

A close-up photograph of a person wearing tan and black work gloves using a Stanley FatMax Brushless circular saw to cut a piece of light-colored wood. The saw is yellow and grey, with a black blade guard and a black handle. The person's hands are positioned on the saw's handle and trigger. The background is a blurred workshop setting with wooden planks.

POWER TOOL ACCESSORIES

A power tool's performance is only as good as its accessory. That's why PROs demand high quality, reliable accessories that get the job done to the highest standards.

Whatever the job, there is a STANLEY® or STANLEY® FATMAX® accessory that will ensure consistent, trusted performance time after time, whether you are sanding, cutting, drilling, grinding and more.

With its own Research & Development facilities looking after not only the factory organisation and tools, but also the design of new patented products, STANLEY® is able to deliver quality manufacturing to the highest possible level.

High performance masonry drill bits are manufactured in Germany at the STANLEY® ISO 9001 certified production plant, where staff work tirelessly to ensure the quality of every drill bit produced.

INNOVATIVE STORAGE SOLUTIONS.

You need to be sure that your accessories are as well organised and protected as the rest of your kit, so much of the STANLEY® accessory sets range come in strong durable cases to withstand the days knocks and bumps.

STANLEY® FATMAX® sets are often supplied in MULTI-STACK cases that are fully compatible with the **PRO-STACK™** storage system. You can build your own bespoke storage solution tailored to how you need it and the work you do no matter where you are - in the workshop, out on the job or in transit.

As well as being compatible with the main range of **PRO-STACK™** storage, many sets also interlock. The bulk storage cases and small connectable cases can also be used with the **PRO-STACK™** caddy for even more portability.

PRO-STACK™

PART OF THE
STANLEY® FATMAX® PRO-STACK™
STORAGE SYSTEM

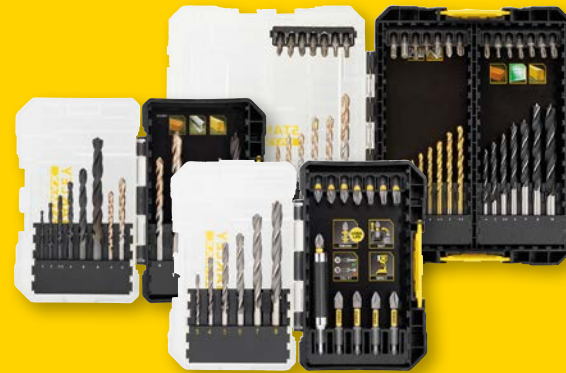

DRILL BITS

Constant innovation, in depth research, and years of European manufacturing expertise have resulted in a comprehensive range of high quality drill bits. Suitable for every type of material from concrete, masonry, brick, natural stone and tile, all types of thick and thin metals including pipes and every type of natural or man made wood as well as plastics.

STANLEY® bits offer excellent quality drill bits and are suitable for normal use.

STANLEY® FATMAX® bits are designed for the professional tradesman, with innovative features for very demanding or specialist tasks. They are manufactured to last up to three times longer than general purpose bits and renowned for their strength and reliability.

SCREWDRIVER BITS

STANLEY® and STANLEY® FATMAX® bits are forged and ground for long life and durability, as well as precision machined for a perfect fit in all types of screwheads, minimising cam-out and stripped heads.

Bits are available for general purpose use, as well as heavy duty professional use which feature a torsion zone that absorbs high levels of impact, minimises damage to screwheads, reduces slipping and is longer lasting.

MULTI-STACK SCREWDRIVER BIT SETS

A range of STANLEY® FATMAX® bit sets are available which are fully compatible with the PRO-STACK™ caddy for secure and organised storage.

BULK STORAGE CASES

Bulk Storage Cases can be placed securely inside Small and Medium Connectable Cases and the Caddy.

SMALL CONNECTABLE CASES

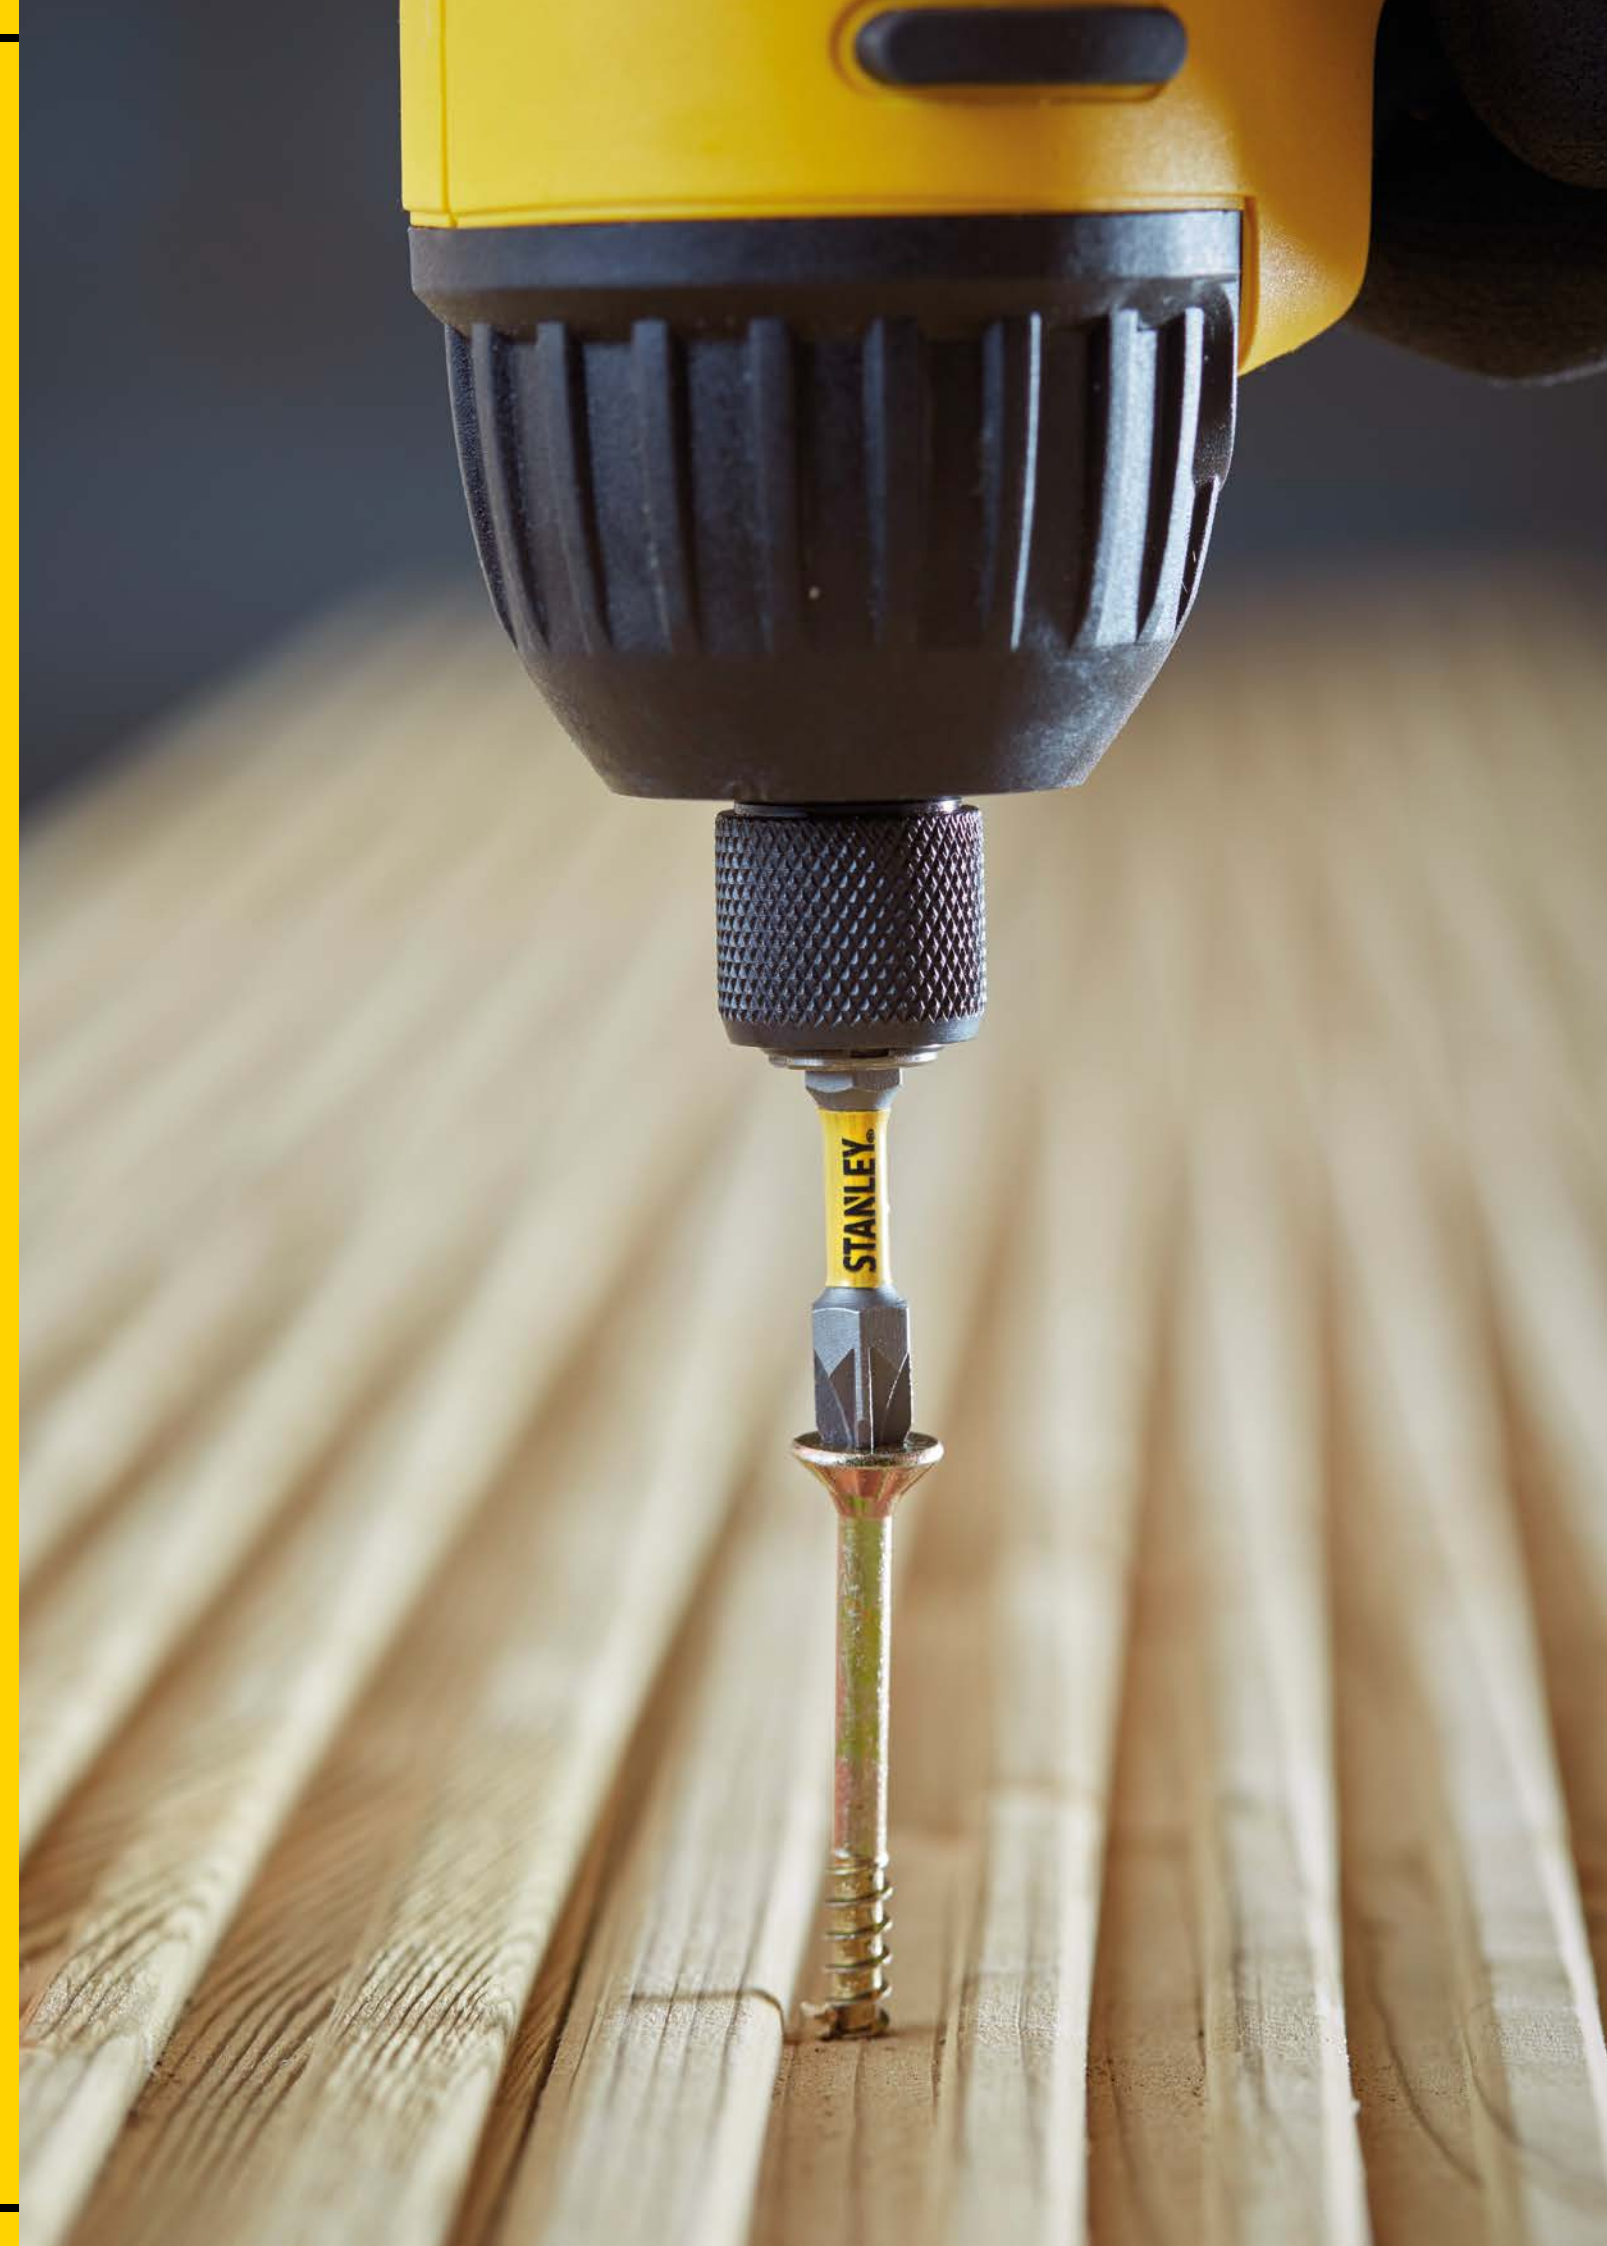

Small bulk storage cases can be locked together with other small connectable cases or securely stacked on top of a medium connectable case.

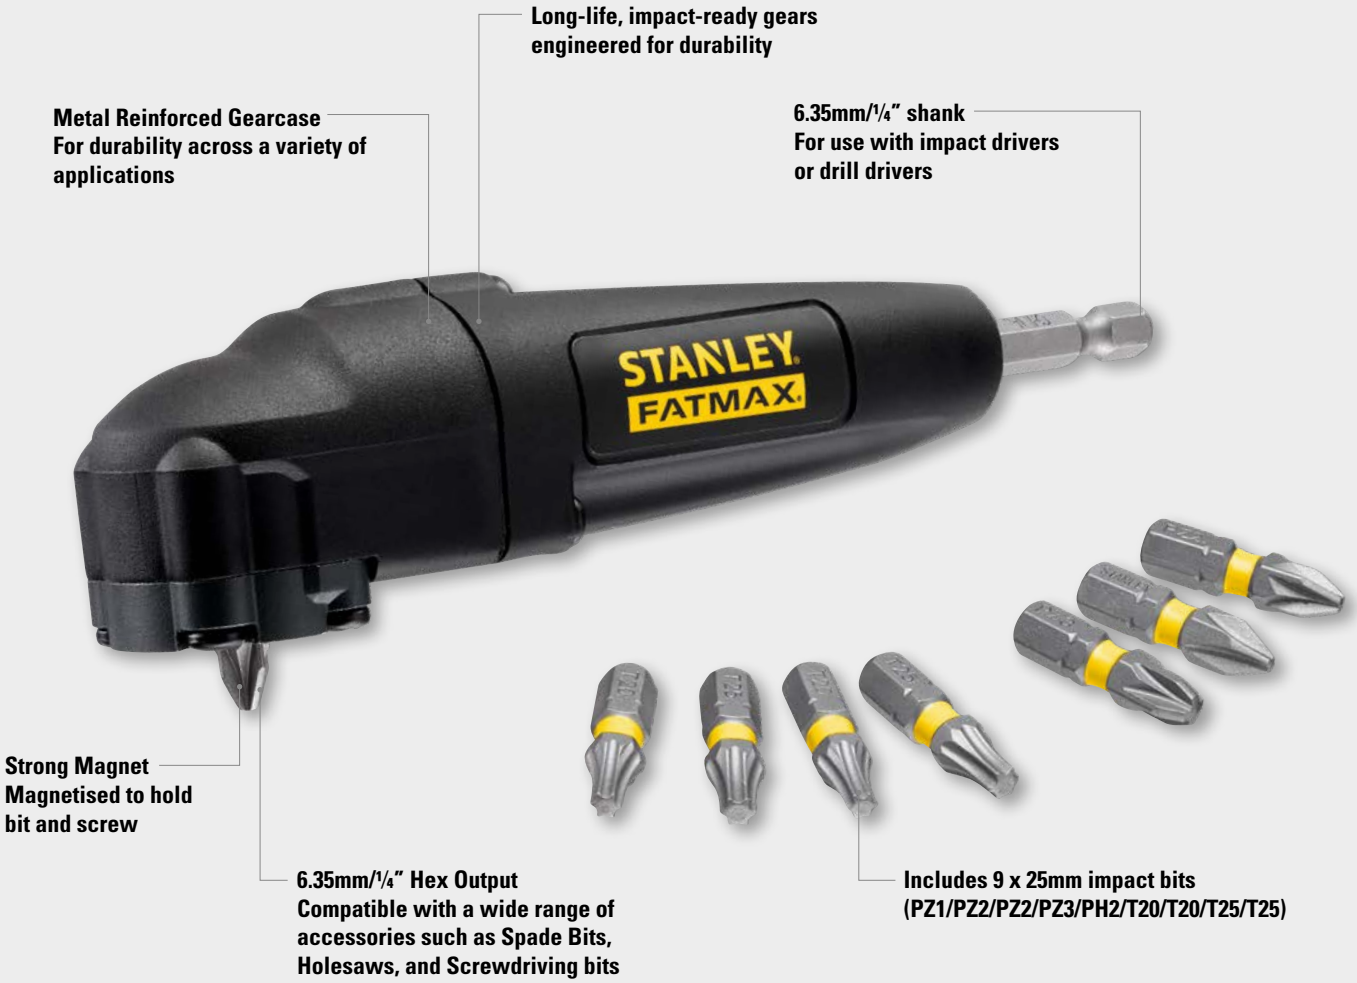

CADDY

The PRO-STACK™ Caddy holds individual Small and Bulk Storage Cases, keeping them organised and easily accessible.

Product Code	Description	Barcode
STA88582-XJ	Right Angle Impact Attachment & 9x 25mm Impact Bits	5054905305024

Designed for use with professional cordless drills, drill drivers and impact drivers, the **STANLEY® FATMAX®** Right Angle Attachment with Impact Bits delivers exceptional performance and accessibility for close quarter fastening and drilling applications, particularly in tight or awkward spaces.

A strong integrated magnet ensures retention of bits and screws so they are less likely to be lost or dropped. Built for durability, the long-life gears are impact ready, while the robust metal reinforced gearcase provides strength and resilience across an extensive range of applications.

SCREWDRIVER BITS
STANLEY

Available for Pozidriv,
Phillips and slotted screws

Manufactured for
heavy duty use

Unique design prevents
breakage and burring

Flexible shaft minimises
impact breakage

STANLEY® FATMAX® BLADES

TCT/HM PRECISION CUT/ LAMINATE

- Fine teeth, Tungsten Carbide Tipped
- Regrindable teeth
- For fine cross cutting in laminated chipboard, hardwood, softwood, man made boards and plywood

TCG TRIPLE CHIP GRIND

- Bevel alternates from left to right on subsequent teeth

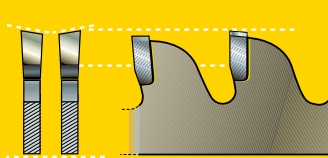

TCT/HM PRECISION

- Medium teeth, Tungsten Carbide Tipped
- Regrindable teeth
- For fine cross cutting in hardwood, softwood and man made boards

ATB ALTERNATE TOP BEVEL

- Bevel alternates from left to right on subsequent teeth

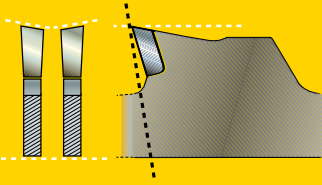

TCT/HM TOUGH CUTTING

- Large teeth, Tungsten Carbide tipped
- Regrindable teeth
- For fast rip cutting in recycled timber with hidden nails* and mortar, hardwood and softwood

WEDGE SHOULDER

- Absorbs the impact on teeth should the blade hit a concealed object

Tungsten carbide tipped teeth for improved accuracy and better finish, stays sharper much longer

Regrindable teeth for longer working life

Expansion slot to disperse heat, reduce vibration and prevent blade deformation

*remove visible nails prior to cutting

JIGSAW BLADES

STANLEY® jigsaw blades are manufactured to the highest standard using superior quality materials and include both general purpose blades for cutting in wood, metal and other materials as well as STANLEY® FATMAX® blades which are stronger, with less breakage and a longer life.

The range comprises blades for different materials and specialist applications in both U shank and T shank fitment and are compatible with a wide variety of jigsaw power tool brands.

U SHANK

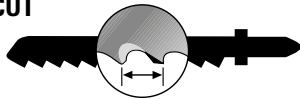

Fits: Black+Decker (old), Powerbase, Skil, Kress (old)

T SHANK

Fits: Bosch, AEG, Makita, Hitachi, Metabo, Ryobi, Mac Allister, DEWALT, Powerbase, McKeller, Stanley FatMax, Black+Decker (new)

TYPE OF CUT

As a quick visual guide - the more teeth per cm on the blade, the smoother, cleaner and more accurate the cut. Fast rough cutting blades will have less teeth.

TCT/HM BLADES

Tungsten carbon coated blades for ceramics, fibreglass, chipboard and tough materials. Manufactured from extra hard metal for longer life.

HCS BLADES

High carbon steel, designed for cutting softer materials, softwood, fibreboards and soft plastics.

HSS BLADES

Hardened high grade, high speed steel. Perfect for cutting metal, aluminium and non-ferrous metals

BIM BLADES

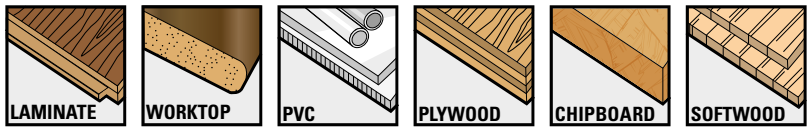

Bi-Metal bond of HCS and HSS for repeated cutting in hardwood, hard plastics, non-ferrous and ferrous metals. Longer lasting than HCS with less risk of shank breakage.

JIGSAW BLADES - WOOD (U SHANK)
STANLEY

A variety of blades available for different types of cut

Manufactured from High Carbon Steel
Designed for cutting softer materials such as softwood, chipboard and soft plastics

WOOD AND OTHER MATERIALS - 'U' SHANK HCS
FITS BLACK+DECKER®, POWERBASE, SKILL (KRESS, OLD)

SAW BLADES

The STANLEY® range of blades for recip saws, Scorpion and Alligator saws and planers / bandsaws are available in multiple types designed for specific applications.

RECIPROCATING SAW BLADES

Recip blades are available in 3 types designed for different applications:

- HCS BLADES for different types of cut in wood, plastic and for pruning branches.
- HAS BLADES for wood with nails, light masonry and gasbeton.
- BI-METAL BLADES for thick and thin metals and metal pipes.

UNIVERSAL FIT

Recip blades are designed with a universal fitting for wide tool compatibility.

SCORPION BLADES

A range of break resistant and flexible multi saw blades for cutting wood, metal and plastic, with a dedicated Scorpion tool fitting. Blades are available in 3 types:

LARGE SCORPION BLADES

- For straight and rip cutting in wood, chipboard and plastic

METAL SCORPION BLADES

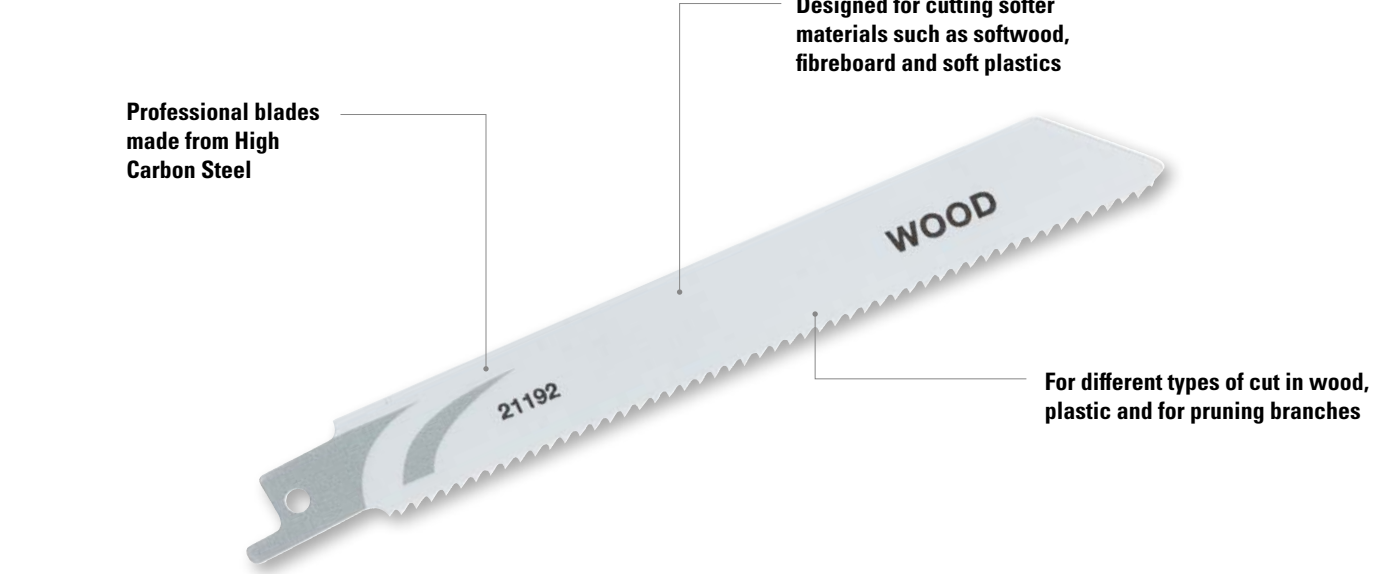

- For cutting sheet metal, aluminium, copper pipes and other non-ferrous

WOOD/PLYWOOD CURVED CUT BLADES

- For cutting curves in hardwood, softwood, plywood, chipboard and laminates

SANDING

STANLEY® sandpapers are available in multiple sheet sizes and configurations as well as belts to fit all major brands of power sanders as well as angle grinders and drills. Unpunched bulk rolls are a good, cost effective solution for larger jobs.

- 1 GRIT/ABRASIVE**
Higher the grit number, the finer the grit quality.
- 2 BINDER**
Grit coated with natural glue and synthetic resin for flexibility and durability.
- 3 BACKING**
Paper for flexibility and basic sanding or heavy duty fibre for high speed sanding with angle grinders.

GRIT LEVELS

COARSE GRIT 24-100

PREPARE:
For fast removal of most materials.
Ideal for paint and varnish.

MEDIUM GRIT 120-150

SMOOTH:
Removes and smoothes for a
basic finish.

FINE GRIT 180-240

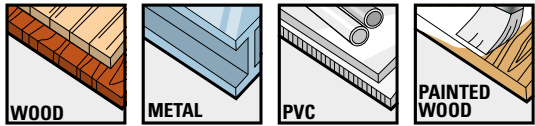

FINISH:
Ideal between coats of paint and
Varnish. For the perfect finish.

SANDING - HALF SHEET STANLEY

- High-quality aluminium oxide grains for a perfect surface finish
- Tough, durable paper backing ensures long life and performance
- For all stock removal and finishing tasks on wood and painted surfaces
- Grit coated with natural glue and synthetic resin for flexibility and durability
- Quick fit hook and loop backing allows fast and easy sheet changeover
- Variety of hole punches for wide compatability

MESH SANDING

QUICKER, CLEANER, EASIER.

A revolution in sanding. Tough, anti-clogging, and re-useable, the continuous mesh surface gives increased dust collection, and will always fit the dust extraction hole configuration on your sander which ever you are using.

Tough Anti-Clogging sanding mesh, lasts up to 4x longer than traditional sandpaper.

Anti-Clogging mesh surface, means longer time sanding less time changing sanding sheets.

Mesh can be easily cleaned. Just tap out the dust or rinse, dry and re-use.

GRIT LEVELS

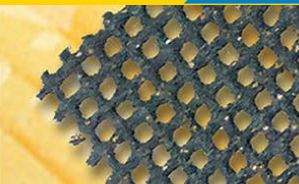

COARSE
80G/K

120G/K

FINE
240G/K

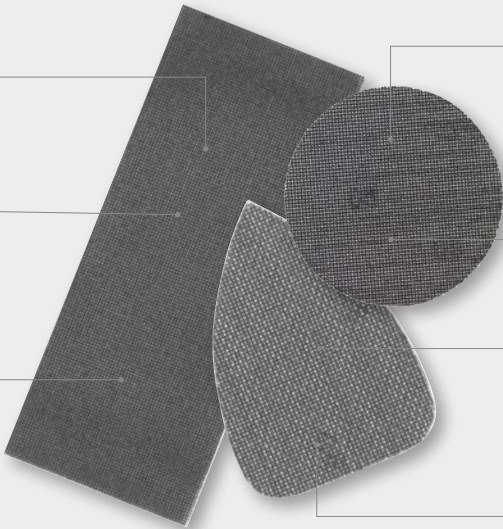

MESH SANDING STANLEY FATMAX

4x longer life vs standard
STANLEY® sanding sheets

For all basic, intermediate and final
sanding applications in wood, metal,
paints, varnishes, plaster and drywall

Anti-Clogging mesh surface,
means longer time sanding less
time changing sanding sheets

Up to 25% better sanding results
The open weave structure enables a
more effective removal of sanding dust,
resulting in a finer sanding pattern

Hook and loop
easy placement

Mesh can be easily cleaned.
Just tap out the dust or rinse,
dry and re-use

Universal fit with no need
for precise positioning

BONDED ABRASIVES

STANLEY® and STANLEY® FATMAX® bonded abrasive discs include a range of types and sizes for a wide variety of applications. STANLEY® versions are hard wearing and ideal for everyday use whilst STANLEY® FATMAX® are professional quality for fast cutting of steel, stainless steel, aluminium, metals and stone.

STANLEY® flap wheels are designed for metal grinding and polishing and are ideal for use on curved surfaces.

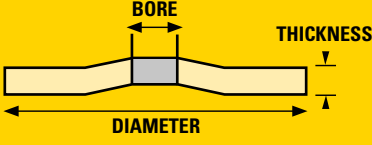

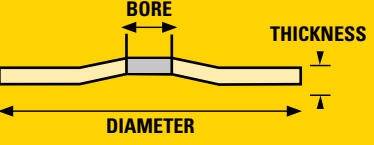

DIAMOND BLADES FOR ANGLE GRINDERS

Professional quality diamond blades allow for extremely fast, dry cutting in hard materials and come in three different types:

	CONTINUOUS RIM Fine cutting of ceramic and tile		SEGMENTED RIM General purpose cutting of stone, concrete and thermal block		TURBO RIM Fast consistent depth cutting of all hard materials

WIRE BRUSHES

Wire brushes are used with a drill or angle grinder for the fast, easy removal of surface rust and cleaning brick without damaging the surface. Brushes are available in a wide selection of types depending on the application required and feature highly specified wire grades for optimum material removal.

ROUTER BITS, RASPS AND CUTTERS

Manufactured for PRO tradespeople and specialist woodworkers, STANLEY® FATMAX® router bits and STANLEY® rasps and cutters are purpose made for building frames, mouldings, rebates and chamfering as well as fast and easy shaping, cutting, grinding and polishing tasks in both wood and metal.

ROUTER CUTTING ACCESSORIES

STANLEY®
FATMAX®

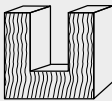

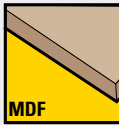

High specification TCT
Router bits last up to 10
times longer than steel bits

Part of the
STANLEY® FATMAX®
range of router bits
and accessories

Manufactured for the
professional tradesman and
specialist woodworker

Create a variety of profiles, grooves
and mouldings in softwoods,
hardwoods, plywood or MDF

ACCESSORY SETS

As well as being available as single products, STANLEY® and STANLEY® FATMAX® powertool accessories are available collated in to sets, many of them supplied in strong, durable storage cases to keep them safe and secure.

The accessory sets range includes both sets dedicated to a particular type of accessory, as well as mixed sets of the most common types for added convenience when working on site.
