is equivalent to the height of the water column (measured in mm) which the fabric can support without letting the water pass through the fabric.

Signification of "mpv" - It's a measure unity indicating the breathability of a fabric, calculated with the quantity of water vapour which the fabric lets pass through the garment. A high level of breathability is essential for an efficient thermal regulation.

The Standard ISO11092\* is actually used as reference to determine the performances of a textile. It measures the evaporative resistance (the blocking of the breathability).

\* The international standard ISO 11092 indicates the method to determine the thermal resistance and the water vapour resistance, in stationary position of products like textiles, films, coatings, foams and leather, as well as on assemblages of multi layers which are used on garments, duvets, sleeping bags, fillings for seats and similar products.

Definition of "TPU" - Thermoplastic Polyurethane

# STATION

# POLARNI FLIS

Polarni flis je naftni nusproizvod. To je polimer naziva polietilen tereftalat, ili PET. Ovaj proizvod pripada porodici poliestera.

Prvi polarni tekstili su proizvedeni u 1979.

Flis je lagan, topao i udoban; konstrukcija tkanine omogućava da vazduh zarobljen između vlakana greje telo i pruža izolaciju za krajnjeg korisnika. Brzo se suši i dopušta koži da diše.

Iako je to tekstil izrađen od petrohemijskih, može se beskonačno reciklirati.

Paropropusnost proizvoda, sa izvrsnom izolacijom od hladnoće, zadržava oblik. Termička izolacija održava telo toplim, istovremeno daje veliku provetrenost. Termička izolacija predstavlja sposobnost vlakana da zadrže vazduh i omogućavaju paropropusnost kao i oslobađanje telesne vlage kroz površinu tkanine.

Sintetička vlakna omogućavaju visoku otpornost prilikom nošenja. „Anti pilling“ tretman vlaknu pruža stabilnu strukturu uprkos velikom broju pranja. Ima mnogo veću izdržljivost nego vuneni proizvod.

# POLIESTER

Sintetičko vlakno hemijskog izvora sa svilenkastim odsjajem. Može se koristiti samo ili mešano, uglavnom sa prirodnim vlaknima (pamuk ili vuna) no može se mešati sa veštačkim vlaknima (poliviskoza) ili mikrofiber. Odlikuje ga visoka elastičnost, ne gužva se, ne skuplja se u pranju. Ima dobru termičku izolaciju, iako se održava, brzo se suši i otporan je na većinu hemikalija.

## Oxford tkanina

Tkanina mekana na dodir, sa mrežicom. Brzo sušenje, komforna za nošenje.

# POLAR FLEECE

Polar fleece is a petroleum by-product. It is a polymer called polyethylene or terephthalate or PET. This product belongs to the family of polyesters.

The first polar textiles were manufactured in 1979. Fleece garments are lightweight, warm and comfortable; the fabric construction allows air to be trapped between the fibers and heated by the body to provide insulation to the end user. They dry quickly and allow the skin to breathe.

Although this textile is made from petrochemicals, it is infinitely recyclable.

Breathable product with an excellent cold insulation, keeps its shape Thermic insulation keeps the warmth of the body while it also has a certain breathability. The thermic resistance is the capacity of the fibers to keep tiny air spaces which is the insulator of polar fleece fabric and its breathability which permits the humidity of the body to get through the fabric

Made in synthetic fibres gives a very high resistance in use. Note: the anti pilling treatment gives this fibre a stable aspect despite numerous washings. Much higher resistance than wool products.

# POLYESTER

Synthetic fiber of chemical origine with a silky aspect. Can be used pure or melted, principally with natural fibers (cotton or wool) but also with artificial fibers (polyviscose) or as microfiber. Polyester fiber has a good elasticity. It doesn't crumple and doesn't get into felt when washed. A strong, soft yarn with a good thermic memory (crumplefree, retains heat-set pleats) and easily washed with quick drying (hydrofobic) without shrinking; and is resisitant to most chemicals. The fiber forming substance is any long-chain synthetic polymer composed of at least 85 % by weight of an ester of a substituted aromatic carboxylic acid, including but not resitrcted to substituted terephthalic units.

## Oxford weaving

Offers a fabric with a softer feel and a dotted aspect composed of small square patterns. The warp yarns are bulkier than the weft creating a textured surface.

# Corporatetime

CORPORATE WEAR CORPORATE WEAR

#### CORPORATE WEAR

Kod radnika u servisnim industrijama profesionalan i elegantan izgled posebno je važan. Zbog toga je njihova odeća izrađena od tkanina koje svojim svojstvima doprinose lepom i profesionalnom izgledu čak i nakon dugotrajnog nošenja i ponovljenih pranja.

TenCate tkanine jedinstvene su po svojoj beloj boji i blistavosti, a dostupne su u paleti modernih i industrijskih boja koje ostaju potpuno postojane nakon pranja. Na taj način tkanine zadržavaju svoj profesionalni izgled.

---

#### CORPORATE WEAR

For workers in service industries, a professional and elegant look is particularly important. Because of this, their clothes are made of fabrics that contribute to their appealing and professional appearance, even after prolonged wear and frequent washing.

TenCate fabrics are unique for their white colour and brilliance and are available in a palette of modern and industrial colours that remain completely intact after washing. In this way the fabrics retain their professional look.

# LACUNA CORPORATE

TenCate KG317 215g/m<sup>2</sup>, 65% poliester, 35% pamuk

Lacuna Corporate odeća izrađena je od TenCate tkanina koje svojim svojstvima doprinose profesionalnom izgledu.

Tokom više vekova, TenCate Tecawork – KG 317 tkanine su nosile na hiljade ugostiteljskih, medicinskih i zdravstvenih radnika, svakodnevno.

Klijenti su zadovoljni kvalitetom TenCate materijala: proizvodi se najsvetlija i najtrajnija bela tkanina, gotovo neprovidna za tako laganu tkaninu i s visokim nivoom otpornosti na gužvanje čak i u uslovima industrijskih perionica. To su samo neki od razloga zbog kojih te tkanine imaju široku primenu u izradi radne odeće za ugostiteljske objekte, dečje vrtiće, doktorske ordinacije i bolnice. TenCate podvrgava TenCate Tecawork – KTM – KG 317 tkanine strogim ispitivanjima kvaliteta. Ispunjeni su svi standardi koje je postavilo Evropsko udruženje proizvođača tekstila (eng. European Textile Services Association- ETSA). To znači da ne postoje ograničenja u smislu primene tkanina pa su sprovedena ispitivanja u vezi sa : čvrstinom, skupljanje i otpornost na gužvanje i trošenje. Uz ovakve rezultate sprovedenih ispitivanja, možete biti sigurni da su tkanine vrlo prikladne za radnu odeću koja se održava u industrijskim perionicama veša.

TenCate Tecawork tkanine ostvaruju najbolje rezultate u sledećem:

- Otpornost na gužvanje
- Čvrstina
- Otpornost na trošenje
- Promenu boje nakon pranja (75°C)
- Otpornost boje na bleđenje
- Otpornost boje na tragove znojenja

TenCate KG317 215g/m<sup>2</sup>, 65% pes, 35% cotton

Lacuna Corporate garments are made of TenCate Tecawork fabrics which thanks to its impressive properties contribute to a professional look. For many decades, the TenCate Tecawork – KG 317 fabrics have been worn by thousands of medical and health professionals, day after day.

Customers take satisfaction at the quality of TenCate materials: the brightest and most durable white fabric is produced, with a low translucency for such a lightweight fabric and with a high crease resistance even in industrial laundering conditions. These are just a few reasons why this fabric is widely used in catering and hotel industry as well as in medical care garments for hospitals, nurseries and medical practices. TenCate subjects the TenCate TecaworkTM – KG 317 fabrics to highly stringent tests. All the requirements established by ETSA (the European Textile Services Association) are full led and the highest ranking is achieved. This means that there are no limits to what the fabrics can be used for, and that they have been evaluated on strength, shrinkage and resistance to pilling or abrasion. With these test results, you can be sure that the fabric is highly suitable for garments intended for the industrial laundry process.

TenCate Tecawork fabric achieves the highest score in following:

- Resistance to creasing
- Strength
- Abrasion resistance
- Color change after laundering (75°C)
- Color resistance to bleaching
- Color resistance to perspiration / sweating

## Koja je moja veličina?

Koristite se standardima veličina i ispravno naručite!

**OBIM GRUDI:** na najširem mestu

**OBIM STRUKA:** stavite metar (ne pretesno) oko struka

**OBIM BOKOVA:** na mestu gde su vam bokovi i stražnjica najširi

**DUŽINA RUKAVA:** od ramena celom dužinom ruke do zgloba

**DUŽINA NOGAVICE:** od struka preko bokova do tabana

**OBIM VRATA:** stavite metar (ne pretesno) na donji širi deo vrata

## What is my size?

Use a standard size and the correct order!

**CHEST:** the widest area

**WAIST:** Put a meter (not too tight) around the waist

**HIPS:** where the hips and buttocks are widest

**SLEEVE LENGHT:** From shoulder, down the entire length of the hand, to wrist

**LENGTH OF PANTS:** from the waist through the hips and feet

**NECK:** Put a meter (not too tight) on the lower wider part of the neck

## BROKULA

Brokula proizvodi nastali su od prirodnih, organskih i održivih materijala:

Organski pamuk – pamuk uzgajan isključivo ekološkim procesima, od ne genetski modificiranih biljaka, bez korišćenja ikakvih sintetičkih hemikalija (gnojiva i pesticida). Lyocell Tencel Sun (UV zaštita) – vlakno izrađeno od prirodne sirovine (pulpe) drveta, 100% biorazgradivo.

Dodatak pigmenta minerala, osigurava dugoročnu zaštitu od štetnog UV zračenja. Efekat zaštite je postojan i nakon učestalog pranja i uticaja vlage.

Elastan ili Lycra – u sastavu materijala maksimalno prisutno sa 4%, sintetičko vlakno koje materijalima produžava trajnost/nošenje.

“Green mark” – garancija ekološke i društvene osvešćenosti i rada sa stvarnim ekološkim efektima.

Društvena odgovornost – doprinos održivom razvoju – odgovorno postupanje u svim fazama poslovanja u odnosu na društvo, životnu sredinu i prirodu.

Boje za pletivo – ne sadrže hemijska sredstva štetna za kožu. Boje za štampu – proizvedene u skladu s najvišim ekološkim standardima, ISO 14001 i Oeko-Tex Standard 100.

---

## BROKULA

**Brokula products are made out of natural, organic and sustainable fabrics.**

**Organic cotton – cotton cultivated exclusively with ecological processes, not from genetically modified plants, without any synthetic chemicals (fertilizers or pesticides).**

**Lyocell Tencel Sun (UV protection) – the fiber manufactured from the natural raw (pulp) of wood, 100% biodegradable. With the addition of mineral pigments, the fiber ensures a long-term protection from the harmful UV rays. The protection effect is stable even after frequent washing and in high humidity.**

**Elastane or Lycra – the maximum of 4% in the material contents, a synthetic fiber that extends the duration/wear time for the fabric.**

**“Green Mark” – a guarantee of the ecological and social responsibility – a contribution to the sustainable development, socially responsible actions in all business phases in relation to the society, living environment and the nature.**

**Fabric dyes – do not contain chemical agents damaging for the skin.**

**Print dyes – produced in accordance with the highest ecological standards, ISO 14001 and Oeko-Tex Standard 100.**

dries quickly / brzo se suši

light fabric / lagana tkanina

cooling effect / cooling efekt

permanent uv protection / trajna uv zaštita

**BROKULA PEŠKIRI**

**Sastav materijala:** Potka 50% organski pamuk, 50% Tencel™ / Osnova: 100% pamuk;

**Težina:** 450 gr;

**Održavanje:** pranje belih peškira na 90 °, obojenih na 60 stepeni;

**Dostupne boje:** bele, bež, svetlo plava, tamnoplava, kraljevski plava, svetlosiva, tamno siva, žuta; Dostupne dimenzije: 30 \* 50, 50 \* 100, 70 \* 140, 100 \* 150;

**Prednosti:** Kombinacija organskog, prirodno gajenog pamuka + Tencel - proizvedenog prirodnog celuloznog vlakna od jezgra stabla eukaliptusa apsorbuju više vlage, daju osećaj finoće, otporna su na česta pranja, nepovoljna za rast bakterija, izdržljiv kvalitet, mekoća nakon mnogih pranja na 90 ° za bele i 60 ° za obojene peškire, brzo se suše. ECO friendly. Izrađeni od obnovljivih prirodnih izvora;

**BROKULA TOWEL**

**Composition of material:** Pile 50% Organic Cotton, 50% Tencel / Base: 100% Cotton;

**Weight:** 450 gr;

**Maintenance:** white color wash at 90, color wash at 60 degrees;

**Available colors:** white, beige, light blue, dark blue, royal blue, light grey, dark grey, yellow;

**Available dimensions:** 30\*50, 50\*100, 70\*140, 100\*150;

**Advantages:** Combination of Organic, naturally grown cotton + Tencel - natural cellulose fiber produced from the nucleus of the eucalyptus tree provides more moisture absorbent, fineness, resistant to frequent washing, Unfavorable for bacterial growth, durable quality, softness after many washes on 90° for white and 60° for colored towels, it dries quickly and they are ECO friendly made from renewable natural sources;

# Getout

SEZONSKA ZAŠTITNA ODEĆA SEASONS OUTDOOR CLOTHES

# TEHNIČKE KARAKTERISTIKE MATERIJALA

## TECHNICAL PROPERTIES OF OUR MATERIALS

### SOFTSHELL

Mešavina poliesterskog vlakna i Spandex-a (elastansko vlakno) daje udobnost, toplotu, mekoću i omogućava elastičnost i mekoću odeće. TPU membrana tkaninu čini vodootpornom, propusnom, izolacijskom i štiti protiv vremenskih nepogoda (kiše, snega, vetra) prilikom svakodnevnih aktivnosti.

### SOFTSHELL

The mixture of polyester and Spandex gives comfort, warmth, softness and ensures the elasticity and the softness of the garment. The TPU film makes the fabric waterproof, breathable, insulating and ensures a real protection against weather hazards (rain, fine snow and wind) through daily activities.

### POLARNI FLIS

Tip dvostruko tkane bukle tkanine, ojačane na jednoj ili obe strane, stvarajući efekat mekoće, debljine i izolacije. Mikro polarni flis: polarni flis načinjen iz mikro vlakana.

### POLAR FLEECE

Type of double-knit boucle fabric, intensely raised on one face or on both, producing a fleece effect, soft bulky and insulating.

**Micro polar fleece:** polar fleece made of microfibers

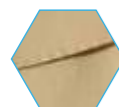

### TASLAN 320D

Taslan pređa, naoko vlaknasta i pozamašna, nabavljena već i u komprimiranoj tubi.

### TASLAN 320D

Taslan yarn with a bulky and fibrous aspect, obtained in a compressed-air tube.

### POLIESTERSKO VLAKNO

Sintetičko vlakno, čvrst, mekan, ne gužva se, lako se pere i brzo suši.

### POLYESTER

Synthetic material, strong, soft, crumple free, easily washed and dried.

### POLIAMIDNO VLAKNO

Sintetičko vlakno, dobijeno pomalo grubljim tkanjem što daje veoma otpornu tkaninu sa vidljivom strukturom.

### POLYAMIDE

Synthetic material, the result of a slightly rougher weaving process. This gives a very resistant fabric with visible grain.

### POLIURETAN (PU)

Poliuretan ili PU je alveolarni izolator što ga izjednačava sa ostalim izolatorima te daje vitkost materijalu.

### POLYURETHANE

The polyurethane or PU is an alveolar insulator which, to lower thickness, brings a heat insulation equal to other insulators.

### RIPSTOP

Sintetička vlakna (poliamidno ili poliestersko) napravljen sa većim ili manjim mrežama od uzdužno ili poprečno prepletenim vlaknima, koje ojačavaju strukturu materijala od kidanja.

### RIPSTOP

Synthetic fabrics (polyamide or polyester) made with a more or less large grid by crossing lengthwise and widthwise yarns, which reinforces the fabric structure and avoids the tear extension when tear occurs.

### OXFORD

Tkanina mekana na dodir, sa mrežicom. Brzo sušenje, komforna za nošenje.

### OXFORD

A fabric with a softer feel and a dotted aspect composed of small square patterns. Dry fast, very easy to use.

### BREATHANE®

Paropropusna i vodootporna tkanina, sa mikroporoznim slojem poliuretana. Daje veoma mekanu tkaninu sa odličnom paropropusnošću te vodootpornošću.

### BREATHANE®

Breathable and waterproof fabric, coated with a microporous polyurethane membrane. Offering a very soft fabric with a perfect breathable impermeability.

# TEHNIČKE KARAKTERISTIKE MATERIJALA - ZOOMS

## TECHNICAL PROPERTIES OF OUR MATERIALS - ZOOMS

**Veze za pritezanje:** na kapuljači, u struku ili pri dnu odeće te smanjuje učinke lošeg vremena. Imaju blokade koje regulišu pričvršćenje.

**The tightening cord:** placed on the hood, on the waist or bottom of the garment, the tightening cords allows to lock out foul weather. They have block cords which ensure the stability of the wanted tightening.

**Kapuljača u obliku kape:** ušiveni kruti obod omogućava veću izdržljivost i bolju vidljivost. Podesivo zatezanje sa vezicom za pričvršćenje.

**The cap formed hood:** a sewed rigid shaft allows its well bearing and a better visibility. Adjustable closing by tightening cord and block cords.

**Manžetne:** da li je to Velcro® pojas ili driker, zatvaranje na zglobovima štiti protiv kiše, vetra i snega. Podesive su i zato omogućavaju veći komfor, naročito dok nosite rukavice.

**The bottom of the sleeves:** would it be Velcro® bands or snap fasteners, the closing on the wrist protect against rain, wind and snow. They are adjustable and give therefor bigger comfort, notably when wearing gloves. the stability of the wanted tightening.

**Vareni šavovi:** jakne sa vodootpornom tkaninom spolja, daju potpunu nepremočivost. Šavovi su termovareni, ušiveni kako bi osigurali savršenu vodo- i vetro- otpornost za celu odeću.

**Seamed sewings:** the parkas with a waterproof fabric on its outside, offers a total impermeability. The sewings have been thermowelded, it's to say „stitched“ together in order to ensure a perfect water and wind tightness for the whole garment.

**Patent zatvarači ispod klapne:** klapna preko zatvarača, preko džepa ili prednjeg zatvaranja daju dodatnu zaštitu od vetra i vode.

**Zippers under flap:** flaps over the zippers, would it be over the pocket or over the frontal closing, ensure a supplementary wind and water proofness on the garment.

**Kapuljača:** skida se, sakrivena unutar kragne. Sa svojim potpunim oblikom daje maksimalnu zaštitu protiv hladnoće.

**The hood:** the hood can be removable but can also be stored away in the collar of the outer parka. With its complete form it gives maximum protection against cold.

**Trake:** daju stilski aspekt odeći. Zahvaljujući tom dodatku, klasičan model postaje moderniji.

**The pipings:** the pipings add a stylish touch to the garment. Thanks to this addition, a model of more classic shape becomes a modern style, more fashion.

**Kragna postavljena flisom:** sa spoljnestrane, greje vrat i tako daje veću udobnost.

**Fleece lined collar:** placed on the outside parka, it gives more warmth on the neck and ensure in this way bigger comfort

**Dvosmerni patent zatvarači:** doprinose udobnosti i jednostavnosti odevanja, naročito prilikom sedenja.

**Two-ways zipper:** the two-way zipper has been thought to give even more comfort and ease for the wearer, especially when sitting.

**Rukavi se skidaju:** mogućnost pretvaranja jakne u prsluk za veću pokretljivost.

**Removable sleeves:** it's possible to change parka or a jacket into a waistcoat for more released movements.

**Vertikalni džepovi na zatvarač:** mogu poslužiti za papir, ključeve, itd.

**Vertical zipper pockets:** they offer a smart tidying for papers, keys, etc.

**Prsluk s dva lica:** (prsluk) s njime možete menjati izgled. Vodootporni su i štite od vetra kako bi održali telo suvim i toplim.

**Reversible:** the reversible waistcoats allow you to change look at any time! They are waterproof and wind cheater in order to keep the body dry and made with warm linings.

## EN ISO 13688

**ZAŠTITNA ODEĆA - OPŠTI ZAHTEVI**  
**PROTECTIVE CLOTHING - GENERAL REQUIREMENTS**

ISO 13688: 2012/ - Zaštitna odeća – Opšti zahtevi/ specifikuje opšte uslove performansi za ergonomiju, dizajn i udobnost, način označavanja veličina, kompatibilnosti i obeležavanje zaštitne odeće. Uključuje opšte informacije i simbole održavanja koje se isporučuju od strane proizvođača zaštitne odeće.

ISO 13688: 2012  
**Protective clothing -- General requirements/ specifies the general requirements of performance in ergonomics, design and comfort, marking size, compatibility and marking of protective clothing. Includes general information and symbols maintenance to be supplied by the manufacturer of protective clothing.**

## EN 343

**ZAŠTITA RADNE ODEĆE OD KIŠE**

Norma se sastoji od niza metoda testiranja materijala i šavova odeće namenjene zaštiti od vode, magle i vlage. Metode su: otpornost na prodor vode (pre i nakon testiranja), snaga isparavanja, zatezna čvrstoća, otpornost na cepanje šavova i promene dimenzije odeće. Sertifikovana odeća, označena je posebnim piktogramom:  
X : otpornost na prodor vode (1-3)  
Y : snaga isparavanja (1-3)

**PROTECTIO N AGAINST RAIN FOR PROTECTIVE CLOTHING**  
This standard sets the requirements and test methods applicable to materials and seams of clothing for protection against the weather, fog and soil moisture. The tests are: resistance to penetration of water (before and after treatment), évaporative strength, tensile strength, resistance to the tear resistance of the seams and dimensional changes. Certified clothes are marked by a specific pictogram:  
X : resistance to penetration of water (1-3)  
Y : évaporative resistance (from 1 to 3)

## EN 14058

**ODEĆA NAMENJENA ZAŠTITI OD HLADNOĆE**

Hladnu klimu karakteriše kombinacija vlage i vetra s temperaturom do -5°C.

**PROTECTION AGAINST COOL ENVIROMENTS - CLOTHING**  
Cool climate is an enviroment generally characterized by a combination of humidity and wind at a temperature of -5°C and more.

Artikli sertifikovani na ovaj standard sadrže sledeći piktogram:  
**Clothing certified to this standard includes the following pictogram:**

Termička otpornost **Thermal resistance**  
Propusnost zraka **Air permeability**  
Prodornost vode **Penetration of water**  
Otpornost na vodenu paru **Water vapour resistance**  
Termička izolacija **Thermal insulation**

X u normi označava da parametar nije ispitan. **X in norm is a mark that parameter wasn't tested.**

| Rct (m2K/W)       | CLASS |  |
|-------------------|-------|--|
| 0.06 ≤ Rct < 0.12 | 1     | Proizvodi su podeljeni u 3 klase u zavisnosti od njihove termičke otpornosti. Proizvodi čija je termička otpornost veća od 0.25 m²K/W, generalno se koriste za hladna područja (EN342).          |
| 0.12 ≤ Rct < 0.18 | 2     | Products are divided into three classes depending on their thermal resistance. Products whose thermal resistance is greater than 0.25m²K/W are generally intended for cold environments (EN342). |
| 0.18 ≤ Rct < 0.25 | 3     |  |

| AP (mm/s)    | CLASS |  |
|--------------|-------|--|
| 100 < AP     | 1     | Proizvodi su podijeljeni u tri grupe sukladno o njihovoj otpornosti na propusnost zraka. |
| 5 < AP < 100 | 2     | Products are also divided into three classes depending on their air permeability.        |
| AP ≤ 5       | 3     |  |

| AP (mm/s)        | CLASS |   |
|------------------|-------|---|
| 800 ≤ WP < 13000 | 1     | Proizvodi su podijeljeni u dvije grupe sukladno njihovoj otpornosti na prodor vode.       |
| WP > 13000       | 2     | Products are divided into two classes according to their resistance to water penetration. |

Testiranja se mogu provesti i na dva dodatna parametra: otpornost na isparavanje i termička otpornost.  
**Two optional features can be tested: the water vapour resistance and thermal insulation.**

Artikl je prilagodjen maloprodaji  
**The item is customized to retail**

Visokokvalitetni proizvodi nastali kao rezultat razvoja, inovacije i dugogodišnjeg iskustva.  
**High-quality products resulting from development, innovation and years of experience.**

GETOUT™

GETOUT

Lacuna GETOUT, odeća namenjena je zaštiti u svakodnevnim aktivnostima, bilo na poslu, bilo u slobodno vreme. Visok kvalitet i raznolikost materijala omogućavaju da rad na otvorenom, rekreaciju i slobodno vreme pretvorite u zadovoljstvo u svim vremenskim uvetima.

Želja za očuvanjem slobode kretanja, sigurnost i udobnost nošenja glavne su odrednice Lacuna GETOUT asortimana. Brinemo o vašoj sigurnosti i udobnosti kontinuiranim praćenjem noviteta i razvijanjem znanja o novim tehnologijama materijala kako bi vama omogućili kvalitetan dizajn proizvoda visokih tehničkih karakteristika i funkcionalnosti.

---

GETOUT

Lacuna GETOUT clothing is designed to protect you in everyday activities, during your working hours or in your free time. High quality and variety of materials allows for working outdoors or your free time outdoors is made comfortable in different weather conditions

Desire for preserving freedom of movement, safety and comfort are prime goals of Lacuna GETOUT assortment.

We care about your safety and comfort and for that reason we are monitoring trends and innovations and developing knowledge about new fabrics technologies to provide you with quality designed products with high technical characteristics and functionality.
